Contributors.....	xxi

## Section I: Introductory section

<b>Chapter 1 From traditional manufacturing to additive manufacturing.....</b>	<b>3</b>
<i>Adedeji B. Badiru</i>	
<b>Chapter 2 A novice’s guide to 3D printing: Making the process less magical and more understandable .....</b>	<b>31</b>
<i>Kim Brand</i>	
<b>Chapter 3 Comprehensive project management of high-end additive manufacturing equipment.....</b>	<b>37</b>
<i>Adedeji B. Badiru</i>	
<b>Chapter 4 3D-printing impacts on systems engineering in defense industry.....</b>	<b>49</b>
<i>Jason Deters</i>	
<b>Chapter 5 3D-printing design using systems engineering .....</b>	<b>57</b>
<i>Bradford L. Shields and Vhance V. Valencia</i>	
<b>Chapter 6 Evaluation of existing modeling software.....</b>	<b>75</b>
<i>Shesh Srivatsa</i>	
<b>Chapter 7 Additive manufacturing research and development needs .....</b>	<b>89</b>
<i>Shesh Srivatsa</i>	
<b>Chapter 8 Operational aspects and regulatory gaps in additive manufacturing .....</b>	<b>129</b>
<i>Adeola Adediran and Akinola Oyedele</i>	
<b>Chapter 9 Additive manufacturing and its implications for military ethics .....</b>	<b>139</b>
<i>John Mark Mattox</i>	

<b>Chapter 10 Additive manufacturing technologies: State of the art and trends .....</b>	<b>149</b>
<i>Julien Gardan</i>	
<b>Chapter 11 A new global approach to design for additive manufacturing.....</b>	<b>169</b>
<i>R. Ponche, J. Y. Hascoet, O. Kerbrat, and P. Mognol</i>	
<b>Chapter 12 A new methodological framework for design for additive manufacturing.....</b>	<b>187</b>
<i>Martin Kumke, Hagen Watschke, and Thomas Vietor</i>	
 <b>Section II: Technical section</b>	
<b>Chapter 13 Development and implementation of metals additive manufacturing.....</b>	<b>215</b>
<i>Ian D. Harris</i>	
<b>Chapter 14 Selective laser melting (SLM) of Ni-based superalloys: A mechanics of materials review .....</b>	<b>225</b>
<i>Sanna F. Siddiqui, Abiodun A. Fasoro, and Ali P. Gordon</i>	
<b>Chapter 15 A review on powder bed fusion technology of metal additive manufacturing.....</b>	<b>251</b>
<i>Valmik Bhavar, Prakash Kattire, Vinaykumar Patil, Shreyans Khot, Kiran Gujar, and Rajkumar Singh</i>	
<b>Chapter 16 Additive manufacturing of titanium alloys .....</b>	<b>263</b>
<i>B. Dutta and Francis H. Froes</i>	
<b>Chapter 17 Ultrasonic additive manufacturing .....</b>	<b>275</b>
<i>Paul J. Wolcott and Marcelo J. Dapino</i>	
<b>Chapter 18 Printing components for reciprocating engine applications .....</b>	<b>315</b>
<i>Michael D. Kass and Mark W. Noakes</i>	
<b>Chapter 19 Developing practical additive manufacturing design methods.....</b>	<b>329</b>
<i>David Liu, Alan Jennings, Kevin D. Rekedal, David Walker, and Hayden K. Richards</i>	
<b>Chapter 20 Optical diagnostics for real-time monitoring and feedback control of metal additive manufacturing processes.....</b>	<b>351</b>
<i>Glen P. Perram and Grady T. Phillips</i>	
<b>Chapter 21 3D printed structures for nanoscale research .....</b>	<b>369</b>
<i>Tod V. Laurvick</i>	
<b>Chapter 22 Additive manufacturing at the micron scale .....</b>	<b>381</b>
<i>Ronald A. Coutu, Jr.</i>	

