Sterility 10 Endotoxins and Pyrogens 11 Infection and Contamination 11	Chapter 4	Microbiological Considerations in Parenteral		
Endotoxins and Pyrogens 11 Infection and Contamination 11		Compounding	<u>107</u>	
Infection and Contamination 11		Sterility	109	
		Endotoxins and Pyrogens	110	
Influences on Contamination 11		Infection and Contamination	112	
		Influences on Contamination	116	
Particulate Matter 12		Particulate Matter	124	
ISO Classification of Particulate Matter 12		ISO Classification of Particulate Matter	126	
Microbial Contamination Risk Levels 12		Microbial Contamination Risk Levels	127	
Immediate-Use Sterile Preparations 12		Immediate-Use Sterile Preparations	128	
Disinfectants and Antiseptics 13		Disinfectants and Antiseptics	131	
Preventing Contamination 13		Preventing Contamination	134	

Chapter 5	Primary and Secondary Engineering Controls	141
	Primary Engineering Controls	143
	Secondary Engineering Controls	164
Chapter 6	Aseptic Technique and Compounding	
The second secon	Manipulations	<u>175</u>
	Factors in Compounding a Sterile Preparation	176
	Aseptic Technique	185
	Reconstituting Medications for Parenteral	
	Administration	206
	Recapping Needles	208
	Capping a Syringe	209
	Priming an Infusion Set	210
	Vial Pressures	211
	Labeling	214
	Batch Compounding	217
	Workflow Process	218
Chapter 7	Principles of Compatibility and Stability	225
	Stability	226
	Incompatibility	227
	Factors Affecting Stability and Compatibility	236
	Calcium Phosphate Incompatibility	240
	Preventing Incompatibility	245
	Identifying Incompatibilities	249
	Beyond-Use Dates and Expiration Dates	250
Chapter 8	Preparation of Hazardous Drugs for	
	Parenteral Use	263
	Hazardous Drugs and Exposure Risks	265
	Environment Control	267

	Primary Engineering Controls for Compounding	
	Hazardous Drugs	269
	Personal Protective Equipment	271
	Compounding Sterile Hazardous Agents	275
	Cleaning, Disinfection, and Decontamination	277
	Chemotherapy Spills	279
	Proper Disposal of Hazardous Drugs	281
	Patient Safety: Policy and Procedure for Ordering Hazardous Drugs	282
	Personnel Education and Training for Hazardous	
	Compounding	283
	Patient or Caregiver Training	284
Chapter 9	Multiple Product Preparations for Parenteral	
W. A. ophillis	Nutrition	<u> 289</u>
	Advantages and Disadvantages of the 2-in-1 System	291
	Advantages and Disadvantages of the 3-in-1 System	293
	Peripheral Parenteral Nutrition	295
	Aluminum Contamination	296
	Parenteral Nutrition Preparation Methods	297
	Labeling Parenteral Nutrition Formulations	300
	Quality Assurance for PN Compounding	302
	Compatibility and Stability of PN Formulations	305
	Storage and Use of PN Admixtures	307
Chapter 10	Considerations for Intravenous Drug Therapy	
-19-sec-sec-770-sec-sec-170-sec-sec-170-sec-sec-170-sec-sec-170-sec-17	in Infants and Children	313
	Dilutions	314
	Standard Concentrations	317
	Additive/Contaminant Toxicity	320
	Intravenous Access Limitations	324
	Drug Volume and Infusion Rate Limitations	329
	Dead Space	331

	Infusion Devices and Drug Preparation	332
	Medication Safety Issues	334
Chapter 11	Quality Assurance and Quality Control for Sterile Compounding	
	Elements of Quality Assurance and Quality Control	348
	Education and Training	350
	Regulatory Agencies and Accreditation	
	Organizations	351
	Major Tenets of Quality	351
	Facility Control	353
	Certification of Sterile Compounding Facilities	356
	Policies and Procedures	357
	Cleaning the Sterile Compounding Area	358
	Personnel Monitoring	359
	Labeling	363
	End-Product Testing	364
	Documentation of Elements of the Quality Plan	366
	Glossary	371
	Index	381
