List of Figures and Tables	xxiii
Preface	xxvii
Acknowledgments	xxix
1 Introduction to Occupational Safety and Health	1
Chapter Objectives	1
Case Study	1
Occupational Safety and Health	2
Importance of Occupational Safety and Health	3
Early Historical Examination of Occupational Safety and Health	4
Ancient Greek and Roman Physicians	4
The European Renaissance and the Industrial Revolution	5
Terms and Concepts in the Safety Profession	7
Job Titles of Individuals Performing Occupational Safety and Health Activities	10
The Safety and Health Professional's Role and Responsibility	11
Safety and Ethics: Do You? Don't You? <i>by Dr. Michael O'Toole</i>	18
Background	18
Business Ethics	19
Conclusion	24
Questions	24
References	25
Bibliography	25

2	Safety Legislation	27
	Chapter Objectives	27
	Case Study	27
	Legislative History	27
	Occupational Safety and Health Act	30
	Who Is Covered?	31
	OSHA Standards	32
	Origin of OSHA Standards	33
	Horizontal and Vertical Standards	34
	Finding the OSHA Act	34
	Specific Requirements of the Act	35
	Employer Responsibilities and Rights	36
	Inspections	37
	Inspection Process	37
	Citations and Penalties	39
	Appeals Process	40
	OSHA-Approved State Programs	42
	Standards Development	42
	Other Considerations	42
	NIOSH and OSHRC	43
	Future Trends	43
	Conclusion	44
	Questions	45
	References	45
	Bibliography	45
3	Workers' Compensation and Recordkeeping	47
	Chapter Objectives	47
	Case Study	47
	Early Workers' Compensation Laws	47
	Modern Workers' Compensation Laws	49
	Exemptions	51
	Premium Calculation	51
	Experience Modification	52
	Retrospective Rating	52
	Self-Insured	52
	Recordkeeping	53
	Case Study	53

Background	53
Who Must Keep Records	54
Forms	54
OSHA 300, 300A, and 301 Forms	54
Recordable Occupational Injuries and Illnesses	58
First Aid Cases	58
Fatalities	59
Privacy Concern Cases	60
Posting Annual Summary Requirements	60
Conclusion	61
Questions	61
References	61
Bibliography	62
4 Safety-Related Business Laws	63
Chapter Objectives	63
Case Study	63
Important Terminology	64
Role of the Safety Professional	68
Product Liability	68
Product Safety Act	69
Theories of Product Liability	70
Lawsuits	71
Contracts	72
Insurance	74
Conclusion	75
Questions	75
References	75
5 Accident Causation and Investigation: Theory and Application	77
Chapter Objectives	77
Introduction	77
The Concepts of Risk, Incidents, and Accidents	79
Accident Causation Theories	84
Single Factor Theory	84
Domino Theories	85
Heinrich's Domino Theory	85
Bird and Loftus's Domino Theory	86
Marcum's Domino Theory	88

Multiple Causation Accident Theories	89
Multiple Factors Theory	89
Systems Theory of Causation	90
Psychological/Behavioral Accident Causation Theories	91
Goals Freedom Alertness Theory	91
Motivation Reward Satisfaction Model	91
Human Factors Theory	91
Energy-Related Accident Causation Theories	92
Energy Release Theory	92
Swiss Cheese	93
Incident Investigation	94
Conclusion	100
Questions	100
References	100
Bibliography	101
6 Introduction to Industrial Hygiene	103
<i>Burton R. Ogle, PhD, CIH, CSP, and</i>	
<i>Tracy L. Zontek, PhD, CIH, CSP</i>	
Chapter Objectives	103
Case Study	104
What Is Industrial Hygiene?	105
What Do We Mean By the “Art” of Industrial Hygiene?	106
What About the Science of Industrial Hygiene?	107
What Are the Health Hazards That the IH Is Charged with	
Recognizing, Evaluating, and Controlling?	107
History of Industrial Hygiene	107
Toxicology	109
Routes of Entry	110
Acute and Chronic Exposures	110
Chemical Interactions	112
Classification of Toxic Materials	113
Toxicity versus Risk	115
Precautionary Principle	115
Industrial Hygiene Practice	116
Recognition	116
Evaluation	118
Control	122

