

# Contents

<b>1</b>	<b>Introducing the cell: the unit of life</b>	<b>1</b>		
	<i>Carole Hackney and David Furness</i>			
1.1	Development of cell theory	4	3.1	Fine and gross anatomy, cells, tissues, organs and systems 86
1.2	Origins of cells	8	3.2	Embryology and fetal development 92
1.3	Diversity of prokaryotic cells	10	3.3	Growth and development 104
1.4	The general structure of eukaryotic cells	10		<i>Chapter summary</i> 108
1.5	Membrane systems	12		<i>Further reading</i> 109
1.6	Nucleus	16		<i>Discussion questions</i> 110
1.7	Cytoplasm	18	<b>4</b>	<b>Blood cell genesis: red cell, white cell and platelet families</b> 111
1.8	Membrane systems and disease	26		<i>Gavin Knight</i>
1.9	Cell division	35	4.1	Cellular components of the blood 111
1.10	Different cells and tissue formation	41	4.2	Introduction to blood cell production 117
	<i>Chapter summary</i>	44	4.3	Structure of the bone marrow 120
	<i>Further reading</i>	44	4.4	Stem cells as the ultimate haemopoietic precursor 122
	<i>Discussion questions</i>	45	4.5	Control of haemopoiesis 124
<b>2</b>	<b>Studying cells: essential techniques</b>	<b>46</b>	4.6	First stages of haemopoiesis 125
	<i>Gavin Knight</i>		4.7	Erythropoiesis 129
2.1	Where did the study of cells begin?	46	4.8	Hierarchy of erythropoiesis 130
2.2	Introduction to microscopy	47	4.9	Thrombopoiesis 132
2.3	Visualization of microscopic structures	60	4.10	Haemostasis and the role of platelets 134
2.4	Introduction to cytometrics	62	4.11	Granulopoiesis 135
2.5	Cytogenetic analysis	65	4.12	Monopoiesis 135
2.6	Molecular biology	70	4.13	Abnormal haemopoiesis 137
	<i>Chapter summary</i>	80		<i>Chapter summary</i> 139
	<i>Further reading</i>	80		<i>Further reading</i> 139
	<i>Discussion questions</i>	81		<i>Discussion questions</i> 139
<b>3</b>	<b>Introduction to anatomy and embryology</b>	<b>82</b>	<b>5</b>	<b>Nerves: the cells of the central and peripheral nervous systems</b> 141
	<i>Joanne Murray and Ian Locke</i>			<i>Rosalind King and Richard Mathias</i>
			5.1	Neurons 142

5.2	Glial cells	151	6.15	Pleura	215
5.3	Cells and structures of the peripheral nervous system	156		<i>Chapter summary</i>	218
5.4	Structural organization of the nervous system	162		<i>Further reading</i>	218
5.5	Functional divisions of the peripheral nervous system	168		<i>Discussion questions</i>	219
5.6	Sensory reception in the peripheral nervous system	171	<b>7</b>	<b>Digestive system</b>	<b>220</b>
5.7	Endocrine function and control in the central nervous system	177		<i>Tony Warford and Tony Madgwick</i>	
5.8	Tumours of the central nervous system	180	7.1	General structural arrangement	221
5.9	Pathological processes in the peripheral nervous system	182	7.2	Oral cavity	225
	<i>Chapter summary</i>	186	7.3	Oesophagus	231
	<i>Further reading</i>	186	7.4	Stomach	232
	<i>Discussion questions</i>	186	7.5	Small intestine	234
<b>6</b>	<b>Lungs: the cells of the respiratory system</b>	<b>187</b>	7.6	Large intestine	240
	<i>Behdad Shambayati and Andrew Evered</i>		7.7	The intestine and cancer	243
6.1	Respiratory epithelium	187		<i>Chapter summary</i>	243
6.2	Nasal cavity	190		<i>Further reading</i>	244
6.3	Paranasal sinuses	192		<i>Discussion questions</i>	245
6.4	Nasopharynx	194	<b>8</b>	<b>Cells and microbial flora of the gastrointestinal tract</b>	<b>246</b>
6.5	Larynx	194		<i>Kathy Nye</i>	
6.6	Trachea	196	8.1	General principles and the development of the normal microflora	247
6.7	Lungs	199	8.2	Regions of the GI tract and their normal microbial flora	250
6.8	Bronchial tree	200	8.3	Functions of the normal flora	254
6.9	Bronchioles	207	8.4	Normal flora in disease states	257
6.10	Respiratory bronchioles	211	8.5	Therapeutic manipulation of the normal flora	259
6.11	Alveolar ducts	211		<i>Chapter summary</i>	261
6.12	Alveoli	211		<i>Further reading</i>	261
6.13	Macrophages	214		<i>Discussion questions</i>	262
6.14	Blood vessels	215	<b>9</b>	<b>Cells of the cardiovascular and lymphatic systems</b>	<b>263</b>
				<i>Andrew Blann</i>	
			9.1	Overview of the cardiovascular and lymphatic systems	263

