Preface *xvii*

Acknowledgments *xix*

1	General Aspects of Thermodynamics	1
1.1	Introduction	1
1.2	Dimensions and Units	2
1.2.1	Systems of Units	2
1.2.1.1	Mass	2
1.2.1.2	Length	2
1.2.1.3	Force	3
1.2.1.4	Density and Specific Volume	3
1.2.1.5	Mass Flow Rate and Volumetric Flow Rate	3
1.2.1.6	Temperature	4
1.2.1.7	Pressure	6
1.3	Thermodynamics	9
1.3.1	Thermodynamic Systems	9
1.3.2	Thermodynamic Laws	10
1.3.3	First Law of Thermodynamics	10
1.3.4	Second Law of Thermodynamics	12
1.3.4.1	Exergy and its Importance	13
1.3.4.2	Reversibility and Irreversibility	15
1.3.4.3	Reversible Work and Exergy Destruction	15
1.3.5	Dincer's Six-step Approach	15
1.3.6	Pure Substances	25
1.3.6.1	State and Change of State	25
1.3.6.2	Vapor States	27
1.3.6.3	Sensible Heat, Latent Heat and Latent Heat of Fusion	27
1.3.6.4	Specific Heat	27
1.3.6.5	Specific Internal Energy	28
1.3.6.6	Specific Enthalpy	28
1.3.6.7	Specific Entropy	28
1.3.6.8	Energy Change and Energy Transfer	29
1.3.6.9	Flow Energy	29
1.3.6.10	Heat Transfer	29
1.3.6.11	Work	30

1.3.6.12	Thermodynamic Tables	30
1.4	Ideal and Real Gases	30
1.5	Refrigerators and Heat Pumps	36
1.5.1	The Carnot Refrigerators and Heat Pumps	38
1.6	Psychrometrics	49
1.6.1	Common Definitions in Psychrometrics	50
1.6.2	Balance Equations for Air and Water Vapor Mixtures	52
1.6.3	The Psychrometric Chart	53
1.7	Concluding Remarks	64
	Nomenclature	64
	Study Problems	67
	References	70
2	Refrigerants	71
2.1	Introduction	71
2.2	Classification of Refrigerants	72
2.2.1	Halocarbons	72
2.2.2	Hydrocarbons	73
2.2.3	Inorganic Compounds	74
2.2.3.1	Ammonia (R-717)	74
2.2.3.2	Carbon dioxide (R-744)	75
2.2.3.3	Air (R-729)	75
2.2.4	Azeotropic mixtures	75
2.2.5	Nonazeotropic mixtures	76
2.3	Prefixes and Decoding of Refrigerants	76
2.3.1	Prefixes	76
2.3.2	Decoding the Number	77
2.3.3	Isomers	78
2.4	Secondary Refrigerants	79
2.5	Refrigerant-absorbent Combinations	80
2.6	Stratospheric Ozone Layer	82
2.6.1	Stratospheric Ozone Layer Depletion	84
2.6.2	Ozone Depletion Potential	85
2.6.3	Montreal Protocol	88
2.7	Global Warming	89
2.7.1	Global Warming Potential	93
2.8	Clean Air Act	94
2.8.1	Significant New Alternative Policies Program	94
2.8.2	Classification of Substances	96
2.9	Key Refrigerants	103
2.9.1	R-134a	103
2.9.2	R-123	105
2.9.3	Nonazeotropic (Zeotropic) Mixtures	106
2.9.4	Azeotropic Mixtures	108
2.9.5	Ammonia (R-717)	110
2.9.6	Propane (R-290)	111
2.9.7	Carbon Dioxide (R-744)	113

