

Contents

Preface xi

1 Matter and Energy 1

1.1 Matter and Its Classification 3

Composition of Matter 3
Representations of Matter 9
States of Matter 11

1.2 Physical and Chemical Changes and Properties of Matter 13

Physical Properties 13
Physical Changes 23
Chemical Changes 24
Chemical Properties 24

1.3 Energy and Energy Changes 27

1.4 Scientific Inquiry 30

Observations 31
Hypotheses 31
Laws 33
Theories 33
Scientific Inquiry in Practice 33

Math Toolbox 1.1 Scientific Notation 35

Math Toolbox 1.2 Significant Figures 37

Math Toolbox 1.3 Units and Conversions 41

Key Concepts 45

Key Relationships 46

Key Terms 46

Questions and Problems 47

2 Atoms, Ions, and the Periodic Table 56

2.1 Dalton's Atomic Theory 58

2.2 Structure of the Atom 60

Subatomic Particles 60
The Nuclear Atom 61
Isotopes, Atomic Number, and Mass Number 64

2.3 Ions 69

2.4 Atomic Mass 72

2.5 The Periodic Table 75

Classification of Elements 75

Ions and the Periodic Table 78

Key Concepts 80

Key Terms 81

Questions and Problems 81

3 Chemical Compounds 89

3.1 Ionic and Molecular Compounds 91

3.2 Monatomic and Polyatomic Ions 96

Monatomic Ions 96

Polyatomic Ions 98

3.3 Formulas for Ionic Compounds 101

3.4 Naming Ionic Compounds 104

3.5 Naming and Writing Formulas for Molecular Compounds 110

3.6 Acids and Bases 112

3.7 Predicting Properties and Naming Compounds 116

Key Concepts 118

Key Terms 119

Questions and Problems 119

4 Chemical Composition 127

4.1 Percent Composition 130

4.2 Mole Quantities 132

Moles and Particles 132

Molar Mass 136

4.3 Determining Empirical and Molecular Formulas 140

Empirical and Molecular Formulas 140

Determining Empirical Formulas 143

Empirical Formulas from Percent Composition 143

Empirical Formulas for Compounds Containing More Than Two Elements 145

Empirical Formulas with Fractional Mole Ratios 146

Molecular Formulas from Empirical Formulas 147

Determining Percent Composition 148

4.4 Chemical Composition of Solutions 149

Concentration 150
Percent by Mass 151
Molarity 152
Dilution 156

Math Toolbox 4.1 Mole Quantities 158

Key Concepts 162
Key Relationships 163
Key Terms 163
Questions and Problems 163

5 Chemical Reactions and Equations 171**5.1 What Is a Chemical Reaction? 173****5.2 How Do We Know a Chemical Reaction Occurs? 174****5.3 Writing Chemical Equations 176****5.4 Predicting Chemical Reactions 182**

Decomposition Reactions 186
Combination Reactions 188
Single-Displacement Reactions 190
Double-Displacement Reactions 193
Combustion Reactions 199

5.5 Representing Reactions in Aqueous Solution 200

Key Concepts 202
Key Terms 203
Questions and Problems 203

6 Quantities in Chemical Reactions 214**6.1 The Meaning of a Balanced Equation 217****6.2 Mole-Mole Conversions 218****6.3 Mass-Mass Conversions 219****6.4 Limiting Reactants 223****6.5 Percent Yield 233****6.6 Energy Changes 235**

Law of Conservation of Energy 235
Energy Changes That Accompany Chemical Reactions 236
Quantities of Heat 238

6.7 Heat Changes in Chemical Reactions 244

Key Concepts 247
Key Relationships 248
Key Terms 248
Questions and Problems 248

7 Electron Structure of the Atom 259**7.1 Electromagnetic Radiation and Energy 261**

Properties of Electromagnetic Radiation 262
Atomic Spectra 266

7.2 The Bohr Model of the Hydrogen Atom 267**7.3 The Modern Model of the Atom 270**

Orbital Diagrams for Multielectron Atoms 272
Electron Configurations 276

7.4 Periodicity of Electron Configurations 277**7.5 Valence Electrons for the Main-Group Elements 282****7.6 Electron Configurations for Ions 284****7.7 Periodic Properties of Atoms 286**

Chemical Reactivity and Electron Configurations 286
Ionization Energy 288
Atomic Size 292
Sizes of Ions 293

