<i>Preface</i>	v
<i>Symbols</i>	vii
<b>1. Rolled Steel I-Sections</b>	<b>2</b>
<b>2. Rolled Steel Channels</b>	<b>6</b>
<b>3. Rolled Steel Equal Angles</b>	<b>8</b>
<b>4. Rolled Steel Unequal Angle Sections</b>	<b>12</b>
<b>5. Rolled Steel Tee-Sections</b>	<b>15</b>
<b>6. Rolled Steel I-Sections with Additional Flange Plates to be used as Girders</b>	<b>17</b>
<b>7. Rolled Steel I-Sections with Channel and Plates on Flanges to be used as Girders</b>	<b>23</b>
<b>Tensile Load Capacity of Single Equal Angle Sections</b>	
<b>8. Tensile Load Capacity of Equal Angle Sections for Yield Stress and Ultimate Stress With Welded end Connections for Gross Area</b>	<b>28</b>
<b>Tensile Load Capacity of Single Unequal Angle Sections</b>	
<b>9. Tensile Load Capacity of Unequal Angle Sections for Yield Stress and Ultimate Stress with Welded end Connections for Gross Area</b>	<b>32</b>
<b>Factored Axial Compression Load Capacity of Single Equal Angle Section</b>	
<b>10. Axial Compression Load Capacity of Single Equal Angle Section</b>	<b>36</b>
<b>Factored Axial Compression Load Capacity of Single Unequal Angle Section</b>	
<b>11. Axial Compression Load Capacity of Single Unequal Angle Section</b>	<b>80</b>
<b>Factored Axial Compression Load Capacity of Single I-Sections</b>	
<b>12. Axial Compression Load Capacity of I-Section</b>	<b>116</b>
<b>Factored Axial Compression Load Capacity of Single Channel-Sections</b>	
<b>13. Axial Compression Load Capacity of Channel-Section</b>	<b>184</b>
<b>Factored Axial Compression Load Capacity of Single Tee-Sections</b>	
<b>14. Axial Compression Load Capacity of T-Section</b>	<b>206</b>

**Factored Moment of Resistance of I-Sections**

<b>15. Moments of Resistance of Plastic and Compact I-Sections For Low Shear and High Shear</b>	<b>223</b>
<b>16. Moments of Resistance of Semi-compact I-Sections</b>	<b>224</b>

**Annexures**

<b>A-1 Shear Strength of Grade 4.6 Bolts</b>	<b>226</b>
<b>A-2 Tensile Strength of Grade 4.6 Bolts</b>	<b>226</b>
<b>A-3 Bearing Strength of Grade 4.6 Bolts for Typical end Distances and Pitch Distances</b>	<b>227</b>
<b>A-4 Fillet Weld Strength for Shop Welds and Field Welds</b>	<b>228</b>
