PROLOGUE **XXI**

1. Health Program Evaluation: Is It Worth it? 1

Growth of Health Program Evaluation	4
Types of Health Program Evaluation	8
<i>Evaluation of Health Programs</i>	8
<i>Evaluation of Health Systems</i>	9
Summary	15
List of Terms	15
Study Questions	15

2. The Evaluation Process as a Three-Act Play 17

Evaluation as a Three-Act Play	19
<i>Act I: Asking the Questions</i>	19
<i>Act II: Answering the Questions</i>	27
<i>Act III: Using the Answers in Decision Making</i>	31
Roles of the Evaluator	33
Evaluation in a Cultural Context	37
Ethical Issues	40
Evaluation Standards	41
Summary	44
List of Terms	44
Study Questions	44

ACT I: ASKING THE QUESTIONS **45**

3. Developing Evaluation Questions 47

Step 1: Specify Program Theory	48
<i>Conceptual Models: Theory of Cause and Effect</i>	51
<i>Conceptual Models: Theory of Implementation</i>	55

Step 2: Specify Program Objectives	66
Step 3: Translate Program Theory and Objectives Into Evaluation Questions	69
Step 4: Select Key Questions	73
<i>Age of the Program</i>	73
<i>Budget</i>	73
<i>Logistics</i>	73
<i>Knowledge and Values</i>	74
<i>Consensus</i>	75
<i>Result Scenarios</i>	75
<i>Funding</i>	76
<i>Evaluation Theory and Practice</i>	76
Assessment of Fit	77
Summary	78
List of Terms	78
Study Questions	78

ACT II: ANSWERING THE QUESTIONS

79

Scene 1: Developing the Evaluation Design to Answer the Questions 79

4. Evaluation of Program Impacts 81

Quasi-Experimental Study Designs	85
<i>One-Group Posttest-Only Design</i>	85
<i>One-Group Pretest-Posttest Design</i>	86
<i>Posttest-Only Comparison Group Design</i>	88
<i>Recurrent Institutional Cycle ("Patched-Up") Design</i>	90
<i>Pretest-Posttest Nonequivalent Comparison Group Design</i>	92
<i>Single Time-Series Design</i>	94
<i>Repeated Treatment Design</i>	97
<i>Multiple Time-Series Design</i>	98
<i>Regression Discontinuity Design</i>	100
<i>Summary: Quasi-Experimental Study Designs and Internal Validity</i>	105
Counterfactuals and Experimental Study Designs	109
<i>Counterfactuals and Causal Inference</i>	109
<i>Pretest-Posttest Control Group Design</i>	113
<i>Posttest-Only Control Group Design</i>	114
<i>Solomon Four-Group Design</i>	115
<i>Randomized Study Designs for Population-Based Interventions</i>	116
<i>When to Randomize</i>	117
<i>Closing Remarks</i>	118

Statistical Threats to Validity	119
Generalizability of Impact Evaluation Results	122
<i>Construct Validity</i>	122
<i>External Validity</i>	127
<i>Closing Remarks</i>	129
Evaluation of Impact Designs and Meta-Analysis	130
Summary	132
List of Terms	133
Study Questions	134

5. Cost-Effectiveness Analysis 135

Cost-Effectiveness Analysis: An Aid to Decision Making	136
Comparing Program Costs and Effects: The Cost-Effectiveness Ratio	138
Types of Cost-Effectiveness Analysis	140
<i>Cost-Effectiveness Studies of Health Programs</i>	140
<i>Cost-Effectiveness Evaluations of Health Services</i>	142
Steps in Conducting a Cost-Effectiveness Analysis	144
<i>Steps 1–4: Organizing the CEA</i>	144
<i>Step 5: Identifying, Measuring, and Valuing Costs</i>	146
<i>Step 6: Identifying and Measuring Effectiveness</i>	147
<i>Step 7: Discounting Future Costs and Effectiveness</i>	148
<i>Step 8: Conducting a Sensitivity Analysis</i>	150
<i>Step 9: Addressing Equity Issues</i>	151
<i>Steps 10 and 11: Using CEA Results in Decision Making</i>	151
Evaluation of Program Effects and Costs	151
Summary	152
List of Terms	153
Study Questions	153

6. Evaluation of Program Implementation 155

Types of Evaluation Designs for Answering Implementation Questions	157
<i>Quantitative and Qualitative Methods</i>	158
<i>Multiple and Mixed Methods Designs</i>	160
Types of Implementation Questions and Designs for Answering Them	165
<i>Monitoring Program Implementation</i>	165
<i>Explaining Program Outcomes</i>	167
Summary	176
List of Terms	176
Study Questions	176

Scenes 2 and 3: Developing the Methods to Carry Out
the Design and Conducting the Evaluation 177

7. Population and Sampling 183

- Step 1: Identify the Target Populations of the Evaluation 184
- Step 2: Identify the Eligible Members of Each Target Population 185
- Step 3: Decide Whether Probability or Nonprobability
Sampling Is Necessary 189
- Step 4: Choose a Nonprobability Sampling Design for
Answering an Evaluation Question 191
- Step 5: Choose a Probability Sampling Design for
Answering an Evaluation Question 193
 - Simple and Systematic Random Sampling* 193
 - Proportionate Stratified Sampling* 194
 - Disproportionate Stratified Sampling* 195
 - Post-Stratification Sampling* 196
 - Cluster Sampling* 197
- Step 6: Determine Minimum Sample Size Requirements 198
 - Sample Size in Qualitative Evaluations* 198
 - Types of Sample Size Calculations* 199
 - Sample Size Calculations for Descriptive Questions* 200
 - Sample Size Calculations for Comparative Questions* 202
- Step 7: Select the Sample 210
- Summary 210
- List of Terms 211
- Study Questions 211

8. Measurement and Data Collection 213

- Measurement and Data Collection in Quantitative Evaluations 215
 - The Basics of Measurement and Classification* 215
 - Step 1: Decide What Concepts to Measure* 217
 - Step 2: Identify Measures of the Concepts* 218
 - Step 3: Assess the Reliability,
Validity, and Responsiveness of the Measures* 220
 - Step 4: Identify and Assess
the Data Source of Each Measure* 229
 - Step 5: Choose the Measures* 234
 - Step 6: Organize the Measures for Data Collection
and Analysis* 234
 - Step 7: Collect the Measures* 235

Data Collection in Qualitative Evaluations 236
Reliability and Validity in Qualitative Evaluations 239
Management of Data Collection 241
Summary 242
Resources 242
List of Terms 244
Study Questions 245

9. Data Analysis 247

Getting Started: What's the Question? 248
Qualitative Data Analysis 250
Quantitative Data Analysis 252
 What Are the Variables for Answering Each Question? 252
 How Should the Variables Be Analyzed? 254
Summary 263
List of Terms 263
Study Questions 264

ACT III: USING THE ANSWERS IN DECISION MAKING

265

10. Disseminating the Answers to Evaluation Questions 267

Scene 1: Translating Evaluation Answers Back Into Policy Language 268
 Translating the Answers 268
 Building Knowledge 269
 Developing Recommendations 270
Scene 2: Developing a Dissemination Plan for Evaluation Answers 273
 Target Audience and Type of Information 275
 Format of Information 275
 Timing of the Information 280
 Setting 281
Scene 3: Using the Answers in Decision Making and the
 Policy Cycle 282
How Answers Are Used by Decision Makers 282
 *Increasing the Use of Answers in the Evaluation
 Process* 284
 Ethical Issues 286
Summary 287
List of Terms 287
Study Questions 287

11. Epilogue

289

Compendium
