List of Figures and Tables	ix
Foreword	xi
<i>Malcolm Nicolson</i>	
Acknowledgments	xiv
About the Authors	xvii
Introduction	1
Purpose of the Book	1
Audiences	2
Chapter Overview	2
1. Curriculum Design: From an Objectives-Based to a Concept-Based Model	6
A Short Retrospective, From the Authors, on Educational Swings	7
The Value of Know, Understand, and Able to Do in Concept-Based Models	11
Teachers	11
Students	12
Administrators	12
Parents	13
Problems With Traditional Content Objectives	16
Discussion Questions	20
Summary	21
2. Two-Dimensional Versus Three-Dimensional Curriculum Models	22
Contrasting the Two-Dimensional and Three-Dimensional Models	22
Introducing the Structures of Knowledge and Process	24
The Interplay of Process and Knowledge	26

Contrasting Instructional Descriptions	27
Discussion Questions	30
Summary	31
3. The Structure of Knowledge	32
Understanding the Relationships in the Structure of Knowledge	32
How the Structure of Knowledge Guides Curriculum Design	35
Designing Disciplinary Curriculum Frameworks at the National, State, or Local Levels	36
Mathematics as a Concept-Driven Discipline	40
Examples of Concepts and Subject-Specific Generalizations	40
Discussion Questions	43
Summary	43
4. The Structure of Process	44
The Structure of Process	44
How the Structure of Process Guides Curriculum and Instruction	49
Discussion Questions	51
Summary	51
5. The Developing Concept-Based Teacher	52
Bridging the Gaps Between Knowing, Doing, and Understanding	52
Collaborative Concept-Based Lesson Planning	53
Common Terminology Used to Describe Quality Instruction	54
Lesson Attributes That Support Meeting the Needs of All Learners	54
Instructional Strategies/Techniques	56
Lesson Design	56
The Developing Concept-Based Teacher	57
Do <i>The Developing Concept-Based Teacher</i> Rubrics Have a Place in Teacher Evaluation Plans?	60
Discussion Questions	71
Summary	72
6. The Developing Concept-Based Student	73
What About Thinking?	73
The Relationship Between Critical Thinking and Concept-Based Teaching and Learning	74
Developing Critical Thinking	74

The Developing Concept-Based Student	76
Why These Categories?	78
Discussion Questions	81
Summary	81
7. What Do Teachers Need to Understand About Concept-Based Pedagogy?	82
The What and Why of Concept-Based Curriculum and Instruction	82
The How of Concept-Based Curriculum and Instruction	83
Concept-Based Units: Interdisciplinary and Intradisciplinary	83
Assessing for Deep Understanding	87
Four Critical Aspects of Concept-Based Pedagogy	95
1. Synergistic Thinking	96
2. The Conceptual Lens	98
3. Inductive Versus Deductive Teaching	99
4. Guiding Questions	101
Quality Pedagogy	103
Concept-Based Classrooms	104
Discussion Questions	107
Summary	108
8. What Do Principals and Instructional Coaches Need to Understand? Implementing and Sustaining Concept-Based Curricular and Instructional Models in Schools	109
Setting the Stage for Curriculum Implementation	110
Staff Development	111
Staff Support with Accountability: Building System-Wide Synergy	113
The Collection and Analysis of the “Right” Data	115
Discussion Questions	116
Summary	116
9. What Do District Leaders Need to Understand About Concept-Based Curriculum Designs?	118
District Leaders Discuss Concept-Based Curriculum and Instruction	119
Discussion Questions	128
Summary	128

10. Summary and the Road Ahead	130
Curriculum and Instruction: The Warp	130
Concept-Based Learning: The Weft	131
The Path Forward	132
Discussion Questions	133
Resources	135
Resource A. Concept-Based Mathematics Unit	137
Resource B. Concept-Based Science Unit	149
Resource C. Concept-Based Art Unit	163
Resource D. Concept-Based World Language Unit	172
Resource E. Concept-Based Music Unit	181
Resource F. Adapted Learning Activities for Chapter 7	191
References	193
Index	196
