

CONTENTS

James Monroe Gere ix

Preface to the SI Edition xi

Symbols xviii

Greek Alphabet xx

1. TENSION, COMPRESSION, AND SHEAR 2

1.1 Introduction to Mechanics of Materials 4

1.2 Statics Review 6

1.3 Normal Stress and Strain 27

1.4 Mechanical Properties of Materials 37

1.5 Elasticity, Plasticity, and Creep 45

1.6 Linear Elasticity, Hooke's Law, and Poisson's Ratio 52

1.7 Shear Stress and Strain 57

1.8 Allowable Stresses and Allowable Loads 68

1.9 Design for Axial Loads and Direct Shear 74

Chapter Summary & Review 80

Problems 83

2. AXIALLY LOADED MEMBERS 122

2.1 Introduction 124

2.2 Changes in Lengths of Axially Loaded Members 124

2.3 Changes in Lengths Under Nonuniform Conditions 134

2.4 Statically Indeterminate Structures 142

2.5 Thermal Effects, Misfits, and Prestrains 153

2.6 Stresses on Inclined Sections 168

2.7 Strain Energy 180

*2.8 Impact Loading 191

*2.9 Repeated Loading and Fatigue 199

*2.10 Stress Concentrations 201

*2.11 Nonlinear Behavior 209

*2.12 Elastoplastic Analysis 214

Chapter Summary & Review 220

Problems 222

3. TORSION 262

3.1 Introduction 264

3.2 Torsional Deformations of a Circular Bar 265

3.3 Circular Bars of Linearly Elastic Materials 268

3.4 Nonuniform Torsion 280

3.5 Stresses and Strains in Pure Shear 291

3.6 Relationship Between Moduli of Elasticity E and G 298

3.7 Transmission of Power by Circular Shafts 299

3.8 Statically Indeterminate Torsional Members 304

3.9 Strain Energy in Torsion and Pure Shear 308

3.10 Torsion of Noncircular Prismatic Shafts 315

3.11 Thin-Walled Tubes 324

*3.12 Stress Concentrations in Torsion 332

Chapter Summary & Review 336

Problems 338

4. SHEAR FORCES AND BENDING MOMENTS 364

4.1 Introduction 366

4.2 Types of Beams, Loads, and Reactions 366

4.3 Shear Forces and Bending Moments 373

4.4 Relationships Between Loads, Shear Forces, and Bending Moments 383

4.5 Shear-Force and Bending-Moment Diagrams 387

Chapter Summary & Review 400

Problems 402

5. STRESSES IN BEAMS (BASIC TOPICS) 416

5.1 Introduction 418

5.2 Pure Bending and Nonuniform Bending 418

5.3 Curvature of a Beam 419

5.4 Longitudinal Strains in Beams	421	7.7 Plane Strain	653
5.5 Normal Stresses in Beams (Linearly Elastic Materials)	426	Chapter Summary & Review	668
5.6 Design of Beams for Bending Stresses	440	Problems	672
5.7 Nonprismatic Beams	449	8. APPLICATIONS OF PLANE STRESS (PRESSURE VESSELS, BEAMS, AND COMBINED LOADINGS)	692
5.8 Shear Stresses in Beams of Rectangular Cross Section	453	8.1 Introduction	694
5.9 Shear Stresses in Beams of Circular Cross Section	462	8.2 Spherical Pressure Vessels	694
5.10 Shear Stresses in the Webs of Beams with Flanges	465	8.3 Cylindrical Pressure Vessels	700
*5.11 Built-Up Beams and Shear Flow	472	8.4 Maximum Stresses in Beams	707
*5.12 Beams with Axial Loads	476	8.5 Combined Loadings	716
*5.13 Stress Concentrations in Bending	482	Chapter Summary & Review	734
Chapter Summary & Review	486	Problems	736
Problems	490	9. DEFLECTIONS OF BEAMS	754
6. STRESSES IN BEAMS (ADVANCED TOPICS)	524	9.1 Introduction	756
6.1 Introduction	526	9.2 Differential Equations of the Deflection Curve	756
6.2 Composite Beams	526	9.3 Deflections by Integration of the Bending-Moment Equation	761
6.3 Transformed-Section Method	535	9.4 Deflections by Integration of the Shear-Force and Load Equations	772
6.4 Doubly Symmetric Beams with Inclined Loads	544	9.5 Method of Superposition	778
6.5 Bending of Unsymmetric Beams	551	9.6 Moment-Area Method	786
6.6 The Shear-Center Concept	559	9.7 Nonprismatic Beams	795
6.7 Shear Stresses in Beams of Thin-Walled Open Cross Sections	561	9.8 Strain Energy of Bending	800
6.8 Shear Stresses in Wide-Flange Beams	564	*9.9 Castigliano's Theorem	805
6.9 Shear Centers of Thin-Walled Open Sections	568	*9.10 Deflections Produced by Impact	817
*6.10 Elastoplastic Bending	576	*9.11 Temperature Effects	819
Chapter Summary & Review	584	Chapter Summary & Review	824
Problems	587	Problems	826
7. ANALYSIS OF STRESS AND STRAIN	608	10. STATICALLY INDETERMINATE BEAMS	848
7.1 Introduction	610	10.1 Introduction	850
7.2 Plane Stress	610	10.2 Types of Statically Indeterminate Beams	850
7.3 Principal Stresses and Maximum Shear Stresses	618	10.3 Analysis by the Differential Equations of the Deflection Curve	853
7.4 Mohr's Circle for Plane Stress	627	10.4 Method of Superposition	860
7.5 Hooke's Law for Plane Stress	643	*10.5 Temperature Effects	873
7.6 Triaxial Stress	649	*10.6 Longitudinal Displacements at the Ends of a Beam	881
		Chapter Summary & Review	884
		Problems	886

11. COLUMNS 900

- 11.1 Introduction 902
- 11.2 Buckling and Stability 902
- 11.3 Columns with Pinned Ends 910
- 11.4 Columns with Other Support Conditions 921
- 11.5 Columns with Eccentric Axial Loads 931
- 11.6 The Secant Formula for Columns 936
- 11.7 Elastic and Inelastic Column Behavior 941
- 11.8 Inelastic Buckling 943
 - Chapter Summary & Review 950
 - Problems 952

12. REVIEW OF CENTROIDS AND MOMENTS OF INERTIA 968

- 12.1 Introduction 970
- 12.2 Centroids of Plane Areas 970
- 12.3 Centroids of Composite Areas 973
- 12.4 Moments of Inertia of Plane Areas 976
- 12.5 Parallel-Axis Theorem for Moments of Inertia 979
- 12.6 Polar Moments of Inertia 983
- 12.7 Products of Inertia 985
- 12.8 Rotation of Axes 988
- 12.9 Principal Axes and Principal Moments of Inertia 990
 - Problems 994
