Preface

(v)

CHAPTER 1 Introduction and Scope of Food Microbiology	1-6
• The Microbiology	1
• The Microbial World	1
• The Food Microbiology	2
• Microbiological Quality Assurance	3
• What a Food Microbiologist is Expected to Know?	4
• Scope of Food Microbiology	4
• <i>Summary</i>	5
• <i>Important Review Questions</i>	5
• <i>Multiple Choice Questions</i>	5
CHAPTER 2 Food Microbiology—Past, Present and Future	7-20
• Introduction	7
• Development of Early Food Microbiology (Before AD 1900)	7
• Food Microbiology: Current Status	15
• To the Future and Beyond	17
• <i>Summary</i>	17
• <i>Important Review Questions</i>	18
• <i>Multiple Choice Questions</i>	18
CHAPTER 3 Microorganisms in Foods—Habitats and Sources of Contamination	21-34
• Diversity of Habitat	21
• Microorganisms in Food	21
• Airborne Microorganisms	23
• Airborne Bacteria	23
• Airborne Fungi	24
• Waterborne Microorganisms	25
• Microorganisms of Soil	26
• Microorganisms of Plants	29
• Microorganisms of Animal Origin	29
• Equipment and Food Utensils	30
• Packaging Materials	30
• Food Ingredients	30
• Animal Feeds	30
• Food Handlers	30

• Chemical Contamination of Food	31
• <i>Summary</i>	31
• <i>Important Review Questions</i>	32
• <i>Multiple Choice Questions</i>	32
CHAPTER 4 Characteristics of Predominant Microorganisms in Food	35–55
• Introduction	35
• Groups of Microorganisms	35
• Nomenclature	36
• Classification of Organisms	36
• Characteristics of Various Groups of Microorganisms	39
• Fungi	39
• Differentiation of Mold Genera	43
• Important Yeast Genera	44
• Protozoa	45
• Viruses	46
• Prions	47
• Helminths	47
• Bacteria	47
• Major Bacterial Genera	48
• <i>Summary</i>	52
• <i>Important Review Questions</i>	53
• <i>Multiple Choice Questions</i>	54
CHAPTER 5 Microbial Growth in Food	56–67
• Introduction	56
• Microbial Growth	56
• Generation Time (or Doubling Time)	57
• Exponential Growth	58
• Growth Curve	60
• Microbial Interactions in Food	63
• Competitive Microflora	64
• <i>Summary</i>	65
• <i>Important Review Questions</i>	66
• <i>Multiple Choice Questions</i>	66
CHAPTER 6 Factors Influencing the Growth of Microorganisms in Food and Predictive Food Microbiology	68–111
• Introduction	68
• Intrinsic Factors	68
• Antimicrobials in Food	81
• Extrinsic Factors	88
• Other Factors	97
• Combined Effects of Factors Affecting Growth – Hurdle Concept	98
• Predictive Food Microbiology	99
• Predictive Models Developed for Different Foodborne Pathogens	106
• Future Prospects	108
• <i>Summary</i>	109
• <i>Important Review Questions</i>	109
• <i>Multiple Choice Questions</i>	110

CHAPTER 7 Microbiology of Food Preservation	112–134
• Introduction	112
• Heat	113
• Heat Processing	113
• Hurdle Concept	128
• <i>Summary</i>	130
• <i>Important Review Questions</i>	131
• <i>Multiple Choice Questions</i>	131
CHAPTER 8 Classification of Foods and Mechanisms of Microbial Food Spoilage	135–147
• Introduction	135
• Nutrient Based Classification of Foods	135
• Carbohydrate Foods	135
• Protein Foods	137
• Lipid (or Fatty Acid) Foods	137
• pH Based Classification of Foods	140
• Classification of Foods Based on Shelf-Life	141
• Spoilage of Food	141
• Growth of Microorganisms in Food	142
• Mechanisms of Microbiological Food Spoilage	142
• <i>Summary</i>	145
• <i>Important Review Questions</i>	145
• <i>Multiple Choice Questions</i>	146
CHAPTER 9 Microbiology of Primary Food Commodities	148–218
• Introduction	148
• Milk	149
• Meat	163
• Spoilage of Packaged Fresh and Processed Meats	166
• Fish	176
• Plant Products	192
• Microbiology of Foods of Plant Origin	201
• <i>Summary</i>	215
• <i>Important Review Questions</i>	215
• <i>Multiple Choice Questions</i>	216
CHAPTER 10 Food Microbiology and Public Health	219–248
• Introduction	219
• Food Hazards	219
• HACCP Seven Principles	220
• Significance of Foodborne Disease	225
• Food in Health and Disease	228
• Description of Foodborne Illness	232
• Pyramid Plan	236
• Risk Factors in the Emergence of Foodborne Diseases	238
• Control of Foodborne Disease Outbreaks	242
• Diarrhea and Dysentery	243