Key Concepts 295

Key Relationships 296

Key Terms 296

Questions and Problems 296

8 Chemical Bonding 302**8.1 Types of Bonds 304**

Ionic and Covalent Bonding 305
Polar and Nonpolar Covalent Bonds 307
Electronegativity 307

8.2 Ionic Bonding 309

Lewis Symbols 310
Structures of Ionic Crystals 312

8.3 Covalent Bonding 313

The Octet Rule 314
Lewis Formulas for the Diatomic Elements 314
Valence Electrons and Number of Bonds 315
Structures of Covalent Molecules 317
Exceptions to the Octet Rule 322

8.4 Bonding in Carbon Compounds 323

Hydrocarbons 323

Functional Groups 324

8.5 Shapes of Molecules 326

The Valence-Shell Electron-Pair

Repulsion Theory 327

Polarity of Molecules 333

Key Concepts 335

Key Terms 336

Questions and Problems 337

9 The Gaseous State 344**9.1 The Behavior of Gases 347**

Temperature and Density 347

Pressure 348

9.2 Factors That Affect the Properties of Gases 351

Volume and Pressure 351

Volume and Temperature 355

Volume, Pressure, and Temperature 358

Gay-Lussac's Law of Combining Volumes 360

Avogadro's Hypothesis 360

9.3 The Ideal Gas Law 364

Calculations with the Ideal Gas Law 365

Dalton's Law of Partial Pressures 368

9.4 Kinetic-Molecular Theory of Gases 370

Postulates of Kinetic-Molecular Theory 370

Diffusion and Effusion 372

9.5 Gases and Chemical Reactions 373

Product Volume from Reactant Volume 373

Moles and Mass from Volume 375

Math Toolbox 9.1 Graphing 376**Math Toolbox 9.2** Solving Simple Algebraic

Equations 379

Key Concepts 380

Key Relationships 381

Key Terms 381

Questions and Problems 382

10 The Liquid and Solid States 395**10.1 Changes of State 398**

Liquid-Gas Phase Changes 399

Liquid-Solid Phase Changes 403

Solid-Gas Phase Changes 403

Cooling and Heating Curves 405

Energy Changes 407

10.2 Intermolecular Forces 410

London Dispersion Forces 411

Dipole-Dipole Forces 413

Hydrogen Bonding 414

Trends in Intermolecular Forces 417

10.3 Properties of Liquids 420

Density 420

Viscosity 421

Surface Tension 422

10.4 Properties of Solids 424

Crystals and Crystal Lattices 424

Types of Crystalline Solids 426

Key Concepts 432

Key Relationships 433

Key Terms 433

Questions and Problems 433

11 Solutions 442**11.1 The Composition of Solutions 444****11.2 The Solution Process 448****11.3 Factors That Affect Solubility 452**

Structure 452

Temperature 454

Pressure 455

11.4 Measuring Concentrations of Solutions 456

Percent by Mass 458

Percent by Volume 459

Mass/Volume Percent 460

Parts per Million and Parts per Billion 461

Molarity 462

Molality 463

11.5 Quantities for Reactions That Occur in Aqueous Solution 464

Precipitation Reactions 464

Acid-Base Titrations 468

11.6 Colligative Properties 470

Osmotic Pressure 470

Vapor Pressure Lowering 472

Boiling Point Elevation 473

Freezing Point Depression 474

Colligative Properties and Strong Electrolytes 475

Key Concepts 476

Key Relationships 477

Key Terms 478

Questions and Problems 478

12 Reaction Rates and Chemical Equilibrium 486

- 12.1 Reaction Rates 489
- 12.2 Collision Theory 490
- 12.3 Conditions That Affect Reaction Rates 493
 - Concentration and Surface Area 493
 - Temperature 494
 - Catalysts 496
- 12.4 Chemical Equilibrium 500
- 12.5 The Equilibrium Constant 502
 - The Equilibrium Constant Expression 502
 - Predicting the Direction of a Reaction 506
 - Heterogeneous Equilibrium 508
- 12.6 Le Chatelier's Principle 511
 - Reactant or Product Concentration 512
 - Volume of the Reaction Container 514
 - Temperature 517
 - Catalysts 518
 - Increasing Product Yield 519
 - Key Concepts 520
 - Key Relationships 521
 - Key Terms 521
 - Questions and Problems 521

