

# CONTENTS

<b>Preface</b>	<b>13</b>
<b>Green Content</b>	<b>20</b>
<b>CHAPTER 1</b>	
<b>Introduction to Engineering Economy</b>	<b>25</b>
<hr/>	
1.1	Introduction 26
1.2	The Principles of Engineering Economy 27
1.3	Engineering Economy and the Design Process 31
1.4	Using Spreadsheets in Engineering Economic Analysis 39
1.5	Try Your Skills 39
1.6	Summary 40
<b>CHAPTER 2</b>	
<b>Cost Concepts and Design Economics</b>	<b>44</b>
<hr/>	
2.1	Cost Terminology 45
2.2	The General Economic Environment 51
2.3	Cost-Driven Design Optimization 62
2.4	Present Economy Studies 67
2.5	Case Study—The Economics of Daytime Running Lights 73
2.6	Try Your Skills 75
2.7	Summary 76
Appendix 2-A	Accounting Fundamentals 84
<b>CHAPTER 3</b>	
<b>Cost-Estimation Techniques</b>	<b>91</b>
<hr/>	
3.1	Introduction 92
3.2	An Integrated Approach 94
3.3	Selected Estimating Techniques (Models) 102
3.4	Parametric Cost Estimating 107
3.5	Case Study—Demanufacturing of Computers 118
3.6	Electronic Spreadsheet Modeling: Learning Curve 120
3.7	Try Your Skills 122
3.8	Summary 124

**CHAPTER 4****The Time Value of Money****131**

4.1	Introduction	132
4.2	Simple Interest	133
4.3	Compound Interest	134
4.4	The Concept of Equivalence	134
4.5	Notation and Cash-Flow Diagrams and Tables	137
4.6	Relating Present and Future Equivalent Values of Single Cash Flows	141
4.7	Relating a Uniform Series (Annuity) to Its Present and Future Equivalent Values	147
4.8	Summary of Interest Formulas and Relationships for Discrete Compounding	157
4.9	Deferred Annuities (Uniform Series)	159
4.10	Equivalence Calculations Involving Multiple Interest Formulas	161
4.11	Uniform (Arithmetic) Gradient of Cash Flows	167
4.12	Geometric Sequences of Cash Flows	172
4.13	Interest Rates that Vary with Time	177
4.14	Nominal and Effective Interest Rates	179
4.15	Compounding More Often than Once per Year	181
4.16	Interest Formulas for Continuous Compounding and Discrete Cash Flows	184
4.17	Case Study—Understanding Economic “Equivalence”	187
4.18	Try Your Skills	190
4.19	Summary	193

**CHAPTER 5****Evaluating a Single Project****210**

5.1	Introduction	211
5.2	Determining the Minimum Attractive Rate of Return (MARR)	212
5.3	The Present Worth Method	213
5.4	The Future Worth Method	220
5.5	The Annual Worth Method	221
5.6	The Internal Rate of Return Method	226
5.7	The External Rate of Return Method	237
5.8	The Payback (Payout) Period Method	239
5.9	Case Study—A Proposed Capital Investment to Improve Process Yield	242
5.10	Electronic Spreadsheet Modeling: Payback Period Method	244
5.11	Try Your Skills	246
5.12	Summary	248
Appendix 5-A	The Multiple Rate of Return Problem with the IRR Method	260

**CHAPTER 6****Comparison and Selection among Alternatives 264**

6.1	Introduction	265
6.2	Basic Concepts for Comparing Alternatives	265
6.3	The Study (Analysis) Period	269
6.4	Useful Lives Are Equal to the Study Period	271
6.5	Useful Lives Are Unequal among the Alternatives	288
6.6	Personal Finances	301
6.7	Case Study—Ned and Larry’s Ice Cream Company	305
6.8	Postevaluation of Results	308
6.9	Project Postevaluation Spreadsheet Approach	308
6.10	Try Your Skills	311
6.11	Summary	315

**CHAPTER 7****Depreciation and Income Taxes 332**

7.1	Introduction	333
7.2	Depreciation Concepts and Terminology	333
7.3	The Classical (Historical) Depreciation Methods	336
7.4	The Modified Accelerated Cost Recovery System	341
7.5	A Comprehensive Depreciation Example	350
7.6	Introduction to Income Taxes	354
7.7	The Effective (Marginal) Corporate Income Tax Rate	357
7.8	Gain (Loss) on the Disposal of an Asset	360
7.9	General Procedure for Making After-Tax Economic Analyses	361
7.10	Illustration of Computations of ATCFs	365
7.11	Economic Value Added	377
7.12	Try Your Skills	379
7.13	Summary	380

