Part 1 Introductory Concepts	1
1 Homeostasis in Person-Centred Practice	3
2 The Human Cell	17
3 Genetic and Epigenetic Control of Biological Systems	45
4 The Human Microbiome and Health	67
Part 2 Control and Coordination	99
5 The Nervous System: Control of Body Function	101
6 Special and General Senses: Responding to the Environment	145
7 The Endocrine System: Control of Internal Functions	175
Part 3 Preservation of the Internal Environment	201
8 The Digestive System: Nutrient Supply and Waste Elimination	203
9 Metabolism and Liver Function	231
10 The Respiratory System: Gaseous Exchange	261
11 The Renal System: Fluid, Electrolyte and Acid–Base Balance	285
12 The Cardiovascular and Lymphatic Systems: Internal Transport	309
Part 4 Support and Protection of the Internal Environment	349
13 The Immune System: Internal Protection	351
14 Skin and Temperature Regulation	371
15 The Musculoskeletal System: Support and Movement	397

Part 5 The Next Generation	439
16 The Reproductive Systems	441
17 Development through the Life Span	477
<i>Glossary</i>	501
<i>Appendix 1: Introductory Science</i>	537
<i>Appendix 2: Units and Numerals</i>	549
<i>Appendix 3: Descriptors of the Body</i>	553
<i>Index</i>	557
