

# CONTENTS

Preface to the SI Edition . . . . .	xii
Preface . . . . .	xiii
About the Author . . . . .	xvii

<b>1: INTRODUCTION . . . . .</b>	<b>1</b>
<b>1-1</b> The Importance of Heat and Mass Transfer . . . . .	2
<b>1-2</b> Dimensions and Units in Heat and Mass Transfer . . . . .	8
<b>1-3</b> The Concepts of Heat and Mass Transfer . . . . .	9
<b>1-4</b> The Modes of Heat Transfer . . . . .	23
<b>1-5</b> The Modes of Mass Transfer . . . . .	28
<b>1-6</b> Mathematical Preliminaries . . . . .	30
<b>1-7</b> Engineering Analysis of Heat and Mass Transfer . . . . .	33
<b>1-8</b> Summary . . . . .	33
Discussion Questions . . . . .	34
Class Quiz Questions . . . . .	35
Practice Problems . . . . .	35
References . . . . .	37

<b>2: STEADY STATE CONDUCTION HEAT TRANSFER . . . . .</b>	<b>38</b>
<b>2-1</b> Fourier's Law and Thermal Conductivity . . . . .	40
<b>2-2</b> The General Problem of Conduction Heat Transfer . . . . .	47
<b>2-3</b> Steady State One-Dimensional Conduction Heat Transfer . . . . .	51
<b>2-4</b> Steady State Two-Dimensional Heat Transfer . . . . .	69
<b>2-5</b> Shape Factor Methods . . . . .	82
<b>2-6</b> Numerical Methods of Analysis . . . . .	90
<b>2-7</b> Applications of Steady State Heat Transfer . . . . .	108
<b>2-8</b> Summary . . . . .	129
Discussion Questions . . . . .	133
Class Quiz Questions . . . . .	133

Practice Problems .....	134
References .....	143
<b>3: TRANSIENT CONDUCTION HEAT TRANSFER .....</b>	<b>144</b>
<b>3-1</b> General Problems in Transient Conduction .....	146
<b>3-2</b> Lumped-Heat Capacity Systems .....	148
<b>3-3</b> One-Dimensional Transient Heat Transfer .....	153
<b>3-4</b> Two-Dimensional Transient Heat Transfer .....	171
<b>3-5</b> Applications to Solids .....	180
<b>3-6</b> Numerical Methods of Analysis .....	194
<b>3-7</b> Graphical Methods .....	199
<b>3-8</b> Summary .....	203
Discussion Questions .....	207
Class Quiz Questions .....	207
Practice Problems .....	208
References .....	215
<b>4: FORCED CONVECTION HEAT TRANSFER .....</b>	<b>216</b>
<b>4-1</b> The General Problems of Convection Heat Transfer .....	219
<b>4-2</b> Concepts of Fluid Flow and Dimensional Analysis .....	221
<b>4-3</b> The Boundary Layer Concept .....	243
<b>4-4</b> Convection Heat Transfer at a Flat Plate .....	256
<b>4-5</b> Convection Heat Transfer around Objects .....	268
<b>4-6</b> Convection Heat Transfer in Closed Channels .....	279
<b>4-7</b> Applications of Convection Heat Transfer .....	296
<b>4-8</b> Summary .....	308
Discussion Questions .....	312
Class Quiz Questions .....	313
Practice Problems .....	313
References .....	318
<b>5: FREE CONVECTION HEAT TRANSFER .....</b>	<b>319</b>
<b>5-1</b> The General Concepts of Free Convection .....	321
<b>5-2</b> Analysis of Free Convection along Vertical Surfaces .....	324
<b>5-3</b> Free Convection along Horizontal and Inclined Surfaces .....	330
<b>5-4</b> Free Convection along Horizontal and Vertical Cylinders .....	335
<b>5-5</b> Free Convection in Enclosed Spaces .....	342
<b>5-6</b> Combined Free and Forced Convection Heat Transfer .....	346
<b>5-7</b> Approximate Equations for Free Convection of Air .....	348
<b>5-8</b> Summary .....	349
Discussion Questions .....	352
Class Quiz Questions .....	352
Practice Problems .....	352
References .....	355