**CHAPTER 8****Price Changes and Exchange Rates 392**

8.1	Introduction	393
8.2	Terminology and Basic Concepts	394
8.3	Fixed and Responsive Annuities	400
8.4	Differential Price Changes	405
8.5	Spreadsheet Application	407
8.6	Foreign Exchange Rates and Purchasing Power Concepts	409
8.7	Case Study—Selecting Electric Motors to Power an Assembly Line	414
8.8	Try Your Skills	417
8.9	Summary	418

**CHAPTER 9****Replacement Analysis 427**

---

9.1	Introduction	428
9.2	Reasons for Replacement Analysis	428
9.3	Factors that Must Be Considered in Replacement Studies	429
9.4	Typical Replacement Problems	432
9.5	Determining the Economic Life of a New Asset (Challenger)	435
9.6	Determining the Economic Life of a Defender	439
9.7	Comparisons in Which the Defender's Useful Life Differs from that of the Challenger	442
9.8	Retirement without Replacement (Abandonment)	445
9.9	After-Tax Replacement Studies	446
9.10	Case Study—Replacement of a Hospital's Emergency Electrical Supply System	454
9.11	Summary	457

**CHAPTER 10****Evaluating Projects with the Benefit–Cost Ratio Method 467**

---

10.1	Introduction	468
10.2	Perspective and Terminology for Analyzing Public Projects	469
10.3	Self-Liquidating Projects	470
10.4	Multiple-Purpose Projects	470
10.5	Difficulties in Evaluating Public-Sector Projects	473
10.6	What Interest Rate Should Be Used for Public Projects?	474
10.7	The Benefit–Cost Ratio Method	476
10.8	Evaluating Independent Projects by B–C Ratios	482
10.9	Comparison of Mutually Exclusive Projects by B–C Ratios	484
10.10	Case Study—Improving a Railroad Crossing	489
10.11	Summary	491

**CHAPTER 11****Breakeven and Sensitivity Analysis 499**

---

11.1	Introduction	500
11.2	Breakeven Analysis	500
11.3	Sensitivity Analysis	507
11.4	Multiple Factor Sensitivity Analysis	513
11.5	Summary	517

<b>CHAPTER 12</b>		
<b>Probabilistic Risk Analysis</b>		<b>526</b>
12.1	Introduction	527
12.2	Sources of Uncertainty	528
12.3	The Distribution of Random Variables	528
12.4	Evaluation of Projects with Discrete Random Variables	532
12.5	Evaluation of Projects with Continuous Random Variables	541
12.6	Evaluation of Risk and Uncertainty by Monte Carlo Simulation	546
12.7	Performing Monte Carlo Simulation with a Computer	550
12.8	Decision Trees	554
12.9	Real Options Analysis	559
12.10	Summary	562
<b>CHAPTER 13</b>		
<b>The Capital Budgeting Process</b>		<b>570</b>
13.1	Introduction	571
13.2	Debt Capital	573
13.3	Equity Capital	574
13.4	The Weighted Average Cost of Capital (WACC)	577
13.5	Project Selection	581
13.6	Postmortem Review	585
13.7	Budgeting of Capital Investments and Management Perspective	586
13.8	Leasing Decisions	587
13.9	Capital Allocation	589
13.10	Summary	595
<b>CHAPTER 14</b>		
<b>Decision Making Considering Multiattributes</b>		<b>599</b>
14.1	Introduction	600
14.2	Examples of Multiattribute Decisions	600
14.3	Choice of Attributes	602
14.4	Selection of a Measurement Scale	602
14.5	Dimensionality of the Problem	603
14.6	Noncompensatory Models	603
14.7	Compensatory Models	608
14.8	Summary	616

Appendix A	Using Excel to Solve Engineering Economy Problems	622
Appendix B	Abbreviations and Notation	639
Appendix C	Interest and Annuity Tables for Discrete Compounding	643
Appendix D	Interest and Annuity Tables for Continuous Compounding	662
Appendix E	Standard Normal Distribution	666
Appendix F	Selected References	669
Appendix G	Solutions to Try Your Skills	672
<b>Index</b>		<b>684</b>
