Preface.....	xxxi
Acknowledgments	xxxv
Author.....	xxxvii
1. The Safety Profession and Preparing for the ASP/CSP Exam	1
Board of Certified Safety Professionals	1
Definitions.....	2
Minimum Qualifications to Sit for the CSP Examination.....	3
Academic Requirements	4
Professional Safety Experience Requirements	4
ASP Process	4
CSP Process.....	5
Safety Fundamentals Examination Blueprint	5
Comprehensive Practice Examination Blueprint	8
Preparing for the ASP/CSP Examinations	10
Knowing Your Strengths and Weaknesses.....	10
Developing an Examination Preparation Plan	11
References and Resources.....	11
Test-Taking Strategy.....	12
2. Regulations	15
Occupational Safety and Health Act.....	15
Who Is Covered under the Occupational Safety and Health Act?	16
Horizontal and Vertical Standards.....	16
General Duty Clause	16
Employer Rights and Responsibilities	16
Employee Rights and Responsibilities.....	17
Communications and Correspondence with OSHA	17
OSHA Inspections and Process	17
OSHA Citations.....	19
OSHA Citation Penalties.....	19
Appeals.....	20
Employee Appeals.....	20
Employer Appeals	20
Petition for Modification of Abatement	21
Notice of Contest.....	21
Review Procedure	22
Hazard Communication Standard (29 CFR 1910.1200).....	22
Purpose.....	22
Scope and Application.....	23

Written Hazard Communication Standard	23
Label and Other Forms of Warning	24
Safety Data Sheets.....	24
Employee Information and Training	25
Training	25
Bloodborne Pathogen Standard (29 CFR 1910.1030)	25
Scope, Application, and Definitions	25
Exposure Control Plan	26
Hepatitis B Vaccination and Postexposure Follow-Up	26
Communication of Hazards	26
Record Keeping	27
Medical Records	27
Training Records	27
Control of Hazardous Energy Standard (29 CFR 1910.147).....	27
Scope, Application and Purpose.....	27
Definitions.....	28
Energy Control Program.....	29
Periodic Inspection	29
Training and Communication.....	30
Confined Space Entry Standard (29 CFR 1910.146).....	30
Scope and Application.....	30
Definitions.....	30
General Requirements.....	32
Confined Space Entry Program	32
Entry Permits	32
Training	33
Personal Protective Equipment (29 CFR 1910.132).....	33
Application.....	33
Employee-Owned Equipment.....	33
Hazard Assessment and Equipment Selection.....	33
Training	34
Respiratory Protection Standard (29 CFR 1910.134)	34
Purpose.....	34
Definitions.....	35
Respiratory Protection Program	35
Training and Information	36
Fall Protection Standard (29 CFR 1926.500–503) (Subpart M).....	36
Scope and Application.....	36
Definitions.....	37
Duty to Have Fall Protection	38
Training	38
Record Keeping.....	39
OSHA 300, 300-A, and 301 Forms (29 CFR 1910.29)	39
Annual Summary	40
Providing Records to Government Representatives	40

Reporting Fatalities and Multiple Hospitalizations (29 CFR 1904.39)...	40
Determining Recordable Injuries or Illnesses	40
Calculating Total Case Incident Rates	41
Calculating Days Away, Restricted, or Transfer Rates	42
Calculating Severity Rates	42
Key Information to Remember on Regulations	43
Comparison of Health Hazards.....	107
General Comments	107
Comparison of Physical Hazards	126
Comparison of OSHA HCS and GHS Criteria	126
Comparison of Label Elements	149
General Comments	149
GHS and Transport Pictograms.....	152
General Comments	152
Physical and Environmental Hazard Symbols.....	153
Label Examples.....	154
Comparison of MSDS Elements.....	157
General Comments	157
3. Math Review.....	169
Order of Operations	169
PEMDAS: "Please Excuse My Dear Aunt Sally"	169
Basic Rules of Positive and Negative Numbers.....	170
Understanding Exponents.....	170
Scientific Notation.....	171
Multiplication and Division Using Scientific Notation	171
Engineering Notation.....	172
Absolute Values.....	173
Logarithms.....	173
Formula or Equation Transpositions	174
Factorials	175
Common Geometric Equations	176
Pythagorean Equation.....	176
Basic Trigonometric Functions.....	177
Sine.....	177
Cosine	178
Tangent	179
Arcsine, Arccosine, and Arctangent.....	179
Quadratic Equation.....	181
Calculator.....	182
Summary.....	182
4. Particulates and Gases.....	183
Periodic Table of the Elements	183
Atomic Number.....	183