2.10	Selection of Refrigerants	115
2.11	Thermophysical Properties of Refrigerants	116
2.12	Lubricating Oils and their Effects	120
2.13	Concluding Remarks	122
	Study Problems	122
	References	125
3	Refrigeration System Components	127
3.1	Introduction	127
3.2	History of Refrigeration	128
3.3	Main Refrigeration Systems	130
3.4	Refrigeration System Components	131
3.5	Compressors	132
3.5.1	Hermetic Compressors	133
3.5.2	Semi-hermetic Compressors	135
3.5.3	Open Compressors	136
3.5.4	Classification of Compressors	136
3.5.5	Positive Displacement Compressors	137
3.5.5.1	Reciprocating Compressors	137
3.5.5.2	Rotary Compressors	137
3.5.6	Dynamic Compressors	144
3.5.6.1	Centrifugal Compressors	144
3.5.6.2	Axial Compressors	147
3.5.7	Thermodynamic Analysis of Compressor	147
3.5.8	Compressor Capacity and Performance Assessment	149
3.5.8.1	Compression Ratio	149
3.5.8.2	Compressor Efficiency	150
3.5.8.3	Compressor Capacity Control for Better Performance	151
3.6	Condensers	156
3.6.1	Water-cooled Condensers	157
3.6.2	Air-cooled Condensers	157
3.6.3	Evaporative Condensers	158
3.6.4	Cooling Towers	159
3.6.5	Thermodynamic Analysis of Condenser	160
3.7	Evaporators	165
3.7.1	Liquid Coolers	165
3.7.2	Air and Gas Coolers	166
3.7.3	Thermodynamic Analysis of Evaporator	167
3.8	Throttling Devices	172
3.8.1	Thermostatic Expansion Valves	172
3.8.2	Constant Pressure Expansion Valves	173
3.8.3	Float Valves	173
3.8.4	Capillary Tubes	174
3.8.5	Thermodynamic Analysis of Throttling Valve	174
3.9	Auxiliary Devices	177
3.9.1	Accumulators	177
3.9.2	Receivers	178

3.9.3	Oil Separators	178
3.9.4	Strainers	179
3.9.5	Dryers	179
3.9.6	Check Valves	179
3.9.7	Solenoid Valves	179
3.9.8	Defrost Controllers	179
3.10	Concluding Remarks	180
	Nomenclature	180
	Study Problems	182
	References	187
4	Refrigeration Cycles and Systems	189
4.1	Introduction	189
4.2	Vapor-compression Refrigeration Systems	189
4.2.1	Evaporation	190
4.2.2	Compression	190
4.2.3	Condensation	190
4.2.4	Expansion	191
4.3	Energy Analysis of Vapor-compression Refrigeration Cycle	192
4.4	Exergy Analysis of Vapor-compression Refrigeration Cycle	195
4.5	Actual Vapor-compression Refrigeration Cycle	200
4.5.1	Superheating and Subcooling	201
4.5.1.1	Superheating	201
4.5.1.2	Subcooling	203
4.5.2	Defrosting	204
4.5.3	Purging Air in Refrigeration Systems	205
4.5.3.1	Air Purging Methods	206
4.5.4	Twin Refrigeration System	209
4.6	Air-standard Refrigeration Systems	210
4.6.1	Energy and Exergy Analyses of a Basic Air-standard Refrigeration Cycle	211
4.7	Absorption Refrigeration Systems	216
4.7.1	Basic Absorption Refrigeration Systems	218
4.7.2	Ammonia–water ($\text{NH}_3\text{--H}_2\text{O}$) Absorption Refrigeration Systems	219
4.7.3	Energy Analysis of an Absorption Refrigeration System	221
4.7.4	Three-fluid (Gas Diffusion) Absorption Refrigeration Systems	224
4.7.5	Water–lithium Bromide ($\text{H}_2\text{O--LiBr}$) Absorption Refrigeration Systems	225
4.7.5.1	Single-effect Absorption Refrigeration Systems	226
4.7.5.2	Double-effect Absorption Refrigeration Systems	227
4.7.5.3	Crystallization	229
4.7.6	Steam Ejector Recompression Absorption Refrigeration Systems	230
4.7.7	Electrochemical Absorption Refrigeration Systems	231
4.7.8	Absorption-augmented Refrigeration System	232
4.7.9	Exergy Analysis of an Absorption Refrigeration System	239
4.7.10	Performance Evaluation of an Absorption Refrigeration System	243
4.8	Concluding Remarks	245

