1	Data-Intensive Computing: A Challenge for the 21st Century	1
	<i>Ian Gorton and Deborah K. Gracio</i>	
2	Anatomy of Data-Intensive Computing Applications	12
	<i>Ian Gorton and Deborah K. Gracio</i>	
3	Hardware Architectures for Data-Intensive Computing Problems: A Case Study for String Matching	24
	<i>Antonino Tumeo, Oreste Villa, and Daniel Chavarría-Miranda</i>	
4	Data Management Architectures	48
	<i>Terence Critchlow, Ghaleb Abdulla, Jacek Becla, Kerstin Kleese-Van Dam, Sam Lang, and Deborah L. McGuinness</i>	
5	Large-Scale Data Management Techniques in Cloud Computing Platforms	85
	<i>Sherif Sakr and Anna Liu</i>	
6	Dimension Reduction for Streaming Data	124
	<i>Chandrika Kamath</i>	
7	Binary Classification with Support Vector Machines	157
	<i>Patrick Nichols, Bobbie-Jo Webb-Robertson, and Christopher Oehmen</i>	
8	Beyond MapReduce: New Requirements for Scalable Data Processing	180
	<i>Bill Howe and Magdalena Balazinska</i>	

9	Let the Data Do the Talking: Hypothesis Discovery from Large-Scale Data Sets in Real Time	235
	<i>Christopher Oehmen, Scott Dowson, Wes Hatley, Justin Almquist, Bobbie-Jo Webb-Robertson, Jason McDermott, Ian Gorton, and Lee Ann McCue</i>	
10	Data-Intensive Visual Analysis for Cyber-Security	258
	<i>William A. Pike, Daniel M. Best, Douglas V. Love, and Shawn J. Bohn</i>	
	<i>Index</i>	287
