## 1

### Introduction

<b>1.1</b>	Physical versus chemical characterisation of the geological environment	
<b>1.2</b>	Geophysical methods in exploration and mining	
<b>1.2.1</b>	Airborne, ground and in-ground surveys	
<b>1.2.2</b>	Geophysical methods and mineral deposits	
<b>1.2.3</b>	The cost of geophysics	
<b>1.3</b>	About this book	
Further reading		

## 2

### Geophysical data acquisition, processing and interpretation

<b>2.1</b>	Introduction	
<b>2.2</b>	Types of geophysical measurement	
<b>2.2.1</b>	Absolute and relative measurements	
<b>2.2.2</b>	Scalars and vectors	
<b>2.2.3</b>	Gradients	
<b>2.3</b>	The nature of geophysical responses	
<b>2.4</b>	Signal and noise	
<b>2.4.1</b>	Environmental noise	
<b>2.4.2</b>	Methodological noise	
<b>2.5</b>	Survey objectives	
<b>2.5.1</b>	Geological mapping	
<b>2.5.2</b>	Anomaly detection	
<b>2.5.3</b>	Anomaly definition	
<b>2.6</b>	Data acquisition	
<b>2.6.1</b>	Sampling and aliasing	
<b>2.6.2</b>	System footprint	
<b>2.6.3</b>	Survey design	
<b>2.6.4</b>	Feature detection	
<b>2.7</b>	Data processing	
<b>2.7.1</b>	Reduction of data	
<b>2.7.2</b>	Interpolation of data	

ix	<b>2.7.3</b>	Merging of datasets	38
xii	<b>2.7.4</b>	Enhancement of data	38
xv	<b>2.8</b>	Data display	48
xvi	<b>2.8.1</b>	Types of data presentation	48
	<b>2.8.2</b>	Image processing	51
	<b>2.9</b>	Data interpretation – general	58
	<b>2.9.1</b>	Interpretation fundamentals	59
	<b>2.9.2</b>	Removing the regional response	60
1	<b>2.10</b>	Data interpretation – qualitative analysis	63
2	<b>2.10.1</b>	Spatial analysis of 2D data	63
3	<b>2.10.2</b>	Geophysical image to geological map	67
4	<b>2.11</b>	Data interpretation – quantitative analysis	70
5	<b>2.11.1</b>	Geophysical models of the subsurface	70
6	<b>2.11.2</b>	Forward and inverse modelling	74
	<b>2.11.3</b>	Modelling strategy	78
	<b>2.11.4</b>	Non-uniqueness	79
11	Summary		81
	Review questions		82
	Further reading		82
13	<b>3</b>		
	<b>Gravity and magnetic methods</b>		85
14	<b>3.1</b>	Introduction	85
15	<b>3.2</b>	Gravity and magnetic fields	86
16	<b>3.2.1</b>	Mass and gravity	87
17	<b>3.2.2</b>	Gravity anomalies	88
18	<b>3.2.3</b>	Magnetism and magnetic fields	89
22	<b>3.2.4</b>	Magnetic anomalies	93
23	<b>3.3</b>	Measurement of the Earth's gravity field	94
24	<b>3.3.1</b>	Measuring relative gravity	96
25	<b>3.3.2</b>	Measuring gravity gradients	98
27	<b>3.3.3</b>	Gravity survey practice	98
27	<b>3.4</b>	Reduction of gravity data	99
31	<b>3.4.1</b>	Velocity effect	99
32	<b>3.4.2</b>	Tidal effect	99
32	<b>3.4.3</b>	Instrument drift	100
34	<b>3.4.4</b>	Variations in gravity due to the Earth's rotation and shape	100
	<b>3.4.5</b>	Variations in gravity due to height and topography	102
	<b>3.4.6</b>	Summary of gravity data reduction	106
	<b>3.4.7</b>	Example of the reduction of ground gravity data	106

