Detailed Contents

Preface / xiv | Acknowledgments / xvi | About the Authors / xviii

Section I Foundations of Design and Analysis

1 The Scientific Method 2

Empirical Data 2
Step 1: Ask a Question 3
- Choose a Topic 3
- Ask a Simple Question 4

Step 2: Read the Published Literature 4
- Locate Research 4
- Choose a Specific Question 6

Step 3: Create a Method 7
Step 4: Collect and Analyze Data 8
Step 5: Answer the Research Question 9
Step 6: Share Your Results 10
Research in Psychology: APA Style 11
Summary 14
Review of Terms 14
Practice Items 14
References 15

2 Ethical Research 16

Ethical Treatment of Participants 16
Assessing Risk to Participants 17
- Literature Review 19
- Hypothesis 19
- The Sample 19
- Method 20
- Statistics and the Data 21
- Benefits 21
- Risk 22
- Appendices 22
- Personnel 22
- Certification of Ethics Training 23
- Deception 23
- Testing of Special Populations 24
- Medical Procedures 25
- Animal Research 25
- Informed Consent 25

Treating Participants Ethically 29
Ethics After Testing Participants 29
- Data Entry 29
- Data Analysis 29
- Writing a Presentation or Manuscript 30
- Authorship Issues 33
- Presenting and Publishing Research 33

Who Is Harmed by Unethical Behavior? 34
Ethical Data-Collection Methods 34
Summary 36
Review of Terms 37
Practice Items 37
References 39

3 Research Designs and Variables 40

Correlational Design 40
- Longitudinal Studies 41
- Cross-Sectional Studies 41

Experimental Design 41
- Independent Variable 42
- Dependent Variable 43
- Cause and Effect 43

Random Assignment 44

Extraneous Variables 44

Internal Validity 45

Levels of Measurement 46
- Nominal Variable 47
- Ordinal Variable 48
- Interval Variable 48
- Ratio Variable 52
- Why Do We Care? 52

Summarizing Variables: Central Tendency 53
- Mode 53
- Median 54
- Mean 55

Summarizing Variables: Variability 57
- Range 57
- Standard Deviation 58

SPSS: Summarizing Variables 59
- Nominal Data 59
- Ordinal Data 64
- Interval and Ratio Data 67

Summary 69

Review of Terms 70

Practice Items 71

Reference 72

4 Learning About a Population From a Sample 73

Selecting a Sample 73
- Random Sampling 74
- Cluster Sampling 75
- Stratified Random Sampling 75
- Convenience Sampling 76

Bias in a Sample 77

Inferential Statistics 78
- Sampling Error 80
- Probability 80

Hypothesis Testing 82

Significance 82

p-values and Effect Size 84

Power and Sample Size 84

Degrees of Freedom 86

Summary 87

Review of Terms 87

Practice Items 88

Section II Categorical Variables and Simple Frequency

5 One Variable With Frequency Data 92

Research Design: Categorizing Participants 92

One-Way Chi Square With Equal Expected Frequencies 92

SPSS: One-Way Chi Square With Equal Expected Frequencies 95
- Effect Size: Cohen's *w* 98
- APA Style for the One-Way Chi Square With Equal Expected Frequencies 99
- Power 101

One-Way Chi Square With Unequal Expected Frequencies 102
SPSS: One-Way Chi Square With Unequal Expected Frequencies 104
APA Style for the One-Way Chi Square With Unequal Expected Frequencies 106
Summary 106
Review of Terms 107
Practice Items 107
References 110

6 Two Variables With Frequency Data 112

Research Design: Two Categorical Variables 112
Two-Way Chi Square: 2 × 3 Design 113
Power 114
SPSS: 2 × 3 Chi Square 114
Effect Size: Contingency Coefficient and Cramer's *V* 118
APA Style for the 2 × 3 Chi Square 121
Two-Way Chi Square: 2 × 2 Design 122
Effect Size: Phi Coefficient 123
SPSS: 2 × 2 Chi Square 124
APA Style for the 2 × 2 Chi Square 127
Summary 128
Review of Terms 129
Practice Items 129
References 132

Section III Research Without Grouping

7 Examining Relationships 134

Pearson's *r*: Seeking a Relationship 135
SPSS: Pearson's *r* (Seeking a Relationship) 140
Two-Tailed Test 142
One-Tailed Test 143
Power 145
Graphs as Figures: Scatterplot 146
APA Style for Pearson's *r*: Correlational Design 146
Pearson's *r*: Seeking Cause and Effect 147
Previewing Data With a Scatterplot 148
SPSS: Pearson's *r* (Seeking Cause and Effect) 149
Effect Size: Coefficient of Determination 150
APA Style for Pearson's *r*: Experimental Design 151
Inaccurate Pearson's *r* 152
When Pearson's *r* Falsely Shows No Relationship 152
Outliers That Weaken Pearson's *r* 152
Nonlinear Relationship 154
Restriction of Range 155
When Pearson's *r* Falsely Shows a Relationship 157
Restriction of Range on a Curvilinear Relationship 157
Outliers That Strengthen Pearson's *r* 158
Summary 160
Review of Terms 160
Practice Items 160
References 167

8 Scale Development 168

Pearson's *r* and Reliability of Measures 169
- Test-Retest Reliability 169
- Alternate-Forms Reliability 172
- Split-Half Reliability 173

