<b>Preface</b>	<b>xi</b>	6.3 Direct proportion	46
<b>Acknowledgements</b>	<b>xiii</b>	6.4 Inverse proportion	50
<b>1 Basic arithmetic</b>	<b>1</b>	<b>7 Powers, roots and laws of indices</b>	<b>52</b>
1.1 Introduction	1	7.1 Introduction	52
1.2 Revision of addition and subtraction	2	7.2 Powers and roots	52
1.3 Revision of multiplication and division	3	7.3 Laws of indices	54
1.4 Highest common factors and lowest common multiples	5	<b>8 Units, prefixes and engineering notation</b>	<b>59</b>
1.5 Order of operation and brackets	7	8.1 Introduction	59
<b>2 Fractions</b>	<b>9</b>	8.2 SI units	59
2.1 Introduction	9	8.3 Common prefixes	60
2.2 Adding and subtracting fractions	10	8.4 Standard form	63
2.3 Multiplication and division of fractions	12	8.5 Engineering notation	65
2.4 Order of operation with fractions	14	8.6 Metric conversions	67
		8.7 Metric - US/Imperial conversions	70
<b>Revision Test 1</b>	<b>16</b>		
<b>3 Decimals</b>	<b>17</b>	<b>9 Basic algebra</b>	<b>76</b>
3.1 Introduction	17	9.1 Introduction	76
3.2 Converting decimals to fractions and vice versa	17	9.2 Basic operations	77
3.3 Significant figures and decimal places	19	9.3 Laws of indices	80
3.4 Adding and subtracting decimal numbers	20	<b>10 Further algebra</b>	<b>84</b>
3.5 Multiplying and dividing decimal numbers	21	10.1 Introduction	84
<b>4 Using a calculator</b>	<b>23</b>	10.2 Brackets	84
4.1 Introduction	23	10.3 Factorisation	86
4.2 Adding, subtracting, multiplying and dividing	23	10.4 Laws of precedence	87
4.3 Further calculator functions	25	<b>11 Solving simple equations</b>	<b>90</b>
4.4 Evaluation of formulae	29	11.1 Introduction	90
<b>5 Percentages</b>	<b>35</b>	11.2 Solving equations	90
5.1 Introduction	35	11.3 Practical problems involving simple equations	94
5.2 Percentage calculations	36	<b>Revision Test 4</b>	<b>99</b>
5.3 Further percentage calculations	37	<b>Multiple choice questions Test 1</b>	<b>100</b>
5.4 More percentage calculations	39		
<b>Revision Test 2</b>	<b>42</b>	<b>12 Transposing formulae</b>	<b>102</b>
<b>6 Ratio and proportion</b>	<b>43</b>	12.1 Introduction	102
6.1 Introduction	43	12.2 Transposing formulae	102
6.2 Ratios	44	12.3 Further transposing of formulae	104
		12.4 More difficult transposing of formulae	107

<b>13 Solving simultaneous equations</b>	<b>111</b>	<b>18 Graphs reducing non-linear laws to linear form</b>	<b>175</b>
13.1 Introduction	111	18.1 Introduction	175
13.2 Solving simultaneous equations in two unknowns	111	18.2 Determination of law	175
13.3 Further solving of simultaneous equations	113	18.3 Revision of laws of logarithms	178
13.4 Solving more difficult simultaneous equations	115	18.4 Determination of laws involving logarithms	179
13.5 Practical problems involving simultaneous equations	117	<b>19 Graphical solution of equations</b>	<b>184</b>
13.6 Solving simultaneous equations in three unknowns	121	19.1 Graphical solution of simultaneous equations	184
<b>Revision Test 5</b>	<b>123</b>	19.2 Graphical solution of quadratic equations	186
<b>14 Solving quadratic equations</b>	<b>124</b>	19.3 Graphical solution of linear and quadratic equations simultaneously	190
14.1 Introduction	124	19.4 Graphical solution of cubic equations	190
14.2 Solution of quadratic equations by factorisation	125	<b>20 Graphs with logarithmic scales</b>	<b>193</b>
