# CONTENTS

*Contributor biographies* x

**Introduction** 1
*Greger Lundesjö*

The expanding role of logistics in construction 1
Perspectives and opinions 4
Outline of the book 4

**PART ONE** Strategic perspectives 7

**01 The challenge of construction logistics** 9
*Michael Browne*

Introduction 9
Factors that influence logistics activities 13
The role of logistics management within construction 16
The challenges of the urban environment 21
Conclusion 22
Note 23
References 23

**02 Aggregating global products for just-in-time delivery to construction sites** 25
*Mark Franklin*

Introduction 25
Global sourcing 26
Investment in procurement and centralized decision making 27
Environmental legislation, quality and good waste management 28
Lean supply onto site with plot-picked delivery 29
Who is best placed to deliver an aggregation and lean delivery capability? 32
Commercial and risk issues 33
Conclusion 34

**03 Construction logistics – supply of bulk materials** 35
*Matthew Woodcock*

Introduction 35
Logistics, customers and bulk materials 35
Logistics models in construction bulk materials 43
Supply chain maturity 55
Conclusion 61
References 61

**04 Effective management of a construction project supply chain** 62
*Stephen Robbins*

Introduction 62
A typical construction project supply chain 63
Construction logistics 64
Defining 'effective' management of a construction supply chain 67
Best practice – 2020 70
Improvement strategy 71
Conclusion 74
References 75

**05 Construction supply chain management strategy** 77
*Brian Moone*

Introduction 77
Supply chain risks 79
Framework agreements 84
Supply chain management of logistics in construction 84
Case study: Mace Business School 85
Conclusion 87
Reference 87

**PART TWO** The impact of BIM and new data management capabilities on supply chain management in construction 89

**06 Data management for integrated supply chains in construction** 91
*Wes Beaumont and Jason Underwood*

Introduction 91
Information management in construction 92
Big data and construction 102

Data and the integrated supply chain 111
Enterprise-level integration 115
Conclusion 117
References 118

**PART THREE** Construction logistics and sustainability 121

**07 The role of logistics in achieving sustainable construction: a Swedish perspective** 123
*Monika Bubholz, Camilla Einarsson and Lars-Göran Sporre*

Introduction 123
Sustainable construction logistics 126
Practical considerations for efficient and sustainable construction logistics 130
Case studies: 134
'The University Hospital of the future' – University Hospital in Linköping, Sweden 134
Triangeln (the Triangle) – Malmö, Sweden 135
Conclusion 137
Reference 138

**08 Resource efficiency benefits of effective construction logistics** 139
*Malcolm Waddell*

Introduction 139
Construction sustainability impact 140
Supply chain influence on sustainable construction logistics 143
Construction logistics strategies and how they can influence resource efficiency 144
Material logistics planning 154
Conclusion 155
References 158

**PART FOUR** Logistics operations 159

**09 The role of the construction logistics manager** 161
*Andy Brown*

Introduction 161
Logistics professional and service sourcing 163
Consulting logistics professionals 165
Construction logistics managers 169

Creating a construction logistics plan (CLP) 174
Conclusion 181

**10 Third-party logistics operators in construction: the role they play and the role they could play** 183
*Pete Flinders*

Introduction 183
3PL definition 184
Complicated and 'unstructured' supply chain 185
Impact of downturn 185
Supply chains with a dominant entity 188
Case studies: 189
Aircraft Carrier Alliance 190
B&Q 192
Omni-channel 194
Primary and secondary distribution networks 194
International construction supply chains 195
Final mile logistics – construction consolidation centres 196
Why doesn't the construction industry make better use of 3PL services? 197
Case study: London 2012 Olympics 199
Evolution of the 3PL role 200
What will trigger momentum of the 3PL role in construction logistics? 202
Conclusion 203
References 203

**11 Managing construction logistics for confined sites in urban areas** 205
*Ruvinde Kooragamage*

Introduction 205
Identifying current challenges in managing construction logistics 206
Developing a theoretical framework 211
Conclusion 218
References 221

**12 Consolidation centres in construction logistics** 225
*Greger Lundesjö*

Introduction 225
The resources, functionality and operation of a CCC 227
The benefits of using a CCC 233
Types of CCC 237

Locating a CCC 239
Conclusion 240
End note 241
References 242

**13 Delivery management systems** 243
*Rick Ballard and Nick Hoare*

Introduction 243
What is a delivery management system? 244
The features of computerized delivery management 246
The benefits of proper management of deliveries 247
Who is it for? 250
The future 251
Case studies: 252
Royal Adelaide Hospital 252
Media City UK, Salford 253
M1 motorway widening 254
MidKent College 256
Conclusion 256
