Preface	ix
Universality conjecture for all Airy, sine and Bessel kernels in the complex plane	1
GERNOT AKEMANN AND MICHAEL PHILLIPS	
On a relationship between high rank cases and rank one cases of Hermitian random matrix models with external source	25
JINHO BAIK AND DONG WANG	
Riemann–Hilbert approach to the six-vertex model	39
PAVEL BLEHER AND KARL LIECHTY	
CLT for spectra of submatrices of Wigner random matrices, II: Stochastic evolution	57
ALEXEI BORODIN	
Critical asymptotic behavior for the Korteweg – de Vries equation and in random matrix theory	71
TOM CLAEYS AND TAMARA GRAVA	
On the asymptotics of a Toeplitz determinant with singularities	93
PERCY DEIFT, ALEXANDER ITS, AND IGOR KRASOVSKY	
Asymptotic analysis of the two-matrix model with a quartic potential	147
MAURICE DITS, ARNO B. J. KUIJLAARS, MAN YUE MO	
Conservation laws of random matrix theory	163
NICHOLAS M. ERCOLANI	
Asymptotics of spacing distributions 50 years later	199
PETER FORRESTER	
Applications of random matrix theory for sensor array imaging with measurement noise	223
JOSSELIN GARNIER AND KNUT SOLNA	
Convolution symmetries of integrable hierarchies, matrix models and τ -functions	247
JOHN HARNAD AND ALEXANDER ORLOV	
Universality limits via “old style” analysis	277
DORON LUBINSKY	
Fluctuations and large deviations of some perturbed random matrices	293
MYLÈNE MAÏDA	
Three lectures on free probability	309
JONATHAN NOVAK	

Whittaker functions and related stochastic processes	385
NEIL O’CONNELL	
How long does it take to compute the eigenvalues of a random symmetric matrix?	411
CHRISTIAN PFRANG, PERCY DEIFT, AND GOVIND MENON	
Exact solutions of the Kardar–Parisi–Zhang equation and weak universality for directed random polymers	443
JEREMY QUASTEL	
Replica analysis of the one-dimensional KPZ equation	451
TOMOHIRO SASAMOTO	
Asymptotic expansions for β matrix models and their applications to the universality conjecture	463
MARIYA SHCHERBINA	
KPZ scaling theory and the semidiscrete directed polymer model	483
HERBERT SPOHN	
Experimental realization of Tracy–Widom distributions and beyond: KPZ interfaces in turbulent liquid crystal	495
KAZUMASA TAKEUCHI	
Random matrices: the four-moment theorem for Wigner ensembles	509
TERENCE TAO AND VAN VU
