

CONTENTS

<i>Preface</i>	<i>vii</i>
<i>Acknowledgements</i>	<i>x</i>
1. Role of Statutes in Electrical Systems Design	1
1.1 The Electricity Act, 2003	1
1.2 Indian Electricity Rules 1956	3
1.3 National Electrical Code (NEC)	4
1.4 International Electrotechnical Commission (IEC)	5
1.5 Standard Values of Voltages	7
1.6 Voltage Limits for Alternating Current Systems	7
1.7 Safety Aspects of Electrical System Design	7
1.8 Graphic Symbols for Diagrams (NEC-2011)	9
1.9 Some Important BIS Specifications	12
2. Design Aspects of Electrical Systems	15
2.1 Classification of Building Services	15
2.2 Design Aspects of Lighting Services	16
2.3 Design Aspects of Ventilation	17
2.4 Design Aspects of Climate Control	20
2.5 Design Aspects of Vertical Transportation	21
2.6 Design Aspects of Minor Building Services	21
3. Principles of Lighting Design	23
3.1 Light Sources	23
3.2 Lighting Calculations	44
3.3 Point by Point Method	44
3.4 Average Lumen Method	46
3.5 Lumen	47
3.6 Light Loss Factor (LLF)	47
3.7 Quality of Lighting	50
3.8 Design Procedures	52
3.9 Arrangement of Fixtures	55
4. Electrical Installations in Domestic Buildings	65
4.1 Classification	65
4.2 Estimation of Load Requirements	73
4.3 Selection of Type of Wiring	86

4.4	Special Features Applicable for High-Rise Apartment Buildings	91
4.5	Precommissioning Tests	98
5.	Industrial Installations	105
5.1	Introduction	106
5.2	Classification of Industrial Buildings	106
5.3	General Characteristics	107
5.4	Selection of Distribution Architecture	111
5.5	Selection of Transformer Substations	124
5.6	Selection of Drives	136
5.7	Short Circuit Studies	165
5.8	Selection of Switchgears	178
5.9	Switchboards in MV Installations	214
6.	Cable Sizing and Voltage Drop Calculations	217
6.1	Introduction	217
6.2	Voltage Designation	218
6.3	Choice of Materials used in Cables	218
6.4	Current Carrying Capacity	221
6.5	Short-Circuit Ratings	224
6.6	Voltage Drop Calculation	224
6.7	General Methods of Cable Laying	243
6.8	Simplified Approach for Cable Selection	248
7.	Exterior Lighting	253
7.1	Introduction	253
7.2	General Considerations	253
7.3	Road Lighting	258
7.4	Area Lighting	263
7.5	High Mast Lighting	265
8.	Power Factor Improvement	269
8.1	Nature of Reactive Energy	269
8.2	Power Factor	270
8.3	How to Improve the Power Factor	272
8.4	Location of Capacitors	274
8.5	Optimal Compensation	275
8.6	Power Factor Correction of Induction Motors	279
8.7	Protection and Control	280
8.8	Voltage Transients	282
8.9	Switching Considerations	282

9. Power Quality Issues and Resonance Problems in System Design	287
9.1 Introduction	287
9.2 Overview of Power Quality Issues	289
9.3 Harmonics	289
9.4 Sources of Harmonics	294
9.5 Disturbances Caused by Harmonics	297
9.6 Methods to Reduce The Impact of Harmonics	314
9.7 Design of Detuned Capacitor Bank (Harmonic Filter)	317
9.8 IEEE Standard 519-1992	326
9.9 IEEE 519-1992 Voltage Distortion Limits	331
9.10 Summary of Detuned Harmonic Filter Design	331
10. Energy Economics in System Design	335
10.1 Introduction	335
10.2 Time Value of Money	335
10.3 Single Payment Compound Amount Model (SPCA)	336
10.4 Uniform Series Compound Amount Model (USCA)	336
10.5 Uniform Series Present Worth Model (USPW)	337
10.6 Depreciation	341
10.7 Tax Considerations	345
10.8 After Tax Analysis	345
10.9 Conclusion	349
11. Power System Earthing	351
11.1 Introduction	351
11.2 Types of System Earthing	352
11.3 TN System	353
11.4 TT System	356
11.5 IT System	357
11.6 Main Characteristics of the Earthing Systems	359
11.7 Selection Criteria for Earthing	360
11.8 Earth Leakage Protection	361
12. Solar PV Systems for Household Applications	369
12.1 Introduction	369
12.2 Types of PV Electrical Systems	370
12.3 System Components	372
12.4 Typical Design for Home Applications	378
12.5 Estimating the Wh/Day that can be used for a Particular Size of Panel	388

13. Emergency and Standby Generation	393
13.1 Introduction	393
13.2 Ratings of the Standby Generating Sets	394
13.3 Starting and Stopping of Generator Sets	396
13.4 Stand-alone Operation	397
13.5 Parallel Operation with Utility Supply	397
13.6 General Requirements of Installation of MV Standby Generators [2]	400
13.7 Guidelines for Generators Running in Parallel	401
13.8 Guidelines for Generators Installed Aboveground Level	402
13.9 Guidelines for Portable Generators	402
Appendix	405
Bibliography	415
Index	416
