Preface.....	ix
Editors.....	xiii

Section I Fluid Mechanics Experiments and Demonstrations

1. Determining the Net Positive Suction Head of a Magnetic Drive Pump.....	3
<i>Allen A. Busick, Melissa L. Cooley, Alexander M. Lopez, Aaron J. Steuart, William Roy Penney, and Edgar C. Clausen</i>	
2. Bernoulli Balance Experiments Using a Venturi.....	11
<i>Megan F. Dunn, William Roy Penney, and Edgar C. Clausen</i>	
3. Force Produced by Impingement of a Fluid Jet on a Deflector.....	25
<i>Daniel R. Miskin, William Roy Penney, and Edgar C. Clausen</i>	
4. Applying the Bernoulli Balance to Determine Flow and Permanent Pressure Loss	35
<i>Jordan N. Foley, John W. Thompson, Meaghan M. Williams, William Roy Penney, and Edgar C. Clausen</i>	
5. A Simple Sharp-Edged Orifice Demonstration.....	47
<i>William Roy Penney, Shannon L. Servoss, Christa N. Hestekin, and Edgar C. Clausen</i>	
6. Depressurization of an Air Tank	57
<i>Martin A. Christie, John A. Dominick III, William Roy Penney, and Edgar C. Clausen</i>	
7. Draining an Upper Tank into a Lower Tank: Experimental and Modeling Studies	67
<i>William Roy Penney and Edgar C. Clausen</i>	
8. Determining the Pump Curve and the Efficiency for a Bomba BP-50 Regenerative Centrifugal Pump	77
<i>William Roy Penney and Edgar C. Clausen</i>	

Section II Heat Transfer Experiments and Demonstrations

- 9. Thermal Conductivity and Radiative Experiments Measurement.....** 91
*Edgar C. Clausen, William Roy Penney, Dave C. Marrs,
 Megan V. Park, Anthony M. Scalia, and Nathaniel S. Weston*
- 10. Free Convection Heat Transfer from Plates** 107
Edgar C. Clausen and William Roy Penney
- 11. Forced Convection Heat Transfer by Air Flowing over the
 Top Surface of a Horizontal Plate** 119
Edgar C. Clausen and William Roy Penney
- 12. Laminar Forced Convection Inside a Coiled Copper Tube.....** 131
*Edgar C. Clausen, William Roy Penney, Jeffrey R. Dorman,
 Daniel E. Fluornoy, Alice K. Keogh, and Lauren N. Leach*
- 13. An Experimental Testing of Turbulent Forced Convection
 Inside Tubes.....** 139
*Edgar C. Clausen, William Roy Penney, Jeffrey R. Dorman,
 Daniel E. Fluornoy, Alice K. Keogh, and Lauren N. Leach*
- 14. Forced Convection through an Annulus** 147
Edgar C. Clausen and William Roy Penney
- 15. Experimental Investigation and Modeling Studies of the
 Transient Cooling of a Brass Rod Subjected to Forced
 Convection of Room Air.....** 157
William Roy Penney and Edgar C. Clausen
- 16. Solar Flux and Absorptivity Measurements.....** 167
*William Roy Penney, Kendal J. Brown, Joel D. Vincent, and
 Edgar C. Clausen*
- 17. A Transient Experiment to Determine the Heat Transfer
 Characteristics of a 100 W Incandescent Light Bulb,
 Operating at 48 W** 179
*Lauren Cole, Lindsay R. Hoggatt, Jamie A. Sterrenberg,
 David R. Suttmiller, William Roy Penney, and Edgar C. Clausen*

18. Experimental Determination of a Room Heat Transfer Coefficient by Transient Cooling of a Mercury-in-Glass Thermometer	191
<i>William Roy Penney and Edgar C. Clausen</i>	
19. Experimental Determination and Modeling of the Temperature Distribution Along a Hollow Fin	205
<i>William Roy Penney and Edgar C. Clausen</i>	
Index	215
