<b>List of Symbols</b>	<b>xi</b>
<b>Preface</b>	<b>xiii</b>
<b>About the Author</b>	<b>xv</b>
<b>Acknowledgments</b>	<b>xvii</b>
<b>I Dynamics</b>	<b>1</b>
<b>1 The Galileo–Newton Formulation of Dynamics</b>	<b>3</b>
1.1 Galilean relativity . . . . .	4
1.1.1 Frames of reference . . . . .	4
1.1.2 Galileo’s law of inertia and inertial frames . . . . .	10
1.1.3 Galilean transformations . . . . .	12
1.1.4 General Galilean transformations . . . . .	15
1.2 Newton’s dynamical laws . . . . .	16
1.3 Gravitational and inertial mass . . . . .	19
1.3.1 The weak equivalence principle . . . . .	20
1.4 Exercises . . . . .	23
<b>2 Particle Dynamics in One Dimension</b>	<b>25</b>
2.1 Motion of a particle under a force . . . . .	25
2.1.1 Potential energy . . . . .	27
2.1.2 Work . . . . .	29
2.2 Potential energy diagrams . . . . .	30
2.3 Tension . . . . .	36
2.4 Friction . . . . .	38
2.5 Resistive motion . . . . .	41
2.5.1 Vertical motion in a resistive medium . . . . .	43
2.6 Escape velocity . . . . .	50
2.7 Exercises . . . . .	52
<b>3 Oscillations</b>	<b>57</b>
3.1 Hooke’s law . . . . .	57
3.2 Simple harmonic motion . . . . .	60
3.3 Period of small oscillations . . . . .	64

3.4 Damped simple harmonic motion . . . . .	67
3.5 Damped simple harmonic motion with a forcing term . . . . .	71
3.5.1 Resonance . . . . .	73
3.6 The LCR circuit . . . . .	77
3.7 Exercises . . . . .	78
<b>4 Particle Dynamics in Two and Three Dimensions</b> . . . . .	<b>83</b>
4.1 Projectiles . . . . .	83
4.1.1 Projectiles without air resistance . . . . .	84
4.1.2 Projectiles with linear air resistance . . . . .	87
4.2 Energy and force . . . . .	88
4.2.1 Work and kinetic energy . . . . .	88
4.2.2 Potential energy and conservative force . . . . .	90
4.3 Charged particles in an electromagnetic field . . . . .	94
4.3.1 Particle in a magnetic field . . . . .	94
4.3.2 Crossed electric and magnetic fields . . . . .	96
4.4 Exercises . . . . .	98
<b>5 Central Forces and Orbits</b> . . . . .	<b>101</b>
5.1 Central forces and angular momentum . . . . .	101
5.2 Circular motion . . . . .	104
5.2.1 Plane polar coordinates . . . . .	104
5.2.2 Motion of a particle in a circular orbit . . . . .	106
5.2.3 Motion of a particle in a vertical circle . . . . .	107
5.3 Orbital motion . . . . .	109
5.4 The inverse square law . . . . .	111
5.5 The orbital equation . . . . .	114
5.5.1 Orbital paths . . . . .	115
5.5.2 Orbital energy . . . . .	118
5.6 Perturbed orbits . . . . .	123
5.7 Kepler's laws of planetary motion . . . . .	125
5.8 The perihelion precession of Mercury . . . . .	127
5.9 Rutherford scattering . . . . .	129
5.9.1 Scattering angle and impact parameter . . . . .	130
5.10 Exercises . . . . .	132
<b>6 Multi-Particle Systems</b> . . . . .	<b>137</b>
6.1 Conservation of linear momentum . . . . .	138
6.2 Conservation of angular momentum . . . . .	140
6.3 The centre of mass frame . . . . .	141
6.3.1 Linear momentum . . . . .	143
6.3.2 Angular momentum . . . . .	143
6.3.3 Torque . . . . .	144
6.3.4 A caveat to the torque equation . . . . .	145
6.3.5 Energy . . . . .	146

