PART 1 ANALYSIS AND DESIGN

CHAPTER 1 Introduction and Overview.....	3
1.1 Aim of Book	3
1.2 Criticality of Structure and Damage	5
1.3 Types of Composite Repairs and Certification Criteria	7
1.4 Overview of Repair Design and Analysis Process	11
1.5 Effect of Load Attraction in Patch Design	11
1.6 Effect of Taper and Scarf Ratios on Joint Design.....	14
1.6.1 Safe-Life Approach	15
1.6.2 Damage Tolerance Approach.....	17
1.6.3 Stepped Repairs	17
1.7 Summary	18
References.....	18
CHAPTER 2 Failure Criteria.....	21
2.1 Introduction.....	21
2.2 Adhesive Failure Criteria	21
2.2.1 Failure Criteria for Brittle Adhesives	22
2.2.2 Failure Criteria for Ductile Adhesives.....	27
2.3 Composite Failure Criteria	29
2.3.1 Intralamina Failure Criteria.....	30
2.3.2 Interlaminar Failure Criteria.....	38
2.4 Summary	43
References.....	44
CHAPTER 3 Doubler Joint Analysis	47
3.1 Introduction.....	47
3.2 Untapered Doublers and Joints	47
3.2.1 Two-Sided Doublers and Double Strap Joints.....	48
3.2.2 One-Sided Doublers and Single Strap Joints.....	53
3.3 Tapered Doublers and Joints	55
3.3.1 Solution for Nonlinear Moment Distribution Along the Joint.....	56
3.3.2 Elastic Solution for Adhesive Peel and Shear	59
3.3.3 Elastic-Plastic Solution for Adhesive Peel and Shear	68

	3.3.4 Effect of Adherent Shear Deformation	71
	3.3.5 Numerical Examples.....	72
3.4	Summary	80
	References.....	80
CHAPTER 4	Design of Scarf and Doubler-Scarf Joints	83
4.1	Introduction.....	83
4.2	Scarf Joint of Homogeneous Adherends.....	84
	4.2.1 Constant-Angle Scarf	84
	4.2.2 Optimum Angle of Scarf Between Dissimilar Materials	87
4.3	Composite Scarf Joint.....	90
	4.3.1 Identical Adherends with Constant-Angle Scarf	91
	4.3.2 Elasto-Plastic Stress Analysis of Scarf Joints.....	96
4.4	Experiments and Validation	105
	4.4.1 Room Temperature Dry Condition	105
	4.4.2 Hot Wet Condition	108
4.5	Doubler-Scarf Joints	109
4.6	Conclusions.....	111
	References.....	111
CHAPTER 5	Disbond and Damage Tolerance Analysis of Doubler Repairs	113
5.1	Introduction.....	113
5.2	Analytical Methods for Delamination Analysis	114
	5.2.1 VCCT by FE Method	115
	5.2.2 Crack Tip Element Approach.....	117
	5.2.3 Cohesive Zone Model	128
5.3	Analytical Methods for Disbond Analysis.....	133
5.4	Fatigue Damage Accumulation Model for Predicting Interlaminar Failure and Disbond	135
5.5	Summary	138
	References.....	138
CHAPTER 6	Damage Tolerance and Fatigue Durability of Scarf Joints	141
6.1	Introduction.....	141
6.2	Impact Damage of Scarf Joints and Repairs.....	143
6.3	Effects of Disbond on Joint Strength.....	148
6.4	Design Methods	153
	6.4.1 Average Stress	153
	6.4.2 Linear Elastic Fracture Mechanics.....	154

6.4.3	Virtual Crack Closure Technique (VCCT).....	156
6.4.4	Cohesive Zone Model (CZM).....	156
6.5	Verifications.....	157
6.5.1	Finite Element Model (FEM).....	157
6.5.2	Strength Prediction of Scarf Joints.....	158
6.6	Fatigue Disbond Growth Life	163
6.6.1	Method.....	163
6.6.2	Experimental Validation.....	164
6.6.3	Comparison between Analysis and Experiments.....	165
6.7	Discussion	168
6.8	Summary	169
	References.....	169
CHAPTER 7	Design and Analysis of Doubler Repairs	173
7.1	Introduction.....	173
7.2	Repair Analysis for Elliptical Damages.....	174
7.2.1	Elastic Solution for an Elliptical Hole in an Anisotropic Plate	175
7.2.2	Elastic Solution for an Elliptical Inhomogeneity in a 2D Anisotropic Plate	179
7.2.3	Two-Stage Analysis Procedure for Determining Load Attraction and Stress Concentration	182
7.2.4	Strength Assessment for an After Repair Damaged Skin Laminate.....	190
7.2.5	Bond Line Analysis by Bonded Joint or Bonded Doubler Methods	192
7.3	Repair Analysis for Crack-Like Damages	194
7.3.1	Wang and Rose's Crack Bridging Model.....	195
7.3.2	Two-Stage Analysis Procedure for Crack Patching	199
7.4	Patch Design for an Elliptical Damage.....	205
7.4.1	Design Criteria and Guidelines	206
7.4.2	Patch Design Algorithm	207
7.5	Summary	209
	References.....	209
CHAPTER 8	Design and Optimization of Scarf Repairs	211
8.1	Introduction.....	211
8.2	Residual Strength of Scarfed Laminates.....	213
8.2.1	Tension and Compression Loading.....	215
8.2.2	Predictive Modeling	220
8.3	Shape Optimization of Scarf Repairs.....	222
8.3.1	Assessment of Existing Shaping Methods.....	223

8.3.2 Optimum Solution	227
8.3.3 Case Studies.....	231
8.4 Structural Doublers.....	233
References.....	238

PART 2 MANUFACTURING AND INSPECTION

CHAPTER 9 Repair Manufacturing Processes	243
9.1 Introduction.....	243
9.2 Scarfing Operation.....	243
9.3 Repair Patch Manufacturing.....	247
9.3.1 Soft Patch.....	248
9.3.2 Molded Patch.....	250
9.4 Surface Treatment.....	251
9.5 Adhesive Bonding	256
9.6 Repair of Thick Laminates.....	261
References.....	263
CHAPTER 10 Non-Destructive Evaluation of Bond Quality	265
10.1 Introduction.....	265
10.2 Detection of Disbonds	267
10.3 Detection of Weak Adhesion Bonds.....	275
10.4 Local Bond Proof Testing	278
10.5 Satellite Coupon Proof Test	282
References.....	284
Index	287
