Section 1 Setting the Scene

Chapter 1 Research and Development in Nursing	3
<i>Kate Gerrish</i>	
Key points	3
Introduction	3
Nursing research and development	4
Developing nursing knowledge	7
Research awareness, utilisation and activity	9
Research and nursing practice	10
Conclusion	12
References	12
Websites	13
Chapter 2 The Research Process	15
<i>Anne Lacey</i>	
Key points	15
Introduction	15
Developing the research question	16
Using a hypothesis	20
Searching and evaluating the literature	21
Choice of methodology and research design	22
Preparing a research proposal	23
Gaining access to the data	24
Sampling	25
Pilot study	26
Data collection	26
Data analysis	27
Dissemination of the results	27
Implementation of the results	27

Ensuring rigour	28
Conclusion	29
References	29
Websites	29
Chapter 3 Research Ethics	31
<i>Martin Johnson and Tony Long</i>	
Key points	31
The importance of ethics in research	31
Issues for researchers to address	32
Strategies for ethical research	37
Conclusion	39
References	40
Websites	40
Chapter 4 User Involvement in Research	43
<i>Janey Speers and Judith Lathlean</i>	
Key points	43
Introduction	43
Why should users be involved in research?	44
Who should be involved?	46
How are users involved?	47
Considerations of user involvement	48
Examples of research involving users	53
Conclusion	53
References	54
Further reading	55
Websites	55
Chapter 5 Research for a Multiethnic Society	57
<i>Sarah Salway and George T.H. Ellison</i>	
Key points	57
Introduction	57
The concept of ethnicity	59
Identifying a research focus	61
Ethnic categories and labels	62
Sampling	64

Data collection	66	What is critical appraisal?	106
Data analysis and interpretation	66	The need for critical appraisal	107
Ethical issues	67	Validity of research designs	107
Conclusion	67	How to appraise quantitative research studies	108
References	68	How to appraise qualitative research studies	109
Further reading	69	How to appraise systematic reviews, practice guidelines and economic analysis	115
Websites	69	Applying the results of critical appraisal	115
Chapter 6 Digital Technologies in Research	71	Conclusion	117
<i>Susie Macfarlane and Tracey Bucknall</i>		References	117
Key points	71	Further reading	118
Introduction	71	Websites	118
Digital technologies: social media and Web 2.0 platforms	72	Chapter 9 Preparing a Research Proposal	119
Digital technologies across phases of the research process	75	<i>Julie Taylor</i>	
Locating and filtering information	75	Key points	119
Securing funding	76	Introduction	119
Project planning and management	76	Identifying a research idea	120
Data collection	77	Identifying sources of funding	121
Data storage	79	The research proposal	121
Dissemination and impact	80	Submission requirements	128
Developing an integrated social media strategy	83	Maximising success	128
Conclusion	85	Conclusion	129
References	85	References	130
Further reading	85	Further reading	130
Websites	86	Websites	130
Section 2 Preparing the Ground		Chapter 10 Planning and Managing a Research Project	131
Chapter 7 Finding the Evidence	89	<i>Carol A. Haigh</i>	
<i>Claire Beecroft, Andrew Booth and Angie Rees</i>		Key points	131
Key points	89	Introduction	131
Introduction	89	Identifying and finding funding	131
Electronic information resources and the internet	90	Academic and practical support	132
The research literature	90	Types of supervisor	133
Accessing the literature	93	Supervision selection criteria	134
Planning a literature search	94	The responsibilities of the supervisor	134
Searching the literature	97	The responsibilities of the student	136
Specialist information sources	100	Sources of emotional and peer support	138
Writing a literature review	101	Conclusion	140
Managing references	101	References	140
Conclusion	103	Websites	141
References	104	Chapter 11 Gaining Access to the Research Site	143
Further reading	104	<i>Leslie Gelling</i>	
Chapter 8 Critical Appraisal of the Evidence	105	Key points	143
<i>Angie Rees, Claire Beecroft and Andrew Booth</i>		Introduction	143
Key points	105	The need for regulation of research	144
Introduction	105	Research ethics	145
		R&D approval	151
		Informal access to research sites	152