14.3 Solution of quadratic equations by 'completing the square'	127	20.1 Logarithmic scales and logarithmic graph paper	193
14.4 Solution of quadratic equations by formula	129	20.2 Graphs of the form $y = ax^n$	194
14.5 Practical problems involving quadratic equations	130	20.3 Graphs of the form $y = ab^x$	197
14.6 Solution of linear and quadratic equations simultaneously	133	20.4 Graphs of the form $y = ae^{kx}$	198
<b>15 Logarithms</b>	<b>134</b>	<b>Revision Test 7</b>	<b>201</b>
15.1 Introduction to logarithms	134	<b>21 Angles and triangles</b>	<b>203</b>
15.2 Laws of logarithms	136	21.1 Introduction	203
15.3 Indicial equations	139	21.2 Angular measurement	203
15.4 Graphs of logarithmic functions	140	21.3 Triangles	209
<b>16 Exponential functions</b>	<b>141</b>	21.4 Congruent triangles	213
16.1 Introduction to exponential functions	141	21.5 Similar triangles	215
16.2 The power series for $e^x$	142	21.6 Construction of triangles	217
16.3 Graphs of exponential functions	144	<b>22 Introduction to trigonometry</b>	<b>220</b>
16.4 Napierian logarithms	146	22.1 Introduction	220
16.5 Laws of growth and decay	149	22.2 The theorem of Pythagoras	220
<b>Revision Test 6</b>	<b>153</b>	22.3 Sines, cosines and tangents	223
<b>Multiple choice questions Test 2</b>	<b>154</b>	22.4 Evaluating trigonometric ratios of acute angles	225
<b>17 Straight line graphs</b>	<b>156</b>	22.5 Solving right-angled triangles	227
17.1 Introduction to graphs	156	22.6 Angles of elevation and depression	231
17.2 Axes, scales and co-ordinates	156	<b>Revision Test 8</b>	<b>234</b>
17.3 Straight line graphs	158	<b>23 Trigonometric waveforms</b>	<b>236</b>
17.4 Gradients, intercepts and equations of graphs	161	23.1 Graphs of trigonometric functions	236
17.5 Practical problems involving straight line graphs	168	23.2 Angles of any magnitude	237
		23.3 The production of sine and cosine waves	240
		23.4 Terminology involved with sine and cosine waves	240
		23.5 Sinusoidal form: $A \sin(\omega t \pm \alpha)$	243
		<b>24 Non-right-angled triangles and some practical applications</b>	<b>246</b>
		24.1 The sine and cosine rules	246
		24.2 Area of any triangle	247

24.3	Worked problems on the solution of triangles and their areas	247	<b>Revision Test 11</b>	<b>315</b>
24.4	Further worked problems on the solution of triangles and their areas	249	<b>30 Vectors</b>	<b>317</b>
24.5	Practical situations involving trigonometry	250	30.1	Introduction
24.6	Further practical situations involving trigonometry	252	30.2	Scalars and vectors
<b>25 Cartesian and polar co-ordinates</b>		<b>255</b>	30.3	Drawing a vector
25.1	Introduction	255	30.4	Addition of vectors by drawing
25.2	Changing from Cartesian to polar co-ordinates	255	30.5	Resolving vectors into horizontal and vertical components
25.3	Changing from polar to Cartesian co-ordinates	257	30.6	Addition of vectors by calculation
25.4	Use of Pol/Rec functions on calculators	258	30.7	Vector subtraction
<b>Revision Test 9</b>		<b>260</b>	30.8	Relative velocity
<b>Multiple choice questions Test 3</b>		<b>261</b>	30.9	$i$ , $j$ and $k$ notation
<b>26 Areas of common shapes</b>		<b>266</b>	<b>31 Methods of adding alternating waveforms</b>	<b>330</b>
26.1	Introduction	266	31.1	Combining two periodic functions
26.2	Common shapes	266	31.2	Plotting periodic functions
26.3	Areas of common shapes	269	31.3	Determining resultant phasors by drawing
