Preface.....	xv
Author.....	xix
<b>1 Introduction.....</b>	<b>1</b>
1.1 Background.....	1
1.2 Robot System Reliability/Safety-Related Facts, Figures, and Examples.....	2
1.3 Terms and Definitions.....	3
1.4 Useful Sources for Obtaining Information on Reliability and Safety of Robot Systems.....	5
1.4.1 Journals.....	5
1.4.2 Conference Proceedings.....	6
1.4.3 Books.....	6
1.4.4 Technical Reports.....	7
1.4.5 Data Sources.....	7
1.4.6 Standards.....	8
1.4.7 Organizations.....	9
1.5 Scope of the Book.....	9
1.6 Problems.....	10
References.....	11
<b>2 Basic Mathematical Concepts.....</b>	<b>13</b>
2.1 Introduction.....	13
2.2 Arithmetic Mean and Mean Deviation.....	13
2.2.1 Arithmetic Mean.....	14
2.2.2 Mean Deviation.....	14
2.3 Boolean Algebra Laws.....	15
2.4 Probability Definition and Properties.....	16
2.5 Probability Distribution-Related Definitions.....	18
2.5.1 Cumulative Distribution Function.....	18
2.5.2 Probability Density Function.....	19
2.5.3 Expected Value.....	19
2.6 Probability Distributions.....	20
2.6.1 Exponential Distribution.....	20
2.6.2 Rayleigh Distribution.....	21
2.6.3 Weibull Distribution.....	22
2.6.4 Bathtub Hazard Rate Curve Distribution.....	22
2.7 Laplace Transform Definition, Common Laplace Transforms, and Final-Value Theorem Laplace Transform.....	23
2.7.1 Laplace Transform Definition.....	23

2.7.2	Laplace Transforms of Common Functions.....	24
2.7.3	Final Value Theorem Laplace Transform .....	25
2.8	Solving First-Order Differential Equations Using Laplace Transforms.....	25
2.9	Problems.....	27
	References .....	28
<b>3</b>	<b>Reliability and Safety Basics .....</b>	<b>31</b>
3.1	Introduction .....	31
3.2	Bathtub Hazard Rate Curve .....	31
3.3	General Reliability-Related Formulas .....	33
3.3.1	Probability (or Failure) Density Function.....	33
3.3.2	Hazard Rate (or Time-Dependent Failure Rate) Function.....	34
3.3.3	General Reliability Function .....	34
3.3.4	Mean Time to Failure .....	35
3.4	Reliability Configurations .....	37
3.4.1	Series Network .....	37
3.4.2	Parallel Network .....	39
3.4.3	$k$ -out-of- $n$ Network.....	41
3.4.4	Standby System .....	43
3.4.5	Bridge Network.....	45
3.5	Need for Safety and the Role of Engineers with Respect to Safety .....	47
3.6	Classifications of Product Hazards and Common Mechanical Injuries .....	48
3.7	Organization Tasks for Product Safety and Safety Management Principles.....	49
3.8	Accident-Causation Theories .....	51
3.8.1	The “Human Factors” Accident-Causation Theory.....	51
3.8.2	The “Domino” Accident-Causation Theory .....	52
3.9	Problems.....	54
	References .....	54
<b>4</b>	<b>Methods for Performing Reliability and Safety Analysis of Robot Systems .....</b>	<b>57</b>
4.1	Introduction .....	57
4.2	Failure Modes and Effect Analysis.....	57
4.3	The Markov Method.....	59
4.4	Fault Tree Analysis .....	63
4.4.1	Probability Evaluation of Fault Trees.....	65
4.4.2	FTA Advantages and Disadvantages.....	67
4.5	Technique of Operations Review.....	68
4.6	Hazard and Operability Analysis .....	69
4.7	Interface Safety Analysis .....	69