<b>6: THE NATURE OF RADIATION HEAT TRANSFER. . . . .</b>	<b>356</b>
<b>6-1</b> Electromagnetic Radiation . . . . .	358
<b>6-2</b> Black Body Radiation . . . . .	365
<b>6-3</b> Gray Body Mechanisms . . . . .	370
<b>6-4</b> Geometry of Radiation . . . . .	375
<b>6-5</b> Applications of Radiation . . . . .	389
<b>6-6</b> Summary . . . . .	397
Discussion Questions . . . . .	399
Class Quiz Questions . . . . .	400
Practice Problems . . . . .	400
References . . . . .	406
<b>7: ANALYSIS OF RADIATION HEAT TRANSFER . . . . .</b>	<b>407</b>
<b>7-1</b> Radiosity . . . . .	408
<b>7-2</b> Analysis of Two-Surface Radiation Heat Transfer . . . . .	411
<b>7-3</b> Analysis of Three-Surface Radiation Heat Transfer . . . . .	419
<b>7-4</b> Gas Radiation . . . . .	427
<b>7-5</b> Applications of Radiation Heat Transfer . . . . .	433
<b>7-6</b> Summary . . . . .	439
Discussion Questions . . . . .	441
Class Quiz Questions . . . . .	441
Practice Problems . . . . .	441
References . . . . .	444
<b>8: MASS TRANSFER . . . . .</b>	<b>445</b>
<b>8-1</b> The Mechanisms of Mass Transfer . . . . .	447
<b>8-2</b> Analysis of Mixtures . . . . .	448
<b>8-3</b> Diffusion Mass Transfer . . . . .	452
<b>8-4</b> Convection Mass Transfer . . . . .	464
<b>8-5</b> Transient Diffusion . . . . .	471
<b>8-6</b> Absorption and Adsorption . . . . .	476
<b>8-7</b> Permeability . . . . .	482
<b>8-8</b> Summary . . . . .	492
Discussion Questions . . . . .	493
Class Quiz Questions . . . . .	494
Practice Problems . . . . .	494
References . . . . .	496
<b>9: HEAT EXCHANGERS . . . . .</b>	<b>497</b>
<b>9-1</b> General Concepts of Heat Exchangers . . . . .	499
<b>9-2</b> Parameters in Heat Exchangers . . . . .	503
<b>9-3</b> LMTD Method of Analysis . . . . .	507

<b>9-4</b>	Effectiveness-NTU Method of Analysis . . . . .	518
<b>9-5</b>	Compact Heat Exchangers . . . . .	525
<b>9-6</b>	Heat Pipes . . . . .	531
<b>9-7</b>	Summary . . . . .	541
	Discussion Questions . . . . .	543
	Class Quiz Questions . . . . .	543
	Practice Problems . . . . .	543
	References . . . . .	546
<b>10:</b>	<b>PHASE CHANGE HEAT TRANSFER . . . . .</b>	<b>547</b>
<b>10-1</b>	The Mechanisms of Phase Change Heat Transfer . . . . .	548
<b>10-2</b>	Analysis of Boiling Heat Transfer . . . . .	551
<b>10-3</b>	Condensing Heat Transfer . . . . .	565
<b>10-4</b>	Simplified Relationships for Boiling and Condensing . . . . .	577
<b>10-5</b>	Empirical Methods and Analysis of Melting and Freezing . . . . .	581
<b>10-6</b>	Applications of Phase Change Heat Transfer . . . . .	587
<b>10-7</b>	Summary . . . . .	597
	Discussion Questions . . . . .	599
	Class Quiz Questions . . . . .	600
	Practice Problems . . . . .	600
	References . . . . .	602

## APPENDICES

<b>A:</b>	<b>MATHEMATICAL INFORMATION . . . . .</b>	<b>A-1</b>
<b>A-1</b>	Vector Operations . . . . .	A-1
<b>A-2</b>	Matrix Operations . . . . .	A-3
<b>A-3</b>	Trigonometric Relationships . . . . .	A-4
<b>A-4</b>	Table of Integrals . . . . .	A-5
<b>A-5</b>	Hyperbolic Functions . . . . .	A-6
<b>A-6</b>	Some Power Series . . . . .	A-9
<b>A-7</b>	Harmonic Functions . . . . .	A-9
<b>A-8</b>	Fourier Series . . . . .	A-11
<b>A-9</b>	Error Function . . . . .	A-12
<b>A-10</b>	Bessel Functions . . . . .	A-14
<b>A-11</b>	Roots of Some Transcendental Equations and Associated Coefficients for Transient Conduction in Infinite Plates, Infinite Cylinders, and Spheres . . . . .	A-17
<b>A-12</b>	Lennard-Jones Intermolecular Force Parameters and Mass Diffusion Function . . . . .	A-19
<b>B:</b>	<b>CONVERSION FACTORS AND PROPERTY TABLES . . . . .</b>	<b>B-1</b>
<b>B-1</b>	Universal Constants and Conversion Factors . . . . .	B-1
<b>B-2</b>	Thermal Properties of Selected Nonmetallic Solids, SI Units . . . . .	B-2
<b>B-2E</b>	Thermal Properties of Selected Nonmetallic Solids, English Units . . . . .	B-4