26.4	Areas of similar shapes	276	31.4	Determining resultant phasors by the sine and cosine rules
<b>27 The circle and its properties</b>		<b>278</b>	31.5	Determining resultant phasors by horizontal and vertical components
27.1	Introduction	278	<b>Revision Test 12</b>	<b>338</b>
27.2	Properties of circles	278	<b>Multiple choice questions Test 4</b>	<b>340</b>
27.3	Radians and degrees	280	<b>32 Presentation of statistical data</b>	<b>343</b>
27.4	Arc length and area of circles and sectors	281	32.1	Some statistical terminology
27.5	The equation of a circle	285	32.2	Presentation of ungrouped data
<b>Revision Test 10</b>		<b>287</b>	32.3	Presentation of grouped data
<b>28 Volumes and surface areas of common solids</b>		<b>289</b>	<b>33 Mean, median, mode and standard deviation</b>	<b>355</b>
28.1	Introduction	289	33.1	Measures of central tendency
28.2	Volumes and surface areas of common shapes	289	33.2	Mean, median and mode for discrete data
28.3	Summary of volumes and surface areas of common solids	296	33.3	Mean, median and mode for grouped data
28.4	More complex volumes and surface areas	296	33.4	Standard deviation
28.5	Volumes and surface areas of frusta of pyramids and cones	302	33.5	Quartiles, deciles and percentiles
28.6	Volumes of similar shapes	306	<b>34 Probability</b>	<b>362</b>
<b>29 Irregular areas and volumes and mean values</b>		<b>307</b>	34.1	Introduction to probability
29.1	Areas of irregular figures	307	34.2	Laws of probability
29.2	Volumes of irregular solids	310	<b>Revision Test 13</b>	<b>369</b>
29.3	Mean or average values of waveforms	311	<b>Multiple choice questions Test 5</b>	<b>370</b>

<b>35 Introduction to differentiation</b>	<b>372</b>	37.3 Arithmetic progressions	405
35.1 Introduction to calculus	372	37.4 Geometric progressions	408
35.2 Functional notation	372	<b>38 Binary, octal and hexadecimal numbers</b>	<b>412</b>
35.3 The gradient of a curve	373	38.1 Introduction	412
35.4 Differentiation from first principles	374	38.2 Binary numbers	413
35.5 Differentiation of $y = ax^n$ by the general rule	375	38.3 Octal numbers	416
35.6 Differentiation of sine and cosine functions	378	38.4 Hexadecimal numbers	419
35.7 Differentiation of $e^{ax}$ and $\ln ax$	380	<b>39 Inequalities</b>	<b>423</b>
35.8 Summary of standard derivatives	381	39.1 Introduction to inequalities	423
35.9 Successive differentiation	382	39.2 Simple inequalities	424
35.10 Rates of change	382	39.3 Inequalities involving a modulus	424
35.11 Differentiation of a product	384	39.4 Inequalities involving quotients	425
35.12 Differentiation of a quotient	385	39.5 Inequalities involving square functions	426
35.13 Function of a function	386	39.6 Quadratic inequalities	427
<b>36 Standard integration</b>	<b>388</b>	<b>Revision Test 15</b>	<b>430</b>
36.1 The process of integration	388	<b>Multiple choice questions Test 7</b>	<b>431</b>
36.2 The general solution of integrals of the form $ax^n$	389	<b>List of formulae</b>	<b>432</b>
36.3 Standard integrals	389	<b>Answers to Practice Exercises</b>	<b>436</b>
36.4 Definite integrals	392	<b>Answers to multiple choice questions</b>	<b>455</b>
36.5 The area under a curve	394	<b>Index</b>	<b>456</b>
<b>Revision Test 14</b>	<b>399</b>		
<b>Multiple choice questions Test 6</b>	<b>401</b>		
<b>37 Number sequences</b>	<b>403</b>		
37.1 Simple sequences	403		
37.2 The $n$ th term of a series	404