Conclusion	124
Questions	124
Bibliography	125
7 Ergonomics and Safety Management	127
Chapter Objectives	127
Case Study	127
Introduction to Ergonomics	128
Definition of the Term “Ergonomics”	129
Ergonomics Is Multidisciplinary	129
Ergonomics Objective	129
Applying Ergonomics: An Overview	130
Applying Ergonomics: In Detail	131
Operator-Machine Systems	131
People Variables	132
Anthropometry	132
Biomechanics	134
Classification of Body Movement, Postures, and Positions	135
Physiological Categories of Movement	135
Abduction/Adduction	140
Circumduction	140
Flexion/Extension	140
Neutral Plane/Deviation	140
Rotation	140
Supination/Pronation	141
Operational Categories of Movement	141
Additional Characteristics of the People Variable	142
Cumulative Trauma Disorders	142
Carpal Tunnel Syndrome	142
Cubital Tunnel Syndrome	143
Tendonitis	143
Tenosynovitis	143
CTD Symptoms	144
Machine Variables	145
Environmental Variables	147
Workplace Layout and Design	147
Interventions—Workstations	147

Interventions—Manual Material Handling	149
Interventions—Video Display Terminal Workstation Design	150
Conclusion	153
Questions	154
References	154
Bibliography	155
8 Fire Prevention and Protection	157
Chapter Objectives	157
Case Study	157
Fire Tetrahedron	159
Categories of Fires and Extinguishers	161
National Fire Protection Association	163
Standards and Codes	164
NFPA 70	164
NFPA 101	164
NFPA 30	165
NFPA 13	165
NFPA 58	165
NFPA 99	165
Educational Materials	167
NFPA 704	168
DOT Marketing System	168
OSHA Regulations	169
Fire Case History	175
Managing the Fire Program	176
Written Program	176
Conclusion	177
Questions	178
References	178
Bibliography	178
9 System Safety	181
<i>Celeste A. Winterberger, PhD</i>	
Chapter Objectives	181
Case Study	181
Definitions	183

History of System Safety	185
Importance of System Safety Today	185
System Life Cycle	186
Management of System Safety	187
Organizational Location	188
Organizational Interfaces	189
Implementation Difficulties	189
Elements of a System-Safety Program Plan (SSPP)	189
Tools and Techniques	190
Preliminary Hazard Analysis	190
Subsystem Hazard Analysis	192
Hazard Analysis Techniques	192
Technique of Operations Review (TOR)	193
Technique for Human Error Rate Prediction (THERP)	195
Failure Mode and Effects Analysis (FMEA)	196
Fault Hazard Analysis (FHA)	196
Fault Tree Analysis (FTA)	197
Job Safety Analysis (JSA)	199
Reasons for Conducting a JSA	199
Who Should Conduct JSAs?	199
Procedures and Various Methods Used to Perform JSAs	200
Selecting the Job	201
Completing the JSA	203
Effectively Using a JSA in Loss Prevention	204
An Example	204
Accident Investigation	204
Accident Types	208
Conclusion	208
Questions	209
References	209
Bibliography	210
10 Managing the Safety Function	211
Chapter Objectives	211
Case Study	211
Planning	212
Organizing	214

Controlling	217
Directing	222
Staffing	222
Communications	223
Evaluation of the System	224
OSHA Guidelines	225
Conclusion	226
Questions	227
Bibliography	228
11 Psychology and Safety: The Human Element in Loss Prevention	229
Chapter Objectives	229
Case Studies	229
Introduction	230
Basic Terminology	230
Motivation	231
Goal-Directed School	232
Maslow's Needs-Hierarchy Theory	232
McClelland's Need-Achievement Theory	233
Herzberg's Motivation Hygiene Theory	234
Behavioral School	236
Pavlov	236
Skinner	237
The Rational Employee: Applying Motivation Theories	238
Organizational Environment and the Safety Culture	239
Incentives versus Inherent Reinforcement	242
Employee Empowerment and Job Enrichment	244
Conclusion	244
Questions	245
References	245
Bibliography	245
12 Improving Safety Performance with Behavior-Based Safety	247
<i>Earl Blair, EdD, CSP</i>	
Chapter Objectives	247
Introduction	247
Misconceptions about Behavioral Safety	248
Basic Definitions and Terminology	250

Principles and Strategies of Behavioral Safety	250
Common Problems with Safety Efforts	251
A Process Focusing on Improving Safety Behavior	252
Behavior Sampling for Proactive Measures	254
Employee-Driven Processes and Partial Empowerment	254
Implementing Behavioral Approaches	255
How to Implement Behavioral Safety—Common Steps	255
How to Conduct a Safety Assessment	256
Developing an Inventory of Critical Safety-Related Behaviors	258
What Are Critical Behaviors and Why Develop	
an Inventory of Critical Behaviors?	259
How Can We Identify Critical Behaviors?	259
Steps of the Observation Process	260
Steps for Continuous Improvement	261
Safety Coaching	262
Steps in the Coaching Process	262
Power of Reinforcement	263
Power of Relationships	263
Power of Information	264
How to Provide Meaningful Feedback	264
Common Performance Metrics for Behavioral Safety	264
Potential Barriers to Successful Implementation	
of Behavioral Safety	266
Success Factors for Behavioral Safety	268
Conclusion	270
Questions	270
References	271
13 Workplace Violence	273
<i>J. Brett Carruthers, CSP</i>	
Chapter Objectives	273
Case Study	273
Introduction	274
Workplace Epidemic of Violence	274
Background	274
Victimization of the American Workforce	275
Profile of Victims	275
Cost to Business	276