Chapter 17	Narrative Research	225	Chapter 20	The Delphi Technique	267
	<i>Dawn Freshwater and Immy Holloway</i>			<i>Sinead Keeney</i>	
	Key points	225		Key points	267
	Introduction	225		Introduction	267
	The nature and purpose of stories	226		Defining the Delphi technique	268
	Narrative inquiry in nursing	229		The expert panel	269
	Illness narratives or stories of sickness	229		Delphi rounds	270
	Ethical issues in narrative research	230		Response rates	271
	Collecting and analysing narrative data	231		Modifications of the Delphi technique	272
	Critical issues in narrative inquiry	233		Time frame	273
	Conclusion	234		Anonymity	273
	References	234		Gaining consensus	273
	Further reading	235		Interpreting results	274
				Skills of the researcher	274
				Critique of the technique	274
				Ethical considerations	275
				Conclusion	276
				References	276
				Further reading	278
				Websites	278
Chapter 18	Experimental Research	237	Chapter 21	Case Study Research	279
	<i>Andrea E. Nelson, Jo Dumville and David Torgerson</i>			<i>Charlotte Clarke, Jan Reed and Sarah E. Keyes</i>	
	Key points	237		Key points	279
	Background	237		Introduction	279
	Experimental versus observational studies	237		Definitions of case study methodology	281
	Characteristics of experimental design	239		Research questions	282
	Pre-/post-test studies	240		Selection of cases	283
	Interrupted time series	241		Research design	285
	Controlled before-and-after studies	241		Data analysis	287
	Controlled trials	242		Presentation and reporting	289
	The RCT	243		Conclusion	289
	RCTs and the reduction of bias	245		References	289
	Other experimental designs	248			
	Reporting and reading RCTs	250	Chapter 22	Evaluation Research	291
	Important considerations in using RCTs	251		<i>Judith Lathlean</i>	
	Strengths and limitations of RCTs	251		Key points	291
	Conclusion	252		Introduction	291
	References	253		What is evaluation research?	291
	Websites	253		Evaluation of satisfaction	293
				Approaches to evaluation	293
				Instruments to aid evaluation	298
				Using different methods to evaluate	300
				Conclusion	300
				References	300
				Further reading	302
				Websites	302
Chapter 19	Surveys	255	Chapter 23	Action Research	303
	<i>Felicity Hasson, Hugh McKenna and Sinead Keeney</i>			<i>Julienne Meyer and Julie Cooper</i>	
	Key points	255		Key points	303
	Historical development of survey research in health	255		Principles of action research	303
	Descriptive surveys	256		Common models of working with action research in nursing	304
	Correlational and comparative surveys	257			
	Longitudinal surveys and cohort studies	258			
	Sources of data in survey research	259			
	Epidemiology	262			
	Conclusion	264			
	References	264			
	Further reading	265			
	Websites	266			

Action research in health-care practice	305
The role of the researcher in action research	309
Ethical issues	310
Methods of data collection	311
Reflexivity and action research	312
Assessing quality	313
Research as an agent of change	314
Advantages and disadvantages of action research	315
Conclusion	315
References	316
Further reading	317
Websites	317
Chapter 24 Practitioner Research	319
<i>Bridie Kent</i>	
Key points	319
Introduction	319
Background to practitioner research	320
Insider and outsider positions	322
The practitioner research process	323
Methods	325
Rigour in practitioner research	327
Ethical issues	328
Conclusion	330
References	330
Further reading	331
Chapter 25 Systematic Reviews and Evidence Syntheses	333
<i>Andrew Booth, Angie Rees and Claire Beecroft</i>	
Key points	333
Introduction	333
Background to evidence synthesis	333
Writing a systematic review protocol	337
Systematically searching the literature	339
Assessing the quality of the literature	344
Extracting key information from the selected studies	344
Summarising, interpreting and presenting the findings	345
Writing up the review	347
Systematic reviews of qualitative research	347
Conclusion	350
References	351
Further reading	352
Websites	352
Chapter 26 Realist Synthesis	353
<i>Jo Rycroft-Malone, Brendan McCormack, Kara DeCorby and Alison M. Hutchinson</i>	
Key points	353
Introduction	353

Realist review: philosophy and principles	354
Realist synthesis: examples	354
Stages in conducting a realist synthesis	355
Data synthesis	364
Narrative construction	366
Strengths and limitations of realist synthesis	367
Conclusion	369
References	369
Websites	370
Chapter 27 Mixed Methods Research	371
<i>Joanne Turnbull and Judith Lathlean</i>	
Key points	371
What is mixed methods research?	371
Can – and should – methods be mixed?	372
Why are mixed methods used in nursing and health sciences research?	373
Key concepts in mixed methods research	374
Mixed methods designs	378
Integration in mixed methods research	378
Challenges with mixed methods studies	380
Conclusion	381
References	381
Further reading	382
Websites	383

Section 4 Collecting Data

Chapter 28 Interviewing	387
<i>Angela Tod</i>	
Key points	387
Introduction	387
The purpose of the research interview	387
Types of interview	390
Undertaking an interview	392
Conducting the interview	395
Common pitfalls in conducting interviews	396
Advantages and disadvantages of interviews	397
Issues of validity and reliability	397
Ethical issues with interviewing	398
Conclusion	399
References	399
Further reading	400