<b>3.5</b>	Measurement of the Earth's magnetic field	106	<b>3.11.4</b>	Magnetic responses in a Phanerozoic Orogenic terrain: Lachlan Foldbelt	179
<b>3.5.1</b>	The geomagnetic field	109	<b>3.11.5</b>	Magnetic and gravity responses from mineralised environments	186
<b>3.5.2</b>	Measuring magnetic field strength	112			188
<b>3.5.3</b>	Magnetic survey practice	114	<b>Summary</b>		188
<b>3.6</b>	Reduction of magnetic data	116	<b>Review questions</b>		190
<b>3.6.1</b>	Temporal variations in field strength	116	<b>Further reading</b>		190
<b>3.6.2</b>	Regional variations in field strength	117			
<b>3.6.3</b>	Terrain clearance effects	117			
<b>3.6.4</b>	Levelling	117			
<b>3.6.5</b>	Example of the reduction of aeromagnetic data	117			
<b>3.7</b>	Enhancement and display of gravity and magnetic data	117			
<b>3.7.1</b>	Choice of enhancements	118			
<b>3.7.2</b>	Reduction-to-pole and pseudogravity transforms	122			
<b>3.7.3</b>	Wavelength filters	123			
<b>3.7.4</b>	Gradients/derivatives	124			
<b>3.8</b>	Density in the geological environment	125			
<b>3.8.1</b>	Densities of low-porosity rocks	127			
<b>3.8.2</b>	Densities of porous rocks	129			
<b>3.8.3</b>	Density and lithology	130			
<b>3.8.4</b>	Changes in density due to metamorphism and alteration	127			
<b>3.8.5</b>	Density of the near-surface	131			
<b>3.8.6</b>	Density of mineralised environments	133			
<b>3.8.7</b>	Measuring density	133			
<b>3.8.8</b>	Analysis of density data	134			
<b>3.9</b>	Magnetism in the geological environment	134			
<b>3.9.1</b>	Magnetic properties of minerals	135			
<b>3.9.2</b>	Magnetic properties of rocks	136			
<b>3.9.3</b>	Magnetism of igneous rocks	138			
<b>3.9.4</b>	Magnetism of sedimentary rocks	140			
<b>3.9.5</b>	Magnetism of metamorphosed and altered rocks	144			
<b>3.9.6</b>	Magnetism of the near-surface	145			
<b>3.9.7</b>	Magnetism of mineralised environments	151			
<b>3.9.8</b>	Magnetic property measurements and their analysis	151			
<b>3.9.9</b>	Correlations between density and magnetism	155			
<b>3.10</b>	Interpretation of gravity and magnetic data	159			
<b>3.10.1</b>	Gravity and magnetic anomalies and their sources	160			
<b>3.10.2</b>	Analysis of gravity and magnetic maps	160			
<b>3.10.3</b>	Interpretation pitfalls	163			
<b>3.10.4</b>	Estimating depth-to-source	164			
<b>3.10.5</b>	Modelling source geometry	165			
<b>3.10.6</b>	Modelling pitfalls	167			
<b>3.11</b>	Examples of gravity and magnetic data from mineralised terrains	167			
<b>3.11.1</b>	Regional removal and gravity mapping of palaeochannels hosting placer gold	169			
<b>3.11.2</b>	Modelling the magnetic response associated with the Wallaby gold deposit	172			
<b>3.11.3</b>	Magnetic responses from an Archaean granitoid-greenstone terrain: Kirkland Lake area	173			
			<b>4</b>		
			<b>Radiometric method</b>		193
			<b>4.1</b>	Introduction	193
			<b>4.2</b>	Radioactivity	194
			<b>4.2.1</b>	Radioactive decay	194
			<b>4.2.2</b>	Half-life and equilibrium	195
			<b>4.2.3</b>	Interaction of radiation and matter	196
			<b>4.2.4</b>	Measurement units	197
			<b>4.2.5</b>	Sources of radioactivity in the natural environment	198
			<b>4.3</b>	Measurement of radioactivity in the field	199
			<b>4.3.1</b>	Statistical noise	199
			<b>4.3.2</b>	Radiation detectors	201
			<b>4.3.3</b>	Survey practice	204
			<b>4.4</b>	Reduction of radiometric data	205
			<b>4.4.1</b>	Instrument effects	205
			<b>4.4.2</b>	Random noise	206
			<b>4.4.3</b>	Background radiation	207
			<b>4.4.4</b>	Atmospheric radon	207
			<b>4.4.5</b>	Channel interaction	208
			<b>4.4.6</b>	Height attenuation	208
			<b>4.4.7</b>	Analytical calibration	208
			<b>4.5</b>	Enhancement and display of radiometric data	209
			<b>4.5.1</b>	Single-channel displays	209
			<b>4.5.2</b>	Multichannel ternary displays	209
			<b>4.5.3</b>	Channel ratios	210
			<b>4.5.4</b>	Multivariant methods	210
			<b>4.6</b>	Radioelements in the geological environment	210
			<b>4.6.1</b>	Disequilibrium in the geological environment	212
			<b>4.6.2</b>	Potassium, uranium and thorium in igneous rocks	216
			<b>4.6.3</b>	Potassium, uranium and thorium in altered and metamorphosed rocks	216
			<b>4.6.4</b>	Potassium, uranium and thorium in sedimentary rocks	217
			<b>4.6.5</b>	Surficial processes and K, U and Th in the overburden	217
			<b>4.6.6</b>	Potassium, uranium and thorium in mineralised environments	219
			<b>4.7</b>	Interpretation of radiometric data	220
			<b>4.7.1</b>	Interpretation procedure	222
			<b>4.7.2</b>	Interpretation pitfalls	222
			<b>4.7.3</b>	Responses of mineralised environments	223
			<b>4.7.4</b>	Example of geological mapping in a fold and thrust belt: Flinders Ranges	227
			<b>4.7.5</b>	Interpretation of γ-logs	229

Summary	232	5.9.4 Display and interpretation of AEM data	345
Review questions	232	5.9.5 Examples of AEM data from mineralised terrains	345
Further reading	233	Summary	347
		Review questions	348
		Further reading	349