Cronbach's Alpha and Reliability of Measures 174

SPSS: Scoring and Interpreting Measures 175
- Reverse Scoring Items 175
- Cronbach's Alpha on SPSS 178
- Scoring a Measure 180

Reliability With Subjective Measures: Interrater Reliability 182

Pearson's *r* and Validity 185
- Face Validity 185
- Content Validity 186
- Convergent Construct Validity 186
- Discriminant Construct Validity 186
- Predictive Validity 187

Summary 190

Review of Terms 190

Practice Items 190

References 195

9 Prediction 196

Prediction and Correlation 196

Linear Regression: Prediction Using One Predictor 197
- Correlation First 198
- Linear Regression 201
- Error in Predictions 203
- SPSS: Linear Regression 204
- Effect Size: Cohen's f^2 207
- APA Style for Linear Regression 207
- Power 208

Multiple Linear Regression: Prediction With Two Predictors 209
- SPSS: Multiple Linear Regression 209
- APA Style for Multiple Linear Regression 214

Summary 216

Review of Terms 216

Practice Items 216

References 221

Section IV Grouped Designs With Independent Samples

10 One Variable With Two Independent Groups 224

Research Design: One IV With Two Levels 226
- SPSS: Independent-Samples *t*-test With an IV 227
- Directional Hypothesis 231
- Effect Size: Cohen's *d* 231
- Confidence Intervals 233
- Power 234
- APA Style for the Independent-Samples *t*-test: Experimental Design 235
- Graphs as Figures: Bar Graph 235

Outliers 236

Using a Quasi-IV to Establish a Relationship 237
- SPSS: Independent-Samples *t*-test With a Quasi-IV 238
- APA Style for the Independent-Samples *t*-test: Correlational Design 242

Summary 244

Review of Terms 244

Practice Items 245

References 251

11 One Variable With More Than Two Independent Groups 252

Research Design: One IV With More Than Two Levels 252
- SPSS: One-Way, Between-Groups ANOVA With an IV 254
- Effect Size: Eta Squared 260
- Post Hoc Comparisons 261
- Confidence Intervals 262
- Power 263
- APA Style for the One-Way, Between-Groups ANOVA: Experimental Design 264

Analyzing a Quasi-IV With More Than Two Levels 266
- SPSS: One-Way, Between-Groups ANOVA With a Quasi-IV 267
- APA Style for the One-Way, Between-Groups ANOVA: Correlational Design 271

Summary 273

Review of Terms 273

Practice Items 274

References 278

Section V Grouped Designs With Related Samples

12 One Variable with Two Related Groups 280

Testing the Same People Twice 281

Problems With Testing the Same People Twice 282
- Practice Effect 283
- Fatigue Effect 283
- History Effect 283
- Maturation 284
- Solving Order Problems by Counterbalancing 284
- Avoiding Confounds 284

Research Design: One IV With Two Related Groups 284
- SPSS: Related-Samples *t*-test (Experimental Design) 286
- Confidence Intervals 289
- Effect Size: Cohen's *d* 289
- APA Style for the Related-Samples *t*-test: Experimental Design 290
- Power 292

Research Design: One Quasi-IV With Two Related Groups 292
- SPSS: Related-Samples *t*-test (Correlational Design) 293
- APA Style for the Related-Samples *t*-test: Correlational Design 295

Research Design: Testing Different People (Matched Pairs) 296
- Matching Participants 296
- Matching in a Two-Condition Study 297
- The Matching Process 298
- SPSS: Matched-Pairs *t*-test 302
- APA Style for the Matched-Pairs *t*-test 303

Summary 304

Review of Terms 305

Practice Items 305

References 309

13 One Variable With Repeated Measures: More Than Two Groups 310

Research Design: One IV With Repeated Measures 310
- SPSS: One-Way, Repeated-Measures ANOVA (Experimental Design) 313

Sphericity 317
Effect Size: Eta Squared 319
Confidence Intervals 319
Power 320
APA Style for the One-Way, Repeated-Measures ANOVA: Experimental Design 320
Research Design: One Quasi-IV With Repeated Measures 322
SPSS: One-Way, Repeated-Measures ANOVA (Correlational Design) 323
APA Style for the One-Way, Repeated-Measures ANOVA: Correlational Design 327
Summary 329
Review of Terms 329
Practice Items 329
References 333

Section VI
Advanced Design

14 Two Variables With Independent Samples 336

Research Design: Two IVs With Independent Samples 336
SPSS: Two-Way, Between-Groups ANOVA (No Significant Interaction) 339
Effect Size: Eta Squared 344
Post Hoc for a Main Effect 345
Confidence Intervals 346
Power 346
Graphing a Main Effect 347
APA Style for Two-Way, Between-Groups ANOVA With Main Effects 348
Research Design: One IV and One Quasi-IV With Independent Groups 350
SPSS: Two-Way, Between-Groups ANOVA (Significant Interaction) 351
Examining the Interaction 357
Post Hoc for an Interaction 358
Graphing an Interaction 363
APA Style for the Two-Way, Between-Groups ANOVA With an Interaction 364
Summary 366
Review of Terms 366
Practice Items 366
References 372

Appendices

Appendix A. Power Analysis Table 373

Appendix B. Graphing in Excel 374

Scatterplots 374