Chapter 29 Focus Groups	401	Background to think aloud	442
<i>Claire Goodman and Catherine Evans</i>		Applying think aloud in nursing research	442
Key points	401	How to use think aloud	443
Purpose of focus groups	401	Recruitment	446
Conducting a focus group	403	Data collection	446
Online focus groups	407	Data analysis	447
Data analysis	407	Validity and reliability	449
Issues of validity and reliability	408	Ethical issues	451
Advantages of focus groups	409	Strengths and limitations	451
Limitations of focus groups	409	Conclusion	452
Ethical issues	410	References	453
Conclusion	411	Chapter 33 Outcome Measures	455
References	411	<i>Peter Griffiths and</i>	
Further reading	412	<i>Anne Marie Rafferty</i>	
Chapter 30 Questionnaire Design	413	Key points	455
<i>Martyn Jones and Janice Rattray</i>		Introduction	455
Key points	413	Nurse-sensitive outcomes	456
Introduction	413	Outcomes versus process	458
Purpose of questionnaires	414	Characteristics of measures	458
Using and adapting validated questionnaires	415	Validity and reliability	461
Reliability	416	Bias in measurement	464
Validity	416	Selecting outcome measures	464
Developing a questionnaire	417	Other considerations in identifying outcomes	465
Administering questionnaires	421	Using clinical data and other routinely collected data in research	466
Piloting	422	Conclusion	467
Response rates	422	References	467
Comparison between face-to-face structured interview and postal questionnaires	423	Further reading	468
Strengths and limitations of questionnaires	423		
Ethical issues	423		
Conclusion	424		
References	424		
Chapter 31 Observation	427	Section 5 Making Sense of Data	
<i>Jo Booth</i>		Chapter 34 Qualitative Analysis	471
Key points	427	<i>Judith Lathlean</i>	
The purpose of observation	427	Key points	471
Participant observation	431	Introduction	471
Non-participant observation	432	Principles of qualitative analysis	472
Advantages and disadvantages of observation	436	Examples of methods of analysis	474
Validity and reliability	437	Practicalities	481
Ethical issues	438	Examples of analyses	482
Conclusion	438	Using computer software for qualitative data analysis	485
References	438	Conclusion	485
		References	485
		Further reading	486
		Websites	487
Chapter 32 Think Aloud Technique	441	Chapter 35 Descriptive Analysis of Quantitative Data	489
<i>Tracey Bucknall and Leanne M. Aitken</i>		<i>Stephen J. Walters and Jenny Freeman</i>	
Key points	441	Key points	489
Introduction	441	Introduction	489
What is thinking aloud?	442	Data types	490

Recording data	491	The nature of 'evidence'	542
Presenting data in graphs	494	Hierarchies of evidence	547
Describing data	499	Research utilisation	548
Presenting data and results in tables	502	The process of evidence-based practice	549
Conclusion	503	Barriers to achieving evidence-based practice	549
References	504	Implementing evidence-based practice	551
Further reading	504	Conclusion	551
Websites	504	References	551
Chapter 36 Examining Relationships in Quantitative Data	505	Further reading	553
<i>Jenny Freeman and Stephen J. Walters</i>		Websites	553
Key Points	505	Chapter 39 Translating Research Findings into Practice	555
Introduction	505	<i>Kate Gerrish</i>	
Statistical analysis	505	Key points	555
Choosing the statistical method	509	Introduction	555
The relationship between two continuous variables	517	Translating research findings into research products	557
Conclusion	524	Clinical guidelines	557
Further reading	524	Knowledge translation frameworks	562
		The knowledge to action framework	562
		Interventions to promote behavioural change	565
		Achieving change	567
		Conclusion	568
		References	568
		Further reading	570
		Websites	570
Section 6 Putting Research into Practice		Chapter 40 Future Trends in Nursing Research	571
Chapter 37 Disseminating Research Findings	527	<i>Kate Gerrish and Judith Lathlean</i>	
<i>Kate Gerrish</i>		Key points	571
Key Points	527	Introduction	571
Introduction	527	Ensuring the relevance of research	572
Communicating with different audiences	527	Enhancing the impact of research	575
The research report	528	The evolving role of digital technology	577
Writing an article for publication	528	Conclusion	580
Preparing a report for the public	533	Glossary	583
Presenting research at a conference	533	Index	591
Social media and networking opportunities	538		
Conclusion	539		
Further reading	539		
Websites	540		
Chapter 38 Evidence-Based Practice	541		
<i>Kate Gerrish</i>			
Key points	541		
Introduction	541
