

CONTENTS

Author Biographies	vii
Preface	ix
1 Introduction	1
2 Common Reactions Employed in Synthesis	7
2.1 Soft-Chemistry Routes, 12	
3 Ceramic Methods	17
4 Decomposition of Precursor Compounds	23
5 Combustion Synthesis	33
6 Arc and Skull Methods	37
7 Reactions at High Pressures	41
8 Mechanochemical and Sonochemical Methods	47
8.1 Mechanochemistry, 47	
8.2 Sonochemistry, 50	
9 Use of Microwaves	53

10	Soft Chemistry Routes	57
	<i>10.1 Topochemical Reactions, 57</i>	
	<i>10.2 Intercalation Chemistry, 64</i>	
	<i>10.3 Ion Exchange Reactions, 73</i>	
	<i>10.4 Use of Fluxes, 78</i>	
	<i>10.5 Sol–Gel Synthesis, 81</i>	
	<i>10.6 Electrochemical Methods, 86</i>	
	<i>10.7 Hydrothermal, Solvothermal and Ionothermal Synthesis, 90</i>	
11	Nebulized Spray Pyrolysis	97
12	Chemical Vapour Deposition and Atomic Layer Deposition	103
13	Nanomaterials	107
	13.1 Nanoparticles, 107	
	13.2 Core–Shell Nanocrystals, 116	
	13.3 Nanowires, 119	
	13.4 Inorganic Nanotubes, 133	
	13.5 Graphene-like Structures of Layered Inorganic Materials, 137	
14	Materials	151
	<i>14.1 Metal Borides, Carbides and Nitrides, 151</i>	
	<i>14.2 Metal Chalcogenides, 157</i>	
	<i>14.3 Metal Halides, 162</i>	
	<i>14.4 Metal Silicides and Phosphides, 167</i>	
	<i>14.5 Intergrowth Structures and Misfit Compounds, 171</i>	
	14.5.1 Intergrowth structures, 171	
	14.5.2 Misfit Compounds, 177	
	<i>14.6 Intermetallic Compounds, 178</i>	
	<i>14.7 Superconducting Compounds, 182</i>	
	<i>14.8 Porous Materials, 191</i>	
	14.8.1 Mesoporous Silica Materials, 191	
	14.8.2 Aluminophosphates, 194	
	14.8.3 Metal Organic Frameworks (MOFs), 196