	Nomenclature	245
	Study Problems	247
	References	258
5	Advanced Refrigeration Cycles and Systems	261
5.1	Introduction	261
5.2	Multistage Refrigeration Cycles	262
5.3	Cascade Refrigeration Systems	268
5.3.1	Two-stage Cascade Systems	269
5.3.2	Three-stage (Ternary) Cascade Refrigeration System	274
5.4	Multi-effect Absorption Refrigeration Systems	280
5.5	Steam-jet Refrigeration Systems	311
5.6	Adsorption Refrigeration	317
5.7	Stirling Cycle Refrigeration	322
5.7.1	Performance Assessment	325
5.8	Thermoelectric Refrigeration	328
5.8.1	Performance Assessment of Thermoelectric Coolers	329
5.9	Thermoacoustic Refrigeration	332
5.10	Metal Hydride Refrigeration	334
5.10.1	Operational Principles	335
5.10.2	Regeneration Process	336
5.10.3	Refrigeration Process	336
5.11	Magnetic Refrigeration	337
5.11.1	Magnetic Refrigeration Cycle	339
5.11.2	Active Magnetic Regenerators	340
5.12	Supermarket Refrigeration Practices	345
5.12.1	Direct Expansion Systems	346
5.12.2	Distributed Systems	347
5.12.3	Secondary Loop Systems	348
5.13	Concluding Remarks	349
	Nomenclature	349
	Study Problems	351
	References	354
6	Renewable Energy-based Integrated Refrigeration Systems	357
6.1	Introduction	357
6.2	Solar-powered Absorption Refrigeration Systems	358
6.3	Solar-powered Vapor-compression Refrigeration Systems	364
6.4	Wind-powered Vapor-compression Refrigeration Systems	368
6.5	Hydropowered Vapor-compression Refrigeration Systems	371
6.6	Geothermal-powered Vapor-compression Refrigeration Systems	375
6.7	Ocean Thermal Energy Conversion Powered Vapor-compression Refrigeration Systems	379
6.8	Biomass-powered Absorption Refrigeration Systems	383
6.9	Concluding Remarks	393
	Nomenclature	394

Study Problems	395
Reference	398

7	Heat Pipes	399
7.1	Introduction	399
7.2	Heat Pipes	400
7.2.1	Heat Pipe Use	403
7.3	Heat Pipe Applications	403
7.3.1	Heat Pipe Coolers	404
7.3.2	Insulated Water Coolers	404
7.3.3	Heat Exchanger Coolers	404
7.4	Heat Pipes for Electronics Cooling	405
7.5	Types of Heat Pipes	407
7.5.1	Micro Heat Pipes	408
7.5.2	Cryogenic Heat Pipes	408
7.6	Heat Pipe Components	408
7.6.1	Container	410
7.6.2	Working Fluid	411
7.6.3	Selection of Working Fluid	413
7.6.4	Wick or Capillary Structure	414
7.7	Operational Principles of Heat Pipes	417
7.7.1	Heat Pipe Operating Predictions	418
7.7.1.1	Gravity-aided Orientation	419
7.7.1.2	Horizontal Orientation	419
7.7.1.3	Against Gravity Orientation	420
7.7.2	Heat Pipe Arrangement	421
7.8	Heat Pipe Performance	421
7.8.1	Effective Heat Pipe Thermal Resistance	423
7.9	Design and Manufacture of Heat Pipes	424
7.9.1	Thermal Conductivity of a Heat Pipe	427
7.9.2	Common Heat Pipe Diameters and Lengths	427
7.10	Heat-transfer Limitations	428
7.11	Heat Pipes in Heating, Ventilating and Air Conditioning	429
7.11.1	Dehumidifier Heat Pipes	430
7.11.1.1	Working Principle	431
7.11.1.2	Indoor Dehumidifier Heat Pipes	432
7.11.2	Energy Recovery Heat Pipes	433
7.12	Concluding Remarks	436
	Nomenclature	436
	Study Problems	437
	References	439
8	Food Refrigeration	441
8.1	Introduction	441
8.2	Food Deterioration	442
8.3	Food Preservation	443
8.4	Food Quality	444

