<b>PREFACE</b> .....	xiii
<b>ACKNOWLEDGEMENTS</b> .....	xv
<b>CHAPTER 1 Introduction</b> .....	1
<b>1.1</b> Historical Review of Communications.....	1
<b>1.2</b> Block Diagram of a Digital Communication System .....	5
<b>1.3</b> Organization of the Book .....	8
References.....	10
<b>CHAPTER 2 Fundamental Aspects of Digital Communications</b> .....	11
Introduction.....	11
<b>2.1</b> Why Digital?.....	12
<b>2.2</b> Communications Modalities .....	15
<b>2.3</b> Communication Network Models .....	18
<b>2.4</b> Guided-Transmission Media.....	23
<b>2.5</b> Radio Transmission.....	26
<b>2.6</b> Transmission Impairments.....	31
<b>2.7</b> Modulation Process .....	34
<b>2.8</b> Fundamental limits in Digital Transmission.....	37
<b>2.9</b> Digital Communication Design Aspects .....	37
Summary and Sources .....	39
<b>CHAPTER 3 Signals, Systems, and Spectral Analysis</b> .....	41
Introduction.....	41
<b>3.1</b> Basic Operations on Signals.....	42
<b>3.2</b> Classification of Signals.....	49
<b>3.3</b> Classification of Systems.....	57
<b>3.4</b> Sinusoidal Signals .....	65
<b>3.5</b> Elementary Signals .....	71
<b>3.6</b> Fourier Series .....	78

	<b>3.7</b>	Fourier Transform.....	88
	<b>3.8</b>	Time and Frequency Relations.....	116
	<b>3.9</b>	Signal Transmssion Through Systems.....	120
	<b>3.10</b>	Communication Filters .....	131
	<b>3.11</b>	Spectral Density and Autocorrelation Functions..	136
	<b>3.12</b>	Lowpass and Bandpass Signals .....	140
		Summary and Sources .....	144
		Problems.....	145
		Computer Exercises .....	149
<b>CHAPTER 4</b>	<b>Probability, Random Variables, and Random Processes</b> .....		151
	Introduction.....		151
	<b>4.1</b> Probability .....		152
	<b>4.2</b> Random Variables .....		160
	<b>4.3</b> Random Processes .....		184
	Summary and Sources .....		204
	Problems.....		205
	Computer Exercises .....		216
<b>CHAPTER 5</b>	<b>Analog-to-Digital Conversion</b> .....		217
	Introduction.....		217
	<b>5.1</b> Sampling Process .....		218
	<b>5.2</b> Quantization Process .....		236
	<b>5.3</b> Digital Pulse Modulation.....		246
	<b>5.4</b> Line Codes.....		256
	Summary and Sources .....		260
	Problems.....		261
	Computer Exercises .....		264
<b>CHAPTER 6</b>	<b>Baseband Digital Transmission</b> .....		265
	Introduction.....		265
	<b>6.1</b> Baseband Binary PAM Transmission		
	System Model.....		266
	<b>6.2</b> Intersymbol Interference .....		268
	<b>6.3</b> Optimum System Design for Noise Immunity.....		277
	<b>6.4</b> Baseband M-ary Signaling Schemes.....		282
	<b>6.5</b> Equalization .....		286
	Summary and Sources .....		293
	Problems.....		294
	Computer Exercises .....		297

<b>CHAPTER 7</b>	<b>Passband Digital Transmission</b> .....	299
	Introduction.....	299
	<b>7.1</b> Optimum Receiver Principles .....	300
	<b>7.2</b> Binary Digital Modulation Schemes .....	316
	<b>7.3</b> Coherent Quaternary Signaling Schemes .....	328
	<b>7.4</b> <i>M</i> -ary Coherent Modulation Techniques .....	337
	<b>7.5</b> Orthogonal Frequency-Division Multiplexing .....	350
	Summary and Sources .....	352
	Problems.....	353
	Computer Exercises .....	355
<b>CHAPTER 8</b>	<b>Synchronization</b> .....	357
	Introduction.....	357
	<b>8.1</b> Synchronization Levels .....	358
	<b>8.2</b> Scrambling .....	359
	<b>8.3</b> Phase-Locked Loop (PLL).....	363
	<b>8.4</b> Carrier Recovery .....	368
	<b>8.5</b> Symbol Synchronization.....	370
	Summary and Sources .....	374
	Problems.....	374
	Computer Exercises .....	375
<b>CHAPTER 9</b>	<b>Information Theory</b> .....	377
	Introduction.....	377
	<b>9.1</b> Measure of Information .....	378
	<b>9.2</b> Classification of Source Codes .....	384
	<b>9.3</b> Source Coding Theorem .....	388
	<b>9.4</b> Lossless Data Compression .....	391
	<b>9.5</b> Discrete Memoryless Channels .....	397
	<b>9.6</b> Channel-Coding Theorem.....	400
	<b>9.7</b> Gaussian Channel Capacity Theorem.....	401
	Summary and Sources .....	404
	Problems.....	405
	Computer Exercises .....	408
<b>CHAPTER 10</b>	<b>Error-Control Coding</b> .....	409
	Introduction.....	409
	<b>10.1</b> Errors .....	410
	<b>10.2</b> Error-Detection Methods.....	414
	<b>10.3</b> Automatic Repeat Request (ARQ).....	421

10.4	Block Codes.....	426
10.5	Convolutional Codes .....	435
10.6	Compound Codes .....	444
	Summary and Sources .....	453
	Problems.....	454
	Computer Exercises .....	455
<b>CHAPTER 11</b>	<b>Communication Networks .....</b>	<b>457</b>
	Introduction.....	457
11.1	Multiplexing .....	458
11.2	Duplexing.....	461
11.3	Multiple Access .....	464
11.4	Random Access.....	468
11.5	Controlled Access .....	473
11.6	Wired Communication Networks.....	474
11.7	Network Security and Cryptography .....	485
	Summary and Sources .....	490
	Problems.....	491
<b>CHAPTER 12</b>	<b>Wireless Communications .....</b>	<b>493</b>
	Introduction.....	493
12.1	Radio-link analysis.....	494
12.2	Frequency Reuse .....	498
12.3	Mobile-Radio Propagation Characteristics .....	504
12.4	Diversity.....	511
12.5	Diversity-Combining Methods.....	515
12.6	Emerging Wireless Communication Systems.....	517
	Summary and Sources .....	525
	Problems.....	526
<b>APPENDIX</b>	<b>Analog Continuous-Wave Modulation .....</b>	<b>529</b>
	Introduction.....	529
A.1	Analog Continuous-Wave (CW) Modulation.....	530
A.2	Amplitude Modulation .....	532
A.3	Frequency Modulation .....	550
A.4	Amplitude Nonlinearity in Analog CW Modulation .....	556
A.5	Noise in Analog CW Modulation .....	558
A.6	Commercial Radio Broadcasting .....	563
A.7	Comparison of Analog CW Modulation Schemes .....	567

Summary and Sources .....	568
Problems.....	568
Computer Exercises .....	571
<b>LIST OF ACRONYMS AND ABBREVIATIONS .....</b>	<b>573</b>
<b>INDEX.....</b>	<b>579</b>
