Preface vi

Acknowledgments vii

Chapter 1	Exercise Metabolism	1
	Foundations of Metabolism	1
	Energy Transfer	2
	Energy Substrates for Metabolism	4
	Energy Systems	6
	Total Yield From Metabolism	17
	Metabolic Regulation During Exercise	18
	Factors That Influence Exercise Metabolism	22
	Summary	23
	Definitions	23
Chapter 2	Dynamics of Skeletal-Neuromuscular and Gastrointestinal Physiology	25
	Structure of Skeletal Muscle and Mechanisms of Contraction	25
	Neuromuscular Control of Movement	31
	Functional Properties of Muscle	37
	Regulatory Control of the GI System	40
	Smooth Muscle	43
	Overview of the GI Organs	43
	Summary	48
	Definitions	48
Chapter 3	Cardiovascular System: Function and Control	51
	General Anatomy of the Cardiovascular System	51
	Mechanisms of Contraction	53
	Cardiac Electrophysiology	57
	Conduction System and Electrocardiogram	59
	Coronary Blood Supply	61
	Cardiac Cycle and Mechanics	63
	Cardiac Performance	64
	Changes in Heart Rate, Stroke Volume, and Cardiac Output During an Acute Bout of Exercise	67
	Circulatory Hemodynamics and Distribution of Blood Flow	70
	Transport of O ₂ and CO ₂	74
	Cardiorespiratory Fitness: The Whole Picture	77
	Cardiovascular Regulation	77
	Other Important Topics in Advanced Cardiovascular Exercise Physiology	80
	The Kidneys and Exercise	82
	Summary	82
	Definitions	83

Chapter 4	Pulmonary Exercise Physiology	85
	Lung Structure and Function	85
	Exercise and Lung Function	94
	Illness	101
	Summary	104
	Definitions	104
Chapter 5	Immune and Endocrine System	107
	Immune System Components and Function	107
	Exercise and Immune Function	110
	Acute Exercise and the Immune Response	110
	Exercise Endocrinology	114
	Hormone Control of the Cardiorespiratory System During Aerobic Exercise	116
	Hormone Control of Substrate Availability During Aerobic Exercise	117
	Hormone Control of Fluid and Electrolyte Balance During Aerobic Exercise	119
	Hormone Response After Aerobic Exercise Training	119
	Endocrine Response During Anaerobic or Resistance Exercise	120
	Hormone Response During Acute Anaerobic Exercise	120
	Endocrine Adaptations to Anaerobic Exercise Training	121
	Summary	122
	Definitions	123
Chapter 6	Principles for Testing and Training for Aerobic Power	125
	Work and Power	125
	Direct and Indirect Measurement of Energy Production	126
	Net O_2 Cost of Exercise	128
	Caloric Equivalent of O_2	129
	Protocols for Assessing Aerobic Power	132
	Matching Training Regimen to Energy and Organ Systems and Training to Improve Aerobic Power	137
	Physiological Adaptations Attributable to Aerobic Training	142
	Summary	156
	Definitions	156
Chapter 7	Principles for Testing and Training: Anaerobic Strength, Power, and Range of Motion	157
	Anaerobic Exercise Training Principles	157
	Resistance Testing and Training	172
	Range of Motion	191
	Putting it All Together	200
	Summary	204
	Definitions	204
Chapter 8	Body Composition and Weight Management	207
	Body Composition Models and Theories	207
	Weight Management Principles	218
	Summary	226
	Definitions	227

Chapter 9	Performance: Environmental Stressors, Genetics, Nutrition, and Ergogenic Aids	229
	Exercise and the Environment	229
	Performance Exercise Physiology	253
	Summary	267
	Definitions	270
Chapter 10	Physical Activity and Exercise for Health and Fitness	271
	Epidemiology of Physical Activity, Inactivity, and Exercise	271
	Relationship Between Physical Activity, Exercise, Fitness, and Disease Prevention	272
	Proper Screening Before Exercise and the Risks Associated With Exercise	280
	How Much Exercise is Enough?	283
	Exercise in the Treatment of Common Noncommunicable Chronic Diseases	285
	Challenges of Exercise Adherence and Facilitating Behavior Change	291
	Summary	293
	Definitions	293
Chapter 11	Emerging Concepts: Exercise Pharmacology and Exercise Genomics	295
	Exercise Pharmacology	295
	Exercise Genomics	301
	Summary	308
	Definitions	308
Appendix A:	Calculations for Oxygen Consumption and Carbon Dioxide Production	311
Appendix B:	Efficiency and Energy Expenditure	313
Appendix C:	Metabolic Equivalent of Task Values of Common Activities	315
Appendix D:	Professionalization of the Exercise Professional	319
Appendix E:	Common Scientific Abbreviations and Units	327