6.4	The two-body problem	150
6.5	Collisions	153
6.5.1	Elastic collisions in the laboratory (LAB) frame	155
6.5.2	Elastic collisions in the centre of mass (CM) frame	158
6.5.3	Transformations between CM and LAB frames	160
6.6	Inelastic collisions	166
6.6.1	The coefficient of restitution	169
6.7	Variable mass problems	171
6.7.1	Rocket motion	171
6.7.2	A falling raindrop	175
6.8	Exercises	176
<b>7</b>	<b>Rigid Bodies</b>	<b>181</b>
7.1	Rotation of a rigid body about a fixed axis	181
7.1.1	Angular velocity and kinetic energy	181
7.1.2	Moment of inertia	183
7.1.3	Angular momentum	184
7.1.4	Calculating the centre of mass and the moment of inertia of some uniform rigid bodies	185
7.1.5	Parallel axis theorem	194
7.1.6	Perpendicular axis theorem	196
7.2	Planar motion of a rigid body	198
7.2.1	Kinetic energy	199
7.2.2	Instantaneous centre	199
7.2.3	The compound pendulum	202
7.3	Exercises	208
<b>8</b>	<b>Rotating Reference Frames</b>	<b>211</b>
8.1	Rates of change in a rotating frame	211
8.2	Newton's second law in a rotating frame	214
8.3	The centrifugal force	216
8.3.1	Actual and apparent gravitational acceleration	217
8.4	The Coriolis force	222
8.4.1	Motion of a freely falling body	224
8.4.2	Foucault's pendulum	228
8.5	Exercises	232
<b>II</b>	<b>Relativity</b>	<b>235</b>
<b>9</b>	<b>Special Relativity</b>	<b>237</b>
9.1	Inception	237
9.1.1	The Michelson Morley experiment (a précis)	238
9.2	Einstein's postulates of special relativity	240
9.3	Lorentz transformations	241
9.4	Minkowski diagrams (space-time diagrams)	245
9.4.1	Calibration hyperbolae and the $s^2$ invariant	246

9.5 Relativistic kinematics . . . . .	248
9.5.1 Relativity of simultaneity . . . . .	248
9.5.2 Time dilation . . . . .	251
9.5.3 Experimental evidence of time dilation . . . . .	252
9.5.4 The twin paradox . . . . .	253
9.5.5 The Lorentz–Fitzgerald contraction (length contraction) . . . . .	257
9.5.6 Transformation of velocity . . . . .	260
9.6 Exercises . . . . .	263
<b>10 Space-time</b>	<b>267</b>
10.1 The light cone . . . . .	268
10.2 Proper time . . . . .	270
10.3 The four-component vector formalism . . . . .	271
10.3.1 Lorentz invariance of the inner product . . . . .	272
10.3.2 Four-velocity . . . . .	274
10.3.3 Four-acceleration . . . . .	275
10.4 Exercises . . . . .	276
<b>11 Relativistic Mechanics</b>	<b>279</b>
11.1 Four-momentum . . . . .	279
11.2 Relativistic energy . . . . .	280
11.3 Massless particles . . . . .	282
11.4 Aberration	283
11.4.1 The Lorentz transformations for four-momentum . .	284
11.4.2 The relativistic Doppler effect . . . . .	286
11.5 Particle collisions . . . . .	287
11.5.1 Compton scattering . . . . .	287
11.5.2 Collisions in the LAB frame and CM frame . . . . .	289
11.5.3 Threshold energy . . . . .	292
11.6 Exercises . . . . .	294
<b>A Appendix: Conic Sections</b>	<b>297</b>
A.1 Conic sections in Cartesian coordinates . . . . .	298
A.1.1 Parabolas . . . . .	298
A.1.2 Ellipses . . . . .	299
A.1.3 Hyperbolas . . . . .	301
A.2 Conic sections in polar coordinates . . . . .	303
A.3 Exercises . . . . .	304
<b>Solutions</b>	<b>305</b>
<b>Index</b>	<b>311</b>
