Section IV Residues and Other Food Components

1. Mycotoxin Analysis in Poultry and Processed Meats	3
<i>Jean-Denis Bailly and Philippe Guerre</i>	
2. Phycotoxins: Methods of Detection	29
<i>Luis M. Botana, Mercedes R. Vieytes, Carmen Louzao, Ana M. Botana, Amparo Alfonso, Carmen Vale, and Natalia Vilariño</i>	
3. Antibacterials	53
<i>Marilena E. Dasenaki, Anna A. Bletsou, and Nikolaos S. Thomaidis</i>	
4. Growth Promoters	87
<i>Milagro Reig and Fidel Toldrá</i>	
5. Urea Pesticide Residues in Food	105
<i>Leo M.L. Nollet</i>	
6. Organochlorine Pesticide Residues in Food	135
<i>M. Paramasivam, K. Jayalakshmi, S. Chandrasekaran, and S. Kuttalam</i>	
7. Determination of Carbamate Pesticides in Foods	151
<i>Evaristo Ballesteros Tribaldo</i>	
8. Analysis of Organophosphorus Insecticides in Foods	181
<i>Andres Perez Parada, Lucia Pareja, Silvina Niell, Natalia Besil, Marcos Colazzo, Maria Verónica Cesio, and Horacio Heinzen</i>	
9. Fungicide Residues	201
<i>M. Paramasivam</i>	
10. Herbicide Residues	215
<i>Edmond Sanganyado and Stephen Majoni</i>	
11. Packaging Residues	241
<i>Emma L. Bradley and Laurence Castle</i>	
12. Allergens	251
<i>Virginie Tregouat and Arjon J. van Hengel</i>	
13. Risk Management of Polychlorinated Dibenzodioxins, Dibenzofurans, and Biphenyls in Food in the European Union: A Historical View	263
<i>Gianfranco Brambilla, Alessandro di Domenico, and Anna Laura Iamiceli</i>	

14. Nitrosamines	289
<i>Susanne Rath and Felix Guillermo Reyes Reyes</i>	
15. Bioactive Amines	301
<i>Christian Fernandes and Maria Beatriz Abreu Gloria</i>	
16. Polycyclic Aromatic Hydrocarbons	329
<i>Peter Šimko</i>	
17. Metals	339
<i>Antonio Ruiz-Medina and Eulogio J. Llorent-Martínez</i>	
18. Genetically Modified Organisms in Food	355
<i>Dabing Zhang and Jinchao Guo</i>	
19. Thermal Analysis and DSC–FTIR Microspectroscopy	371
<i>Shan-Yang Lin and Chih-Cheng Lin</i>	
20. Methods of Detection of Irradiated Foodstuffs and Relative Products	387
<i>Jacques J. Raffi and Jacky Kister</i>	
21. Radionuclide Concentrations in Food	397
<i>Leo M.L. Nollet</i>	

Section V Methods, Techniques, and Instruments

22. Sample Preparation and Extraction Techniques	417
<i>M. Paramasivam, K. Jayalakshmi, S. Chandrasekaran, and S. Kuttalam</i>	
23. Chemometrics	429
<i>Michele Forina, Silvia Lanteri, Chiara Casolino, and Paolo Oliveri</i>	
24. High-Performance Liquid Chromatography: An Established Separation Technique in Food Chemistry	459
<i>Chiara Fanali, Paola Dugo, Javier-Hernández Borges, Luigi Mondello, Zeineb Aturki, and Salvatore Fanali</i>	
25. Gas Chromatography	481
<i>Semih Otles and Vasfiye Hazal Ozyurt</i>	
26. Capillary Electrophoresis in Food Analyses	493
<i>Heli Sirén</i>	
27. Isoelectric Focusing, Gel Electrophoresis, and Western Blot	521
<i>Romina Pedreschi</i>	
28. Differential Scanning Calorimetry	531
<i>Leo M.L. Nollet</i>	
29. Nanoscale Systems	541
<i>Tibor Hianik</i>	
30. Biosensors in Food Analysis	555
<i>Theodoros H. Varzakas, Georgia-Paraskevi Nikoleli, Dimitrios P. Nikolelis, and Nikolaos Tzamtzis</i>	
31. UV–Visible Absorption, Fluorescence, and Chemiluminescence Spectroscopy	575
<i>Basil Munjanja and Edmond Sanganyado</i>	

32. Vibrational Spectroscopy Methods for Rapid Control of Agro-Food Products	591
<i>Vincent Baeten, Herve Rogez, Juan Antonio Fernández Pierna, Philippe Vermeulen, and Pierre Dardenne</i>	
33. Atomic Absorption Spectroscopy and Inductively Coupled Plasma Mass Spectrometry	623
<i>Semih Otles and Ahmet Senturk</i>	
34. Mass Spectrometry	641
<i>Dimitra A. Lambropoulou and Dimitra Hela</i>	
35. NMR Spectroscopy	659
<i>Apostolos Spyros</i>	
36. Ultrasound Analysis	673
<i>Alfredo Teixeira</i>	
Index	687