<b>B-3</b>	Thermal Properties of Selected Liquids at Atmospheric Pressure or Where Otherwise Noted; SI Units . . . . .	B-6
<b>B-3E</b>	Thermal Properties of Selected Liquids at Atmospheric Pressure or Where Otherwise Noted; English Units . . . . .	B-7
<b>B-4</b>	Thermal Properties of Selected Gases at Atmospheric Pressure or Where Otherwise Noted; SI Units . . . . .	B-9
<b>B-4E</b>	Thermal Properties of Selected Gases at Atmospheric Pressure or Where Otherwise Noted; English Units . . . . .	B-10
<b>B-5</b>	Approximate Values for Emissivities of Surfaces . . . . .	B-11
<b>B-6</b>	Thermal Properties of Steam: Saturated Liquid-Saturated Vapor, SI Units . . . . .	B-12
<b>B-6E</b>	Thermal Properties of Steam: Saturated Liquid-Saturated Vapor, English Engineering Units . . . . .	B-13
<b>B-7</b>	Electrical Resistance of Copper Wire . . . . .	B-15
<b>B-8</b>	Constants and Coefficients for $\kappa = \kappa_{T_0} + \alpha(T - T_0)$ . . . . .	B-15
<b>B-8E</b>	Constants and Coefficients for $\kappa = \kappa_{T_0} + \alpha(T - T_0)$ . . . . .	B-16
<b>B-9</b>	Surface Tension for Some Selected Materials at Atmospheric Pressure and Interfacing with Air . . . . .	B-16
<b>B-9E</b>	Surface Tension for Some Selected Materials at Atmospheric Pressure and Interfacing with Air . . . . .	B-17
<b>B-10</b>	Periodic Table of the Elements . . . . .	B-18
<b>C:</b>	<b>PSYCHROMETRICS AND CHARTS . . . . .</b>	<b>C-1</b>
	Psychrometrics and Humidity Theory . . . . .	C-1
<b>C-1</b>	Psychrometric Chart, SI Units . . . . .	C-4
<b>C-1E</b>	Psychrometric Chart, English Units . . . . .	C-4
	Use of Refrigerant Pressure-Enthalpy Diagrams for Heat Transfer . . . . .	C-5
<b>C-2</b>	p-h Diagram for Water, SI Units . . . . .	C-5
<b>C-2E</b>	p-h Diagram for Water, English Units . . . . .	C-6
<b>C-3</b>	p-h Diagram for R-123, SI Units . . . . .	C-6
<b>C-3E</b>	p-h Diagram for R123, English Units . . . . .	C-7
<b>C-4</b>	p-h Diagram for R-134a, SI Units . . . . .	C-7
<b>C-4E</b>	p-h Diagram for R-134a, English Units . . . . .	C-8
<b>C-5</b>	p-h Diagram for R-12, SI Units . . . . .	C-8
<b>C-5E</b>	p-h Diagram for R-12, English Units . . . . .	C-9
<b>C-6</b>	p-h Diagram for R-22, SI Units . . . . .	C-9
<b>C-6E</b>	p-h Diagram for R-22, English Units . . . . .	C-10
<b>C-7</b>	p-h Diagram for Ammonia, SI Units . . . . .	C-10
<b>C-7E</b>	p-h Diagram for Ammonia, English Units . . . . .	C-11
<b>C-8</b>	Thermal Conductivity of Selected Saturated Vapors . . . . .	C-11
<b>C-9</b>	Thermal Conductivity of Selected Saturated Liquids . . . . .	C-12
<b>C-10</b>	Viscosity of Selected Saturated Vapors . . . . .	C-12
<b>C-11</b>	Viscosity of Selected Saturated Liquids . . . . .	C-13

**D: QUANTIFYING COMPREHENSION AND UNDERSTANDING . . . . . D-1**

Syllabus of Study Set I . . . . . D-2

Syllabus of Study Set II . . . . . D-10

Answers to Odd-numbered Practice Problems . . . . . ANS-1

Index . . . . . I-1
