<i>Preface</i>	page xi
<i>Abbreviations and mathematical symbols</i>	xv
<i>Prologue</i>	xxix
1 Seismology: ancient and modern	1
1.1 The long march begins	1
1.2 Seismic signals and noise	3
1.3 Seismometers	11
1.4 Seismometer arrays	16
1.5 Identification	21
1.6 Epicentres and OSIs	25
1.7 Seismograms and seismological bulletins	28
1.8 Earth models and seismic sources	33
1.9 Seismic source size and explosion yield	39
1.10 The International Monitoring System (IMS)	44
1.11 Scope of the book	45
2 Statistical solutions to seismological problems	46
2.1 Introduction	46
2.2 The method of least squares	48
2.3 Maximum-likelihood estimators	66
2.4 Weighting	69
3 Seismograms as time series	72
3.1 Introduction	72
3.2 Analogue and digital beamforming	73
3.3 Fourier spectra	74
3.4 Digital filtering	80
3.5 Least squares estimation of approximate filters	85
3.6 Modelling and measuring the effects of anelastic attenuation	89
3.7 The Hilbert transform and its uses	93
3.8 Seismogram synthesis as filtering	97

3.9	Group and phase speed	103
3.10	Noise analysis	108
3.11	Signals and noise in frequency/wave-number space	118
4	Seismographs and seismograms	121
4.1	Introduction	121
4.2	Direct-reading seismometers without feedback	124
4.3	The velocity transducer without feedback	132
4.4	Miniature broad-band seismometers	148
4.5	Sources of seismic noise	158
4.6	Siting seismographs	161
4.7	Estimating broad-band signals from SP recordings	162
4.8	Recording systems for forensic seismology	164
5	Seismometer arrays and processing methods	168
5.1	Introduction	168
5.2	Optimum array processing for four noise models	170
5.3	Array sum response in frequency/wave-number space	172
5.4	Wave-number filtering	181
5.5	Automatic processing	192
5.6	The design and performance of the UK-type arrays	202
5.7	Performance of other arrays	208
5.8	Future of arrays for signal extraction	209
5.9	Using arrays to measure travel-time gradients	213
6	Seismogram interpretation and synthesis	220
6.1	Introduction	220
6.2	Synthesizing P seismograms	221
6.3	Analysis and synthesis of surface-wave seismograms	252
6.4	Lessons from seismogram synthesis	276
7	Hypocentres and P travel times	278
7.1	Introduction	278
7.2	Estimating P travel times	279
7.3	Reading P onset times	287
7.4	Hypocentre estimation at the IDC	293
7.5	Estimating SSSCs	295
7.6	Whither epicentre estimation?	296
8	Seismic magnitudes	299
8.1	Introduction	299
8.2	Body-wave magnitude	301
8.3	Surface-wave magnitude	306
8.4	Lg magnitude	311

8.5	Seismic magnitude and explosion yield	312
8.6	Explosion P seismograms that show differences in anelastic attenuation	318
8.7	Sample bias in seismic amplitude analysis	321
8.8	Seismicity and detection thresholds	327
8.9	Unassociated SP detections	333
8.10	Magnitude estimation at the IDC	336
9	Seismic source identification	340
9.1	Introduction	340
9.2	Routine processing and analysis	340
9.3	Complexity	342
9.4	First motion	344
9.5	$m_b; M_s$	348
9.6	Complexity and the weak-signal hypothesis	353
9.7	Some case studies	359
9.8	Identification in practice	368
10	Epilogue	372
10.1	Introduction	372
10.2	Successes and failures	373
10.3	Confounded seismologists	374
10.4	Plate tectonics and test ban verification	376
10.5	The potential IDC: where do we go from here?	382
Appendix A	P and S radiation from a double-couple source	385
Appendix B	Normal equations for analysis of variance	386
Appendix C	Some uses of the FFT	388
C.1	Transforming two time series simultaneously	388
C.2	The Hilbert transform and the analytic signal	389
Appendix D	Anelastic attenuation	391
Appendix E	The relation of the transient and steady-state responses	393
Appendix F	Seismometer–galvanometer systems	396
Appendix G	SNI from summing array recordings	400
Appendix H	The equations for computing MP filters	402
Appendix I	Circular arrays	406
Appendix J	Geometrical spreading when S reflects as sP	410
Appendix K	The Fourier integral for a dispersed wave train	411
Appendix L	Tables of explosions and earthquakes	413

Appendix M Album of body-wave seismograms	419
M.1 Explosions	422
M.2 Earthquakes	440
Appendix N Exercises	461
N.1 Exercises for Chapter 1	461
N.2 Exercises for Chapter 2	463
N.3 Exercises for Chapter 3	463
N.4 Exercises for Chapter 4	464
N.5 Exercises for Chapter 5	464
N.6 Exercises for Chapter 6	466
N.7 Exercises for Chapter 7	467
N.8 Exercises for Chapter 8	471
N.9 Exercises for Chapter 9	471
N.10 Exercises for Chapter 10	472