OSHA Perspective	276
High-Risk Workplaces	276
Nighttime Retailing	277
Health Care and Social Service	279
Proper Security Measures	281
Problem Employees: Formula for Failure	282
The Ingredients List	282
Other Ingredients	283
Recognizing the Potential Aggressor	283
Disgruntled Employee Red Flags	284
Employee Disenchantment	285
Revenge	285
Violence	286
Defusing a Time Bomb: The Violent Employee	287
Nonharassment Policy	287
Pre-employment Screening	287
Drug Testing	288
Employee and Management Training	289
Crisis Management Planning	289
Liaison with Local Law Enforcement	290
Planning for Security Emergencies	291
Lockdowns	291
Lockouts	292
Shelter-in-Place	292
Developing the Plan	293
Communicating the Plan	294
Practicing the Plan	294
Conclusion	294
Questions	295
References	295
Bibliography	296
14 Terrorism Preparedness	299
Chapter Objectives	299
Case Study	299
Historic Information	300
Overview	301

Responsibilities	302
Planning	302
Activities	302
Production	303
Bottlenecks	304
Location of Your Property	304
Fences and Entrances	304
Clear Area Around the Premises	305
Doors, Windows, and Other Openings	305
Ventilation and HVAC Systems	306
Lighting Systems	306
Communication Systems	306
Continuity of Operations (COOP)	306
Security Systems	307
Surveillance Systems	308
Guards	309
Entry and Movement of Vehicles and Visitors	309
Entry and Movement of Employees	309
Computers and Networks	309
Threats	310
Mail and Packages	311
Your Role	311
Insurance	311
Conclusion	312
Questions	312
Reference	312
 15 Hazardous Materials	 313
<i>Tracy L. Zontek, PhD, CIH, CSP,</i> <i>and Burton R. Ogle, PhD, CIH, CSP</i>	
Chapter Objectives	313
Case Study	313
Introduction	314
Background	315
What Is a Hazardous Waste?	316
Determining Generator Status	317
Obtaining an EPA Identification Number	318

Managing Hazardous Waste On-Site	318
CERCLA	319
SARA	321
Worker Protection Standards	324
Contingency Plans	325
Hazardous Waste Disposal	326
Uniform Hazardous Waste Manifest and DOT Regulations	326
Additional Reporting Requirements	326
EPA Wears Many Hats	327
Hazard Communication Standard (29 CFR 1910.1200)	328
Global Harmonization	329
Written Program	330
Labeling	331
Safety Data Sheets (SDSs)	332
Training	333
Conclusion	333
Questions	334
References	334
Bibliography	335
16 Construction Safety and the Multiemployer Worksite Doctrine	337
<i>Mark A. Friend and Dan Nelson, with additions by William Walker</i>	
Chapter Objectives	337
Case Study	337
Introduction	338
Construction Safety Recommendations	339
Falls from Elevations	339
Struck by and Caught In-between	343
Electrical Shock	344
Other Hazards	345
Case Study	345
Trenching	348
Multiemployer Worksite Policy	348
Doctrine History	350
Contractor Qualifications and Programs	352
Conclusion	355
Questions	355
References	356

17	Transportation Safety	357
	<i>Scotty Dunlap, EdD, CSP</i>	
	Chapter Objectives	357
	Case Study	357
	Hazardous Materials Transportation	358
	What Is a Hazardous Material?	359
	Hazardous Materials Table	359
	Shipping Papers	360
	Emergency Response Information	360
	Placarding	361
	Driver Training	362
	Emergency Response Planning	362
	Emergency Response Equipment	362
	Spill Prevention and Response	362
	Security Plan	364
	Federal Motor Carrier Safety Regulations	364
	Commercial Driver's License	364
	Driver Qualifications	365
	Emergency Equipment	366
	Maintenance of Accident Registers and Reports	366
	Drug and Alcohol Programs	367
	Background Checks	367
	Testing Programs	367
	Rehabilitation	368
	Fleet Safety	369
	Driver Authorization	369
	Preventive Maintenance	370
	Vehicle Operation	371
	Risk Management	372
	Conclusion	373
	Questions	373