13 Acids and Bases 530

- 13.1 What Are Acids and Bases? 532
 - Acid and Base Definitions 532
 - Conjugate Acid-Base Pairs 534
 - Acidic Hydrogen Atoms 536
- 13.2 Strong and Weak Acids and Bases 536
 - Strong Acids 537
 - Strong Bases 537
 - Weak Acids 538
 - Weak Bases 539
- 13.3 Relative Strengths of Weak Acids 543
 - Acid Ionization Constants 543
 - Polyprotic Acids 544
- 13.4 Acidic, Basic, and Neutral Solutions 546
 - The Ion-Product Constant of Water 546
 - Calculating H_3O^+ and OH^- Ion Concentrations 547
- 13.5 The pH Scale 549
 - Calculating pH 549
 - Calculating pOH 553
 - Calculating Concentrations from pH or pOH 553
 - Measuring pH 555

13.6 Buffered Solutions 557

- Math Toolbox 13.1 Log and Inverse Log Functions 560
- Key Concepts 563
- Key Relationships 563
- Key Terms 564
- Questions and Problems 564

14 Oxidation-Reduction Reactions 571

- 14.1 What Is an Oxidation-Reduction Reaction? 574
- 14.2 Oxidation Numbers 578
- 14.3 Batteries 583
- 14.4 Balancing Simple Oxidation-Reduction Equations 590
- 14.5 Balancing Complex Oxidation-Reduction Equations 594
- 14.6 Electrochemistry 599
 - Voltaic Cells 600
 - Electrolytic Cells 601
- 14.7 Corrosion Prevention 605
 - Key Concepts 607
 - Key Terms 608
 - Questions and Problems 608

15 Nuclear Chemistry 617

- 15.1 Radioactivity 619
 - Nuclear Decay 619
 - Radiation 620
- 15.2 Nuclear Reactions 621
 - Equations for Nuclear Reactions 621
 - Particle Accelerators 628
 - Predicting Spontaneous Nuclear Decay Reactions 628
- 15.3 Rates of Radioactive Decay 632
 - Detection of Radiation 632
 - Half-Lives 633
 - Archeological Dating 635
 - Geological Dating 636
- 15.4 Medical Applications of Isotopes 637
 - Power Generators 637
 - Medical Diagnoses 637
 - Positron Emission Tomography 638
 - Cancer Therapy 639

15.5 Biological Effects of Radiation 639*Radiation Exposure* 639

Radon 641

15.6 Nuclear Energy 642

Uranium-235 Fission 642

Chain Reactions 644

Fission Reactors 644

Fusion Reactors 646

Key Concepts 648

Key Terms 648

Questions and Problems 649

16 Organic Chemistry 653**16.1 Representations of Organic Molecules 657****16.2 Hydrocarbons 661**

Classes of Hydrocarbons 661

Petroleum 663

16.3 Acyclic Hydrocarbons 664

Alkanes 664

Alkenes and Alkynes 671**16.4 Cyclic Hydrocarbons 675**

Cycloalkanes and Cycloalkenes 675

Aromatic Hydrocarbons 676**16.5 Alcohols and Ethers 678***Alcohols* 678

Ethers 681

16.6 Aldehydes and Ketones 681

Aldehydes 681

Ketones 682

16.7 Carboxylic Acids and Esters 682*Carboxylic Acids* 682

Esters 683

16.8 Amines 686**16.9 Organic Nomenclature 686**

Alkanes 687

Alkenes and Alkynes 687*Aromatic Hydrocarbons* 687

Other Naming Conventions 688

Key Concepts 689

Key Terms 690

Questions and Problems 690

17 Biochemistry 698**17.1 Proteins 700**

Composition of Proteins 701

Hydrolysis of Proteins 707

Structure of Proteins 710

Denaturation of Proteins 715

17.2 Nucleic Acids 715

Structure of Nucleic Acids 716

Deoxyribonucleic Acid and Replication 719

Ribonucleic Acid, Transcription, and Translation 720**17.3 Carbohydrates 724***Simple Carbohydrates* 725

Complex Carbohydrates 727

17.4 Lipids 731

Key Concepts 736

Key Terms 738

Questions and Problems 738

Appendices A-1**A Useful Reference Information A-1****B Math Toolboxes A-2****C Answers to Consider This Questions and Practice Problems A-3****D Answers to Selected Questions and Problems A-14****Glossary G-1****Credits C-1****Index I-1**