Atomic Mass	183
Atoms.....	184
Chemical Bonding	185
Moles.....	186
Molecules and Compounds.....	186
Mixtures	186
Chemical Formulas.....	187
Atomic Weight of Compounds.....	187
Percentage of Element in a Compound (by Weight)	188
Acids, Bases, and pH's	188
Gas Laws	189
Boyle's Law	189
Charles' Law	190
Ideal Gas Law	190
Conversion Factors for Converting Pressure Units to Atmospheric Pressure Units	191
Conversion Factors for Converting Units of Volume to Liters.....	191
Converting Grams to Moles.....	191
Universal Gas Constant.....	192
Combined Gas Law	193
Concentrations of Vapors, Gases, and Particulates	193
Standard Temperature and Pressure	194
Standards and Regulations	194
Time-Weighted Average.....	194
Calculating PELs/TLVs for Periods Greater than 8 h	195
Gaseous Mixtures	196
Liquid Mixtures	197
Percentage of TLV Mixture	197
Calculating PEL/TLV for Silica.....	198
Converting mg/m^3 to ppm	198
Converting ppm to mg/m^3	199
Lower Flammability Limit of Mixtures.....	199
Referenced Equations.....	200
Boyle's Law	200
Charles' Law	200
Ideal Gas Law	201
Combined Gas Law	201
Time-Weighted Average.....	201
Calculating PELs/TLVs for Periods Greater than 8 h	201
Gaseous Mixtures	201
Liquid Mixtures	202
Percentage of TLV for Mixtures	202
Calculating PEL/TLV for Silica.....	202
Converting mg/m^3 to ppm	202
Converting ppm to mg/m^3	203

LFLs of Mixtures	203
Key Information to Remember on Particulates and Gases.....	203
Reference	204
5. Toxicology	205
Definitions.....	205
Routes of Entry	206
Inhalation	206
Ingestion	207
Absorption	207
Percutaneous and Intravenous Injections	208
Dose–Response Relationship	208
Exposures to Chemical Combinations	209
Stages of Cancer	210
Initiation	210
Latency Period	210
Promotion.....	210
Progression.....	210
Types of Poisons.....	210
Ames Testing	211
Cohort Study.....	211
Advantages	211
Disadvantages	211
Case–Control Study.....	211
Cross-Sectional Study	212
Common Occupational Diseases and Disorders Caused by a Contributing Agent or Substance	212
Asbestosis and Asbestos-Related Illnesses	212
Brucellosis	213
Benzene-Related Illnesses.....	213
Byssinosis	213
Arsenic-Related Illnesses	214
Berylliosis and Beryllium-Related Illnesses.....	214
Copper-Related Illnesses	215
Cadmium-Related Illnesses.....	215
Chromium-Related Illnesses	216
Coal Dust–Related Illnesses	216
Cobalt-Related Illnesses	217
Acute Exposure	217
Chronic Exposure.....	217
Formaldehyde-Related Illnesses	217
Lead-Related Illnesses	218
Manganese-Related Illnesses	219
Mercury-Related Illnesses	220
Pneumoconiosis	220

Silica-Related Illnesses	221
Zinc-Related Illnesses	221
Aluminum-Related Illnesses	222
Antimony-Related Illnesses	222
Dust-Related Illnesses	223
Common Environments for Contracting Dust-Related Illnesses ...	223
Thallium-Related Illnesses	224
Pesticide-Related Illnesses	224
Key Information to Remember on Toxicology	225
References	225
6. Industrial Hygiene Air Sampling	227
Anticipation of Hazards	227
Recognition of Hazards	228
Evaluation of Hazards	228
Control of Hazards	228
Definitions	228
Air Sampling	229
Sampling Methodology	230
Equipment Selection	230
Air Sampling Pumps	230
Piston and Bellows Air Pumps	231
Direct-Reading Instruments	231
Cyclones	232
Sampling Media	232
Filters	232
Sorbent Tubes	233
Sample Collection Bags or Canisters	234
Passive Samplers	234
Sampling Pump Calibration	234
Determining Minimum and Maximum Sample Volumes	237
Determining the Minimum Number of Samples to Collect	238
The Sampling Process	238
Industrial Hygiene Sampling and Record-Keeping Procedures	241
Spiramid	243
Medgate	243
ProcessMAP	243
Key Information to Remember on Industrial Hygiene Air Sampling ..	244
References	245
7. Ventilation	247
Purpose for Using Ventilation	247
Types and Selection of Ventilation	247
General Ventilation	248
Dilution Ventilation	248

Local (Exhaust) Ventilation.....	248
General Concepts of Ventilation Notes.....	248
Principles of Air Movement	249
Calculating for Volumetric Air Flow	249
Calculating Static Pressure, Velocity Pressure, and Total Pressure.....	249
Calculating Velocity of Air	250
Contaminant Generation	250
Calculating Purge Rates.....	252
Steady-State Concentration.....	254
Calculating Rate of Generation for Liquid Solvents	254
Calculating Vapor or Gaseous Concentrations.....	255
Calculating Room Air Changes.....	256
Calculating Concentration of a Contaminant with Dilution Ventilation	257
Local Exhaust Ventilation.....	257
Canopy Hood.....	258
Down Draft Hood	258
Enclosure Hood	258
Receiving Hood	258
Openings.....	258
Calculating Hood Entry Losses	259
Calculating Airflow Velocity.....	261
Calculating Capture Velocity for Plain Opening Hood	261
Ducts	262
Fans	263
Calculating Static Pressure of the Fan (SP_h)	263
Air-Cleaning Devices.....	263
Ventilation Measurement Equipment	264
Pitot Tubes	264
Rotating Vane Anemometers.....	264
Thermal Anemometers.....	264
Key Information to Remember on Ventilation	264
Reference	265
8. Noise and Hearing Conservation Program.....	267
OSHA's Hearing Conservation Program.....	267
Who Is Included in the Hearing Conservation Program?	267
Monitoring	268
Sound Measuring Instruments.....	268
Employee Notification	268
Audiometric Testing	268
Standard Threshold Shift.....	269
Training Program.....	269
Record Keeping	269
Noise-Related Definitions.....	270

