

Contents

SECTION 1 BIOLOGICAL CONSIDERATIONS OF THE OCCLUSION

1. Interarch relationships of teeth 3
I. Klineberg
2. Jaw movement and its control 13
G. Murray
3. Growth and development 23
J. Knox
4. Anatomy and pathophysiology of the temporomandibular joint 31
S. Palla

SECTION 2 ASSESSMENT OF THE OCCLUSION

5. Clinical occlusal analysis 45
I. Klineberg
6. Articulators and evaluation of study casts 55
R. Jagger

SECTION 3 CLINICAL PRACTICE AND THE OCCLUSION

7. Temporomandibular joint disorders 67
G. Carlsson
8. Jaw muscle disorders 75
M. Bakke
9. Occlusion and periodontal health 83
J. De Boever, A. De Boever
10. Occlusion and orthodontics 91
A. Darendelilar, O. Kharbanda
11. Occlusion and fixed prosthodontics 103
T. Walton
12. Occlusion and removable prosthodontics 111
R. Jagger
13. Occlusion and implant restoration 119
J. Hobkirk
14. Occlusal splints and management of the occlusion 125
T. Wilkinson
15. The role of occlusal adjustment 133
A. Au, I Klineberg