4.8	Probability Tree Method .....	71
4.9	Problems .....	73
	References .....	74
<b>5</b>	<b>Robot Reliability .....</b>	<b>77</b>
5.1	Introduction .....	77
5.2	Classifications of Robot Failures and Their Causes and Corrective Measures .....	77
5.3	Robot Effectiveness Dictating Factors and Robot Reliability Survey Results .....	79
5.4	Robot-Related Reliability Measures .....	80
5.4.1	Mean Time to Robot-Related Problems .....	80
5.4.2	Mean Time to Robot-Related Failure .....	81
5.4.3	Robot Reliability.....	82
5.4.4	Robot's Hazard Rate.....	84
5.5	Robot Reliability Analysis Methods and Models for Performing Robot Reliability Studies .....	84
5.6	Reliability Analysis of Hydraulic and Electric Robots .....	86
5.6.1	Reliability Analysis of the Hydraulic Robot .....	86
5.6.2	Reliability Analysis of the Electric Robot.....	90
5.7	Problems .....	93
	References .....	94
<b>6</b>	<b>Robot Safety .....</b>	<b>97</b>
6.1	Introduction .....	97
6.2	Robot Safety: Problems and Hazards .....	97
6.3	Roles of Robot Manufacturers and Users in Robot Safety.....	99
6.4	Safety Considerations in Robot Design, Installation, Programming, and Operation and Maintenance Phases .....	101
6.4.1	Robot Design Phase.....	101
6.4.2	Robot Installation Phase .....	102
6.4.3	Robot Programming Phase .....	103
6.4.4	Robot Operation and Maintenance Phase.....	103
6.5	Robot-Related Safety Problems Causing Weak Points in Planning, Design, and Operation .....	104
6.6	Robot Safeguard Approaches.....	105
6.6.1	Warning Signs .....	105
6.6.2	Physical Barriers.....	105
6.6.3	Intelligent Systems.....	106
6.6.4	Flashing Lights.....	106
6.7	Common Robot Safety Features and Their Functions .....	106
6.8	Safety Considerations for Robotized Welding Operations.....	107
6.8.1	Robotized Laser Welding Hazards and Safety Measures .....	109

6.8.2	Hazards and Safety Measures for Robotized Gas-Shielded Arc Welding .....	110
6.8.3	Hazards and Safety Measures for Robotized Resistance Welding.....	111
6.9	Problems.....	111
	References .....	112
<b>7</b>	<b>Robot Accidents and Analysis.....</b>	<b>115</b>
7.1	Introduction .....	115
7.2	Some Examples of Robot-Related Accidents.....	115
7.3	Robot Accidents: Causes and Sources.....	117
7.3.1	Study I.....	117
7.3.2	Study II .....	118
7.4	Effects of Robot-Related Accidents.....	118
7.5	Robot-Related Accidents at Manufacturer and User Facilities.....	119
7.6	Useful Recommendations to Prevent Human Injury by Robots .....	120
7.6.1	Robot System Design.....	121
7.6.2	Supervision of Workers.....	121
7.6.3	Training of Workers.....	121
7.7	Methods for Performing Robot Accident Analysis.....	122
7.7.1	Estimating Probability of an Accident Occurrence Related to the Operation of a Robot.....	122
7.7.2	Root Cause Analysis.....	123
7.7.2.1	RCA Software .....	124
7.7.2.2	RCA Advantages and Disadvantages .....	124
7.7.3	Fault Tree Analysis .....	125
7.7.4	Markov Method .....	127
7.8	Problems.....	130
	References .....	130
<b>8</b>	<b>Robot Maintenance and Areas of Robotics Applications in Maintenance and Repair.....</b>	<b>133</b>
8.1	Introduction .....	133
8.2	Robot Maintenance-Related Needs and Maintenance Types.....	133
8.3	Commonly Used Tools to Maintain a Robot and Measuring Instruments and Tooling for Periodic Robot Inspections.....	134
8.4	Robot Diagnosis and Monitoring Approaches.....	135
8.5	Useful Guidelines to Safeguard Robot Maintenance Personnel and Safeguarding Methods for Use during the Robot Maintenance Process.....	136
8.6	Models for Performing Robot Maintenance Analysis .....	137
8.6.1	Model I.....	137
8.6.2	Model II .....	139