Noise	270
Continuous Noise	270
Intermittent Noise.....	270
Sound	270
Frequency (f)	270
Period	271
Speed or Velocity of Sound (c).....	271
Wavelength (λ)	271
Anatomy and Physiology of the Ear	272
Types of Hearing Loss.....	272
Major Causes of Hearing Loss	273
OSHA Permissible Noise Exposures	273
Entities of Noise	274
Sound Power (L_w)	274
Sound Pressure (L_p)	274
Sound Intensity (L_I).....	274
Noise Calculations.....	274
Calculating Permissible Noise Exposures.....	274
Calculating Noise Dosage.....	275
Converting Noise Dosage into TWA.....	276
Combining Noise Levels.....	277
Calculating Sound Levels at Various Distances.....	279
Calculating Sound Power Levels (L_w)	280
Calculating Sound Pressure (L_p) Levels (or SPL).....	280
Calculating Sound Intensity Levels (L_I).....	281
Calculating Room Absorption	281
Calculating Absorption along a Transmission Path.....	282
Key Information to Remember on Noise	283
References	284
9. Biological Hazards	285
Bacterial Diseases	285
Anthrax.....	285
Brucellosis	286
Leptospirosis.....	286
Plague	287
Tetanus.....	287
Tuberculosis	287
Tularemia	288
Cat Scratch Fever (Cat Scratch Disease).....	288
Viral Diseases	289
Hepatitis A	289
Hepatitis B.....	289
Orf (Sore Mouth Disease).....	290
Rabies.....	291

Rickettsial and Chlamydia Diseases.....	292
Psittacosis (Ornithosis)	292
Rocky Mountain Spotted Fever	292
Q Fever.....	293
Fungal Diseases	294
Aspergillosis.....	294
Candidiasis	295
Coccidiomycosis.....	296
Histoplasmosis	296
Biological Safety.....	297
Laboratory Practice and Technique.....	297
Safety Equipment.....	297
Facility Design and Construction.....	299
Biosafety Levels.....	299
Biosafety Level I.....	299
Biosafety Level II.....	299
Biosafety Level III	300
Biosafety Level IV	300
Key Information to Remember on Biological Hazards	300
References	301
10. Fire Protection and Prevention	303
Definitions.....	303
Transfer of Heat.....	304
Heat Transfer by Radiation.....	304
Heat Transfer by Convection.....	304
Heat Transfer by Conduction	305
Fire Tetrahedron.....	305
Classification of Fires	306
Class A Fires	306
Class B Fires	306
Class C Fires.....	306
Class D Fires	306
Class K Fires.....	306
Portable Fire Extinguishers	307
Hydrostatic Testing (Portable Fire Extinguishers)	308
Fire Extinguisher Inspections and Service Requirements.....	309
Automatic Sprinkler Systems.....	309
Dry Pipe Systems	310
Wet Pipe Systems	310
Deluge Systems.....	310
Preaction Systems	311
Water Spray Systems.....	311
Foam Water Sprinkler Systems	311
Fire Hydrants.....	311

Fire Detection	312
Heat Detectors	312
Rate-of-Rise Heat Detectors.....	312
Rate-Compensation Detectors.....	312
Smoke Detectors.....	312
Fire Hydrants.....	313
Flammable and Combustible Liquids.....	313
Flash Point.....	314
Vapor Pressure.....	314
Fire Point	314
Flammable and Explosive Limit Ranges	315
Autoignition Temperature	315
Specific Gravity	315
Vapor Density	315
Evaporation Rate	315
Water Solubility.....	317
Boiling Point	317
Storage Requirements for Flammable and Combustible Liquids....	317
Inside Storage Rooms for Flammable or Combustible Liquids.....	318
Key Information to Remember on Fire Protection and Prevention	318
References	319
11. Thermal Stressors.....	321
Heat Stress.....	321
Sources of Heat Stress	321
Human Body Reaction to Heat	322
Safety-Related Issues of Heat	322
Health-Related Issues of Heat	323
Heat Rash.....	323
Heat Cramps	323
Heat Syncope	323
Dehydration	324
Heat Exhaustion	324
Heat Stroke.....	324
Control Methods	325
Engineering Controls.....	325
Administrative and Work Practice Controls	326
Prevention of Heat Stress Injuries	331
Cold Stress	331
Safety Problems Related to Cold.....	332
Cold-Related Injuries and Illnesses	332
Chilblains	332
Immersion Injuries (Trench Foot)	333
Hypothermia.....	334
Frostbite	334

Wind Chill Factor.....	335
Personal Protective Clothing.....	336