8.5	Food Precooling and Cooling	446
8.6	Food Precooling Systems	448
8.6.1	Energy Coefficient	449
8.6.2	Hydrocooling	450
8.6.2.1	Hydrocooling using Ice or Ice-slush Cooling	453
8.6.2.2	Hydrocooling using Artificial Ice	453
8.6.2.3	Hydrocooling using Natural Ice	454
8.6.2.4	Hydrocooling using Natural Snow	455
8.6.2.5	Hydrocooling using Compacted Snow	455
8.6.3	Forced-air Cooling	456
8.6.3.1	Methods of Forced-air Cooling	459
8.6.3.2	Cold-wall-type Tunnel Forced-air Cooling	461
8.6.3.3	Serpentine Cooling	463
8.6.3.4	Single-pallet Forced-air Cooling	464
8.6.3.5	Room Cooling (with Storage and Shipping)	464
8.6.3.6	Ice-bank Forced-air Cooling System	464
8.6.3.7	Forced-air Cooling with Winter Coldness	465
8.6.3.8	Technical Details of Forced-air Cooling Systems	466
8.6.3.9	Engineering/economic Model for Forced-air Cooling Systems	468
8.6.4	Hydraircooling	469
8.6.5	Vacuum Cooling	471
8.6.6	Hydrovac Cooling	475
8.6.7	Evaporative Cooling	475
8.6.8	Ice Cooling	476
8.7	Precooling of Milk	477
8.8	Food Freezing	479
8.9	Cool and Cold Storage	480
8.9.1	Chilling Injury	481
8.9.2	Optimum Storage Conditions	481
8.9.2.1	Optimum Temperature	481
8.9.2.2	Optimum Relative Humidity	482
8.9.3	Technical Aspects of Cold Stores	485
8.9.3.1	Shape and Size	486
8.9.3.2	Construction Methods	486
8.9.3.3	Insulation	487
8.9.3.4	Vapor Barriers	488
8.9.3.5	Floors	488
8.9.3.6	Cold-air Distribution	488
8.9.3.7	Defrosting	489
8.9.3.8	Cold Store Planning	489
8.9.3.9	Refrigeration	490
8.9.4	Calculation of Cold Store Refrigeration Loads	490
8.9.5	Energy-efficient Cold Store	492
8.9.6	Photovoltaic-powered Cold Store	493
8.10	Controlled Atmosphere Storage	496
8.10.1	Controlled Atmosphere Storage Ripening and Waxing	500
8.10.2	Container-controlled Atmospheres	501

8.10.2.1	Controlled Modified Atmosphere Systems	501
8.10.2.2	Modified Atmospheres in Containers	502
8.10.2.3	Modified Atmospheres in Packaging	502
8.10.2.4	Pressure Swing Absorption Systems	502
8.10.2.5	Membrane Separation Systems	502
8.10.3	Packaging	503
8.10.4	Definitions	503
8.10.5	Modified Atmosphere Packaging	503
8.10.6	Modified Atmosphere Cooling	505
8.11	Refrigerated Transport	506
8.11.1	Reefer Technology	507
8.11.1.1	Controlled-atmosphere Reefer Containers	507
8.11.2	Quality Aspects of Products	507
8.11.3	Effective Packaging for Quality	508
8.11.4	Transport Storage	509
8.11.5	Temperature Control	511
8.11.5.1	Temperature Control and Monitoring	512
8.11.5.2	Temperature Monitoring Systems	513
8.11.6	Transportation Aspects	513
8.11.7	Recommended Transit and Storage Procedures	514
8.11.8	Developments in Refrigerated Transport	514
8.11.8.1	Sea and Land Transport	515
8.11.8.2	Air Transport	515
8.12	Respiration (Heat Generation)	515
8.12.1	Measurement of Respiratory Heat Generation	516
8.13	Transpiration (Moisture Loss)	516
8.13.1	Shrinkage	521
8.14	Cooling Process Parameters	522
8.14.1	Cooling Coefficient	522
8.14.2	Lag Factor	523
8.14.3	Half Cooling Time	523
8.14.4	Seven-eighths Cooling Time	523
8.15	Analysis of Cooling Process Parameters	524
8.15.1	Lin <i>et al.</i> 's Model for Irregular Shapes	527
8.16	Fourier–Reynolds Correlations	529
8.16.1	Development of Fourier–Reynolds Correlations	530
8.17	Cooling Heat-transfer Parameters	533
8.17.1	Specific Heat	533
8.17.1.1	Some Correlations for Specific Heat	534
8.17.2	Thermal Conductivity	535
8.17.2.1	Some Correlations for Thermal Conductivity	536
8.17.3	Thermal Diffusivity	538
8.17.4	Effective Heat-transfer Coefficients	540
8.17.4.1	Smith <i>et al.</i> 's Model	543
8.17.4.2	Ansari's Model	544

8.17.4.3	Stewart <i>et al.</i> 's Model	544
8.17.4.4	Dincer and Dost's Models	545
8.17.4.5	Some Methods for Effective Heat-transfer Coefficients	546
8.17.5	Modeling for Thermal Diffusivity and Heat-transfer Coefficient	547
8.17.6	Effective Nusselt–Reynolds Correlations	555
8.17.7	The Dincer Number	557
