CONTENTS

About the Authors xi
Foreword xiii
Preface xv

1. Nanotechnology for Water Cleanup **1**

1.1 Introduction 1
1.2 Magnetic nanoparticles 2
1.3 Layered double hydroxides (LDHs) for environmental applications 6
1.4 Removal of inorganic contaminants by LDHs 7
1.5 Removal of nuclear wastes 8
1.6 Graphene-based adsorbents 9
1.7 Metal organic frameworks (MOFs) 11
1.8 Bimetallic nanoparticles 11
1.9 Conclusions 13
References 15

2. Remediation Technologies for Water Cleanup: New Trends **19**

2.1 Introduction 19
2.2 Remediation technologies for emerging pollutants 20
2.3 Conclusions 28
References 29

3. Advanced Oxidation Process–Based Nanomaterials for the Remediation of Recalcitrant Pollutants **33**

3.1 Advanced oxidation processes 33
3.2 Main advanced oxidation processes 33
3.3 Conclusions 45
References 46

4. Graphene-Based Nanocomposites as Nanosorbents **49**

4.1 Introduction 49
4.2 Graphene-based nanocomposites as nanosorbents 50
4.3 Graphene oxide for removal of phenol and naphthol 69
4.4 Graphene oxide for removal of algal toxins 72
4.5 Graphene for removal of persistent organic pollutants 72
4.6 Conclusions 73
References 74

5. Kinetics and Equilibrium Isotherm Modeling: Graphene-Based Nanomaterials for the Removal of Heavy Metals From Water 79

5.1 Introduction 79
5.2 Kinetic studies and models 80
5.3 Other kinetic models 85
5.4 Modeling of equilibrium adsorption processes 86
5.5 Thermodynamic analyses 92
5.6 Adsorption of heavy metals 92
5.7 Conclusions 105
References 105

6. Sorption of Dyes on Graphene-Based Nanocomposites 111

6.1 Adsorption of dyes 111
6.2 Graphene-based magnetic nanocomposites 115
6.3 Photocatalytic degradation 118
6.4 Graphene-based carbon nanotubes composites 126
6.5 Graphene-based sulfonic magnetic nanocomposites 127
6.6 Graphene-based polymer nanocomposites 128
6.7 Graphene-based sand composites 130
6.8 Graphene-based chitosan composites 131
6.9 Conclusions 132
References 134

7. Functionalized Magnetic Nanoparticles: Adsorbents and Applications 139

7.1 Magnetic nanoparticles 139
7.2 Synthesis of magnetic nanoparticles 140
7.3 Magnetic nanoparticles in wastewater treatment 146
7.4 Modeling of adsorption: kinetic and isotherm models 153
7.5 Conclusions and future perspectives 154
References 156

8. Layered Double Hydroxides Nanomaterials for Water Remediation 161

8.1 Introduction 161
8.2 Synthesis of layered double hydroxides 162
8.3 Potential applications of LDHs 166
8.4 Conclusions 182
References 182

9. Magnetic Nanophotocatalysts for Wastewater Remediation 189

9.1 Introduction 189
9.2 Synthesis and characterization 190
9.3 Applications of magnetically recyclable nanophotocatalysts 192
9.4 Conclusions 234
References 235

10. Alumina Nanoparticles and Alumina-Based Adsorbents for Wastewater Treatment **239**

10.1 Introduction 239
10.2 Synthesis 239
10.3 Application 243
10.4 Conclusions 269
References 269

11. Bimetallic Nanomaterials for Remediation of Water and Wastewater **273**

11.1 Introduction 273
11.2 Applications of bimetallic nanomaterials 274
11.3 Conclusions 293
References 294

12. Desorption, Regeneration, and Reuse of Nanomaterials **297**

12.1 Introduction 297
12.2 Regeneration of photocatalysts 297
12.3 Recovery of metals and regeneration of magnetic nanoparticles 298
12.4 Regeneration of graphene-based nanocomposites 303
12.5 Regeneration of nanosorbents used in dye removal 304
12.6 Desorption and regeneration of inorganic solid wastes 306
12.7 Management of spent eluents 306
12.8 Management of spent nanomaterials 307
12.9 Conclusions 308
References 308

13. Nanomaterials in the Environment: Sources, Fate, Transport, and Ecotoxicology **311**

13.1 Introduction 311
13.2 Release of nanomaterials into the environment 311
13.3 Titanium dioxide 314
13.4 Silicon dioxide 315
13.5 Iron oxide nanoparticles 317
13.6 Graphene-based materials and their toxicity 317
13.7 Metal and semiconductor nanoparticles 318
13.8 Copper nanoparticles 319
13.9 Nickel nanoparticles 319
13.10 Silver nanoparticles 320
13.11 Magnetic nanoparticles in the environment 320
13.12 Environmental and safety concerns toward nanomaterials 321
13.13 Challenges in certain areas 323
13.14 Proposed actions to address these challenges 323
13.15 Conclusions 324
References 324

Subject Index **327**
