

# Contents

Introduction	1
Getting Started	3
<b>1. Statistical Vocabulary</b>	<b>7</b>
Descriptive Statistics	7
Measures of Central Tendency	8
Measures of Dispersion	10
BOX. Mean and Standard Deviation Formulas	14
Distributions and Their Shapes	15
Conclusion	19
EXERCISES	20
<b>2. Reasoning with Probability</b>	<b>21</b>
Outcome Tables	21
Contingency Tables	27
BOX. Make Your Own Tables with R	30
Conclusion	34
EXERCISES	35
<b>3. Probabilities in the Long Run</b>	<b>37</b>
Sampling	38
Repetitious Sampling with R	40
Using Sampling Distributions and Quantiles to Think about Probabilities	45

Conclusion	49	
EXERCISES	50	
<b>4. Introducing the Logic of Inference Using Confidence Intervals</b>		<b>52</b>
Exploring the Variability of Sample Means with Repetitious Sampling	57	
Our First Inferential Test: The Confidence Interval	60	
BOX. Formulas for the Confidence Interval	61	
Conclusion	64	
EXERCISES	65	
<b>5. Bayesian and Traditional Hypothesis Testing</b>		<b>67</b>
BOX. Notation, Formula, and Notes on Bayes' Theorem	69	
BOX. Markov-Chain Monte Carlo Overview	71	
BOX. Detailed Output from BESTmcmc()	74	
The Null Hypothesis Significance Test	77	
BOX. The Calculation of $t$	80	
Replication and the NHST	83	
Conclusion	84	
EXERCISES	85	
<b>6. Comparing Groups and Analyzing Experiments</b>		<b>88</b>
BOX. Formulas for ANOVA	93	
Frequentist Approach to ANOVA	95	
BOX. More Information about Degrees of Freedom	99	
The Bayesian Approach to ANOVA	102	
BOX. Giving Some Thought to Priors	103	
BOX. Interpreting Bayes Factors	110	
Finding an Effect	111	
Conclusion	115	
EXERCISES	117	
<b>7. Associations between Variables</b>		<b>119</b>
BOX. Formula for Pearson's Correlation	126	
Inferential Reasoning about Correlation	127	
BOX. Reading a Correlation Matrix	129	
Null Hypothesis Testing on the Correlation	132	
Bayesian Tests on the Correlation Coefficient	135	
Categorical Associations	138	
Exploring the Chi-Square Distribution with a Simulation	141	
The Chi-Square Test with Real Data	146	
The Bayesian Approach to the Chi-Square Test	147	
Conclusion	154	
EXERCISES	155	

<b>8. Linear Multiple Regression</b>	<b>157</b>
BOX. Making Sense of Adjusted <i>R</i> -Squared	169
The Bayesian Approach to Linear Regression	172
A Linear Regression Model with Real Data	176
Conclusion	179
EXERCISES	181
<b>9. Interactions in ANOVA and Regression</b>	<b>183</b>
Interactions in ANOVA	186
BOX. Degrees of Freedom for Interactions	187
BOX. A Word about Standard Error	193
Interactions in Multiple Regression	195
BOX. Diagnosing Residuals and Trying Alternative Models	200
Bayesian Analysis of Regression Interactions	204
Conclusion	208
EXERCISES	209
<b>10. Logistic Regression</b>	<b>211</b>
A Logistic Regression Model with Real Data	221
BOX. Multinomial Logistic Regression	222
Bayesian Estimation of Logistic Regression	228
Conclusion	232
EXERCISES	234
<b>11. Analyzing Change over Time</b>	<b>235</b>
Repeated-Measures Analysis	237
BOX. Using ezANOVA	244
Time-Series Analysis	246
Exploring a Time Series with Real Data	259
Finding Change Points in Time Series	263
Probabilities in Change-Point Analysis	266
BOX. Quick View of ARIMA	268
Conclusion	270
EXERCISES	272
<b>12. Dealing with Too Many Variables</b>	<b>274</b>
BOX. Mean Composites versus Factor Scores	281
Internal Consistency Reliability	282
Rotation	285
Conclusion	288
EXERCISES	289
<b>13. All Together Now</b>	<b>291</b>
The Big Picture	294

<b>APPENDIX A. Getting Started with R</b>	<b>297</b>
Running R and Typing Commands	298
Installing Packages	301
Quitting, Saving, and Restoring	303
Conclusion	303
 <b>APPENDIX B. Working with Data Sets in R</b>	 <b>304</b>
Data Frames in R	305
Reading into Data Frames from External Files	309
 <b>APPENDIX C. Using dplyr with Data Frames</b>	 <b>310</b>
 References	 <b>313</b>