8.6.3	Model III.....	141
8.6.4	Model IV.....	144
8.7	Areas of Robotics Applications in Maintenance and Repair.....	145
8.7.1	Nuclear Industry.....	146
8.7.2	Highways.....	147
8.7.3	Railways.....	148
8.7.4	Underwater Facilities.....	148
8.7.5	Power Line Maintenance.....	149
8.8	Problems.....	149
	References.....	150

**9 Human Factors and Safety Considerations in Robotics**

	<b>Workplaces.....</b>	<b>153</b>
9.1	Introduction.....	153
9.2	Human Factors-Related Issues during the Robotic Systems’ Factory Integration Process.....	153
9.2.1	Safety.....	154
9.2.2	Maintainability.....	154
9.2.3	Worker–Machine Interface.....	155
9.2.4	Selection and Training.....	155
9.2.5	Work Environment.....	155
9.2.6	Management.....	156
9.2.7	Job Design.....	156
9.2.8	Communication among Workers and between Workers and Management.....	156
9.3	Common Robot and Robot-Related Human Tasks.....	156
9.4	Rules of Robotics in Regard to Humans and Advantages and Disadvantages of Robotization with Respect to Human Factors.....	157
9.5	Humans at Risk from Robots and Risk-Reducing Measures to Prevent Robot-Related Human Accidents.....	159
9.6	Useful Guidelines to Safeguard Robot Teachers and Operators.....	160
9.7	Approaches for Limiting Robot Movements.....	161
9.8	Methods for Analysis of Safety and Human Error in Robotics Workplaces.....	162
9.8.1	Deviation Analysis.....	162
9.8.2	Energy Barrier Analysis.....	162
9.8.3	Task Analysis.....	163
9.8.4	Fault Tree Analysis.....	163
9.8.5	Markov Method.....	165
9.9	Problems.....	167
	References.....	168

<b>10</b>	<b>Robot Testing, Costing, and Failure Data .....</b>	<b>171</b>
10.1	Introduction .....	171
10.2	Robot Performance Testing.....	171
10.3	Robot Performance Testing Methods.....	173
10.3.1	Test-Robot Program Method .....	173
10.3.2	Ford Method.....	173
10.3.3	IPA–Stuttgart Method .....	174
10.3.4	National Bureau of Standards Method.....	174
10.4	Robot Reliability Testing.....	174
10.4.1	Management-Related Tasks in a Robot Reliability Test Plan .....	175
10.4.2	Useful Guidelines for Robot Reliability Demonstration Tests.....	176
10.5	Robot Testing and Start-Up Safety-Related Factors .....	176
10.6	Robot Project Cost.....	177
10.7	Models for Estimating Robot-Related Costs .....	178
10.7.1	Model I.....	178
10.7.2	Model II .....	178
10.7.3	Model III.....	179
10.7.4	Model IV.....	179
10.7.5	Model V .....	180
10.7.6	Model VI.....	180
10.8	Robot Life Cycle Cost Estimation Models .....	180
10.8.1	Life Cycle Cost Model I.....	181
10.8.2	Life Cycle Cost Model II.....	181
10.9	Useful Methods for Making Financial Decisions about Robotization.....	182
10.9.1	Method I: Life Cycle Costing.....	182
10.9.2	Method II: Payback Period.....	182
10.9.3	Method III: Minimum Cost Rule.....	183
10.9.4	Method IV: Return on Investment.....	184
10.10	Failure Data Uses with Regard to Robots and Failure Reporting and Documentation System for Robots .....	184
10.11	Main Data Sources for Reliability.....	185
10.12	Repair and Inspection Records-Related Requirements for Robots .....	187
10.13	Problems.....	188
	References .....	188
<b>11</b>	<b>Mathematical Models for Analysis of Robot-Related Reliability and Safety.....</b>	<b>191</b>
11.1	Introduction .....	191
11.2	Model I.....	191
11.3	Model II .....	195

11.4	Model III .....	198
11.5	Model IV .....	201
11.6	Model V .....	205
11.7	Model VI.....	207
11.8	Problems.....	209
	References .....	210
 <b>Appendix A: Bibliography—Literature on the Reliability and Safety of Robot Systems.....</b>		 211
	<b>Index .....</b>	 233