9.2	Cells of the cardiovascular and lymphatic systems	264	<b>12 Kidney and urinary tract</b>	<b>349</b>
9.3	Vessels of the cardiovascular and lymphatic systems	275	<i>Guy Orchard, David Muskett and Brian Nation</i>	
9.4	Organs of the cardiovascular and lymphatic systems	282	12.1 Embryology	352
9.5	Pathology of the cardiovascular and lymphatic systems	290	12.2 Kidney function	352
	<i>Chapter summary</i>	294	12.3 Kidney structure	354
	<i>Further reading</i>	294	12.4 Microscopic structural features	356
	<i>Discussion questions</i>	295	12.5 Renal interstitium	367
<b>10 Musculoskeletal system</b>	<b>296</b>	12.6 Ureters	368	
	<i>Suha Deen</i>		12.7 Urinary bladder	369
10.1	Skeletal muscle	297	12.8 Urethra	371
10.2	Bone and cartilage	308	12.9 Urinary system disease	371
10.3	Cartilage	320	12.10 Kidney transplantation	376
	<i>Chapter summary</i>	321	<i>Chapter summary</i>	377
	<i>Further reading</i>	322	<i>Further reading</i>	377
	<i>Discussion questions</i>	322	<i>Discussion questions</i>	378
<b>11 Liver</b>	<b>323</b>	<b>13 Reproductive cells and gametogenesis</b>	<b>379</b>	
	<i>Anne Rayner and Alberto Quaglia</i>		<i>Andrew Evered and Behdad Shambayati</i>	
11.1	Segmental anatomy, blood supply and biliary drainage	325	13.1 The reproductive system—an overview	380
11.2	Microscopic structure	329	13.2 Gametogenesis	382
11.3	Ultrastructure of the hepatocyte	332	13.3 Testes and spermatogenesis	387
11.4	Other cells seen in the liver	334	13.4 Ovaries and oogenesis	394
11.5	Bile ducts	336	13.5 Cells of the male reproductive tract	397
11.6	Liver development	336	13.6 Cells of the female reproductive tract	400
11.7	Liver regeneration	337	13.7 Cells of the external genitalia	408
11.8	Liver pathology	338	<i>Chapter summary</i>	411
11.9	Classification of liver disease	343	<i>Further reading</i>	412
11.10	Gall bladder	344	<i>Discussion questions</i>	412
11.11	Pancreas	346	<b>14 Cells of the endocrine system</b>	<b>414</b>
	<i>Chapter summary</i>	347	<i>Judy Brincat</i>	
	<i>Further reading</i>	348	14.1 Hormone action and control mechanisms	415
	<i>Discussion questions</i>	348	14.2 Pituitary gland	417
			14.3 Pineal gland	425
			14.4 Thyroid gland	428

14.5	Parathyroid glands	432	15.3	Structure of the epidermis	455
14.6	Adrenal glands	434	15.4	Cells of the epidermis	459
14.7	Endocrine pancreas	441	15.5	Basement membrane zone	464
14.8	Gastrointestinal endocrine system	444	15.6	Structures of the dermis	466
14.9	Respiratory endocrine system	446	15.7	Subcutis (subcutaneous fat)	477
14.10	Endocrine cells of the kidney	447	15.8	Breast tissue	478
	<i>Chapter summary</i>	448	15.9	Stains, antibodies and descriptive terms used in dermatopathology: a brief overview	482
	<i>Further reading</i>	449		<i>Chapter summary</i>	484
	<i>Discussion questions</i>	449		<i>Further reading</i>	485
	<i>Acknowledgements</i>	450		<i>Discussion questions</i>	486
<b>15</b>	<b>Skin and breast</b>	<b>451</b>		<b>Glossary</b>	<b>487</b>
	<i>Guy Orchard</i>			<b>Index</b>	<b>495</b>
15.1	Structure of the skin	453			
15.2	Embryology of the skin	454