<b>Chapter 23 Computer modeling of sol–gel thin-film deposition using finite element analysis.....</b>	<b>389</b>
<i>Alex Li</i>	
<b>Chapter 24 Additive manufacturing technology review: From prototyping to production .....</b>	<b>397</b>
<i>Larry Dossier, Kevin Hartke, Ron Jacobson, and Sarah Payne</i>	
<b>Chapter 25 Mechanical property optimization of fused deposition modeled polylactic acid components via design of experiments.....</b>	<b>433</b>
<i>Jonathan Torres and Ali P. Gordon</i>	
<b>Chapter 26 Laser powder-bed fusion additive manufacturing of metals; physics, computational, and materials challenges .....</b>	<b>461</b>
<i>Wayne E. King, Andrew T. Anderson, R. M. Ferencz, N. E. Hodge, C. Kamath, Saad A. Khairallah, and Alexander M. Rubenchik</i>	
<b>Chapter 27 Calculation of laser absorption by metal powders in additive manufacturing.....</b>	<b>507</b>
<i>C. D. Boley, Saad A. Khairallah, and Alexander M. Rubenchik</i>	
<b>Chapter 28 The accuracy and surface roughness of spur gears processed by fused deposition modeling additive manufacturing .....</b>	<b>519</b>
<i>Junghsen Lieh, Bin Wang, and Omotunji Badiru</i>	
<b>Chapter 29 Surface roughness of electron beam melting Ti-6Al-4V effect on ultrasonic testing .....</b>	<b>533</b>
<i>Evan Hanks, David Liu, and Anthony N. Palazotto</i>	
<b>Chapter 30 Dynamic failure properties of additively manufactured stainless steel.....</b>	<b>551</b>
<i>Allison Dempsey, David Liu, Anthony N. Palazotto, and Rachel Abrahams</i>	
<b>Chapter 31 Investigation of the high-cycle fatigue life of selective laser melted and hot isostatically pressed Ti-6Al-4V .....</b>	<b>569</b>
<i>Kevin D. Rekedal and David Liu</i>	
<b>Chapter 32 Impact response of titanium and titanium boride monolithic and functionally graded composite plates.....</b>	<b>581</b>
<i>Reid A. Larson, Anthony N. Palazotto, and Hugh E. Gardenier</i>	
<b>Chapter 33 Laser powder-bed fusion additive manufacturing: Physics of complex melt flow and formation mechanisms of pores, spatter, and denudation zones .....</b>	<b>613</b>
<i>Saad A. Khairallah, Andrew T. Anderson, Alexander M. Rubenchik, and Wayne E. King</i>	

<b>Chapter 34 Measurement science needs for real-time control of additive manufacturing powder-bed fusion processes .....</b>	<b>629</b>
<i>Mahesh Mani, Shaw Feng, Brandon Lane, Alkan Donmez, Shawn Moylan, and Ronnie Fesperman</i>	
<b>Chapter 35 Denudation of metal powder layers in laser powder-bed fusion processes .....</b>	<b>677</b>
<i>Manyalibo J. Matthews, Gabe Guss, Saad A. Khairallah, Alexander M. Rubenchik, Philip J. Depond, and Wayne E. King</i>	
<b>Chapter 36 Tension-compression fatigue of an oxide/oxide ceramic composite at elevated temperature.....</b>	<b>695</b>
<i>Marina B. Ruggles-Wrenn and R. L. Lanser</i>	
<b>Chapter 37 Effects of steam environment on fatigue behavior of two SiC/[SiC+Si<sub>3</sub>N<sub>4</sub>] ceramic composites at 1300°C .....</b>	<b>709</b>
<i>Marina B. Ruggles-Wrenn and Vipul Sharma</i>	
<b>Section III: Application section</b>	
<b>Chapter 38 3D product design, evaluation, justification, and integration .....</b>	<b>725</b>
<i>Adedeji B. Badiru</i>	
<b>Chapter 39 3D printing rises to the occasion: ORNL group shows how it is done, one layer at a time .....</b>	<b>739</b>
<i>Leo Williams</i>	
<b>Chapter 40 3D printing implications for STEM education .....</b>	<b>745</b>
<i>John L. Irwin</i>	
<b>Chapter 41 Additive manufacturing applicability for United States Air Force Civil Engineer contingency operations.....</b>	<b>759</b>
<i>Seth N. Poulsen and Vhance V. Valencia</i>	
<b>Chapter 42 Additive manufacturing applications for explosive ordnance disposal using the systems engineering spiral process model.....</b>	<b>777</b>
<i>Maria T. Meeks, Bradford L. Shields, Eric S. Holm, and Vhance V. Valencia</i>	
<b>Chapter 43 Proof-of-concept applications of additive manufacturing in air force explosive ordnance disposal training and operations .....</b>	<b>805</b>
<i>Abdulrahman Sulaiman Alwabel, Nathan Greiner, Sean Murphy, William Page, Shane Veitenheimer, and Vhance V. Valencia</i>	
<b>Chapter 44 Wing design utilizing topology optimization and additive manufacturing.....</b>	<b>823</b>
<i>David Walker, David Liu, and Alan Jennings</i>	

<b>Chapter 45</b>	<b>Topology optimization of a penetrating warhead.....</b>	<b>841</b>
	<i>William T. Graves, Jr., David Liu, and Anthony N. Palazotto</i>	
<b>Chapter 46</b>	<b>Iteration revolution: DMLS production applications.....</b>	<b>857</b>
	<i>Erin Stone and Chad Cooper</i>	
<b>Chapter 47</b>	<b>Information storage on additive manufactured parts.....</b>	<b>875</b>
	<i>Larry Dosser, Kevin Hartke, Ron Jacobson, and Sarah Payne</i>	
<b>Chapter 48</b>	<b>Case examples of additive manufacturing initiatives at the air force research lab and air force institute of technology.....</b>	<b>881</b>
	<i>Adedeji B. Badiru</i>
