Preface	11
1 Introduction	13
1.1 Nonlinear Models	13
1.2 Nonlinear Phenomena	20
1.3 Overview of the Book	21
1.4 Exercises	22
2 Two-Dimensional Systems	27
2.1 Qualitative Behavior of Linear Systems	29
2.2 Qualitative Behavior Near Equilibrium Points	33
2.3 Multiple Equilibria	36
2.4 Limit Cycles	39
2.5 Numerical Construction of Phase Portraits	43
2.6 Exercises	45
3 Stability of Equilibrium Points	49
3.1 Basic Concepts	49
3.2 Linearization	55
3.3 Lyapunov's Method	57
3.4 The Invariance Principle	66
3.5 Exponential Stability	70
3.6 Region of Attraction	73
3.7 Converse Lyapunov Theorems	80
3.8 Exercises	82
4 Time-Varying and Perturbed Systems	87
4.1 Time-Varying Systems	87
4.2 Perturbed Systems	92
4.3 Boundedness and Ultimate Boundedness	97
4.4 Input-to-State Stability	106
4.5 Exercises	111

5	Passivity	115
5.1	Memoryless Functions	115
5.2	State Models	119
5.3	Positive Real Transfer Functions	124
5.4	Connection with Stability	127
5.5	Exercises	130
6	Input-Output Stability	133
6.1	$\mathcal{L}$ Stability	133
6.2	$\mathcal{L}$ Stability of State Models	139
6.3	$\mathcal{L}_2$ Gain	144
6.4	Exercises	149
7	Stability of Feedback Systems	153
7.1	Passivity Theorems	154
7.2	The Small-Gain Theorem	164
7.3	Absolute Stability	167
7.3.1	Circle Criterion	169
7.3.2	Popov Criterion	176
7.4	Exercises	180
8	Special Nonlinear Forms	183
8.1	Normal Form	183
8.2	Controller Form	191
8.3	Observer Form	199
8.4	Exercises	206
9	State Feedback Stabilization	209
9.1	Basic Concepts	209
9.2	Linearization	211
9.3	Feedback Linearization	213
9.4	Partial Feedback Linearization	219
9.5	Backstepping	223
9.6	Passivity-Based Control	229
9.7	Control Lyapunov Functions	234
9.8	Exercises	239
10	Robust State Feedback Stabilization	243
10.1	Sliding Mode Control	244
10.2	Lyapunov Redesign	263
10.3	High-Gain Feedback	269
10.4	Exercises	271

11	Nonlinear Observers	275
11.1	Local Observers	276
11.2	The Extended Kalman Filter	278
11.3	Global Observers	281
11.4	High-Gain Observers	283
11.5	Exercises	289
12	Output Feedback Stabilization	293
12.1	Linearization	294
12.2	Passivity-Based Control	295
12.3	Observer-Based Control	298
12.4	High-Gain Observers and the Separation Principle	300
12.5	Robust Stabilization of Minimum Phase Systems	308
12.5.1	Relative Degree One	308
12.5.2	Relative Degree Higher Than One	310
12.6	Exercises	315
13	Tracking and Regulation	319
13.1	Tracking	322
13.2	Robust Tracking	324
13.3	Transition Between Set Points	326
13.4	Robust Regulation via Integral Action	330
13.5	Output Feedback	334
13.6	Exercises	337
A	Examples	341
A.1	Pendulum	341
A.2	Mass–Spring System	343
A.3	Tunnel-Diode Circuit	345
A.4	Negative-Resistance Oscillator	347
A.5	DC-to-DC Power Converter	349
A.6	Biochemical Reactor	350
A.7	DC Motor	352
A.8	Magnetic Levitation	353
A.9	Electrostatic Microactuator	354
A.10	Robot Manipulator	356
A.11	Inverted Pendulum on a Cart	357
A.12	Translational Oscillator with Rotating Actuator	359
B	Mathematical Review	361

C Composite Lyapunov Functions	367
C.1 Cascade Systems	367
C.2 Interconnected Systems	369
C.3 Singularly Perturbed Systems	371
D Proofs	375
Bibliography	381
Symbols	392
Index	394