• Summary	245
• Important Review Questions	246
• Multiple Choice Questions	246
CHAPTER 11 Bacterial Agents of Foodborne Illness	249–329
• Introduction	249
• Food Infections	249
• Foodborne Diseases	250
• <i>Aeromonas Hydrophila</i>	252
• <i>Bacillus Cereus</i>	259
• Brucellosis	261
• <i>Campylobacter</i>	264
• <i>Clostridium Botulinum</i>	267
• <i>Clostridium Oerfringens</i>	272
• <i>Enterobacter Pakazakii</i>	277
• <i>Escherichia Coli</i>	278
• <i>Listeria Monocytogenes</i>	280
• <i>Mycobacterium</i> Species	284
• <i>Plesiomonas Shigelloides</i>	297
• <i>Salmonella</i> and Salmonellosis	300
• <i>Shigella</i>	306
• <i>Staphylococcus</i>	310
• <i>Vibrio Parahaemolyticus</i> Infection and other <i>Vibrios</i>	315
• <i>Yersinia Enterocolitica</i>	321
• Scombroid Food Poisoning	322
• Summary	324
• Important Review Questions	324
• Multiple Choice Questions	325
CHAPTER 12 Non Bacterial Agents of Foodborne Illness	330–397
• Introduction	330
• The Parasites of Humans	330
• Helminths and Nematodes	331
• Control of Helminths	342
• Protozoa	343
• Toxigenic Algae	351
• Cyanobacteria	354
• Mushroom Poisoning—Mycetismus	356
• Toxigenic Molds and Mycotoxicosis	357
• Mycotoxins	365
• Foodborne Viruses	380
• Prions	390
• Summary	392
• Important Review Questions	393
• Multiple Choice Questions	394

CHAPTER 13 Microbiology and Biochemistry of Fermented Food Products	398–427
• Introduction	398
• Fermentation as an Ecological Process	398
• Alcoholic Fermentation as a Natural Resource	403
• Yeasts	405
• Lactic Acid Bacteria	411
• <i>Summary</i>	424
• <i>Important Review Questions</i>	424
• <i>Multiple Choice Questions</i>	425
CHAPTER 14 Fermented Dairy Products	428–445
• Introduction	428
• Fermented Dairy Products	429
• Cheese	437
• <i>Summary</i>	443
• <i>Important Review Questions</i>	443
• <i>Multiple Choice Questions</i>	444
CHAPTER 15 Fermented Vegetable Products	446–465
• Introduction	446
• Basic Vegetable Fermentation Techniques	447
• Sauerkraut	448
• Kimchi	453
• Olives	456
• <i>Summary</i>	463
• <i>Important Review Questions</i>	463
• <i>Multiple Choice Questions</i>	464
CHAPTER 16 Fermented Meat and Fish Products	466–514
• Introduction	466
• Current Fermentation and Drying	466
• Raw Meat	476
• Inoculum	478
• Starter Cultures or ‘Seed’ Utilised	479
• Yeasts and Molds	484
• Other Ingredients	485
• Processing	488
• Stuffing	490
• Fermentation	491
• Smoking	492
• Heating	493
• Metabolism and Acidulation	494
• Sensory	496
• Pathogens	499
• Fermented Fish	504
• <i>Summary</i>	511
• <i>Important Review Questions</i>	512
• <i>Multiple Choice Questions</i>	512

CHAPTER 17 Beer, Vinegar and Mold Fermentation	515–542
• Introduction	515
• Beer Brewing Process	515
• Vinegar	522
• Mold Fermentation	528
• <i>Summary</i>	539
• <i>Important Review Questions</i>	540
• <i>Multiple Choice Questions</i>	540
CHAPTER 18 Detection, Identification and Analysis of Foodborne Pathogens	543–574
• Introduction	543
• Separation and Concentration of Microorganisms Present in Food	544
• Indicator Organisms and Water Quality Criteria	545
• Enumeration Procedures	547
• Alternative (or Rapid) Methods	550
• Pure Culture Methods	553
• Microscopic Examination of the Bacterial Culture	556
• Electrical Methods	561
• Impedance Microbiology	563
• Identification and Characterisation of Microorganisms	568
• <i>Summary</i>	571
• <i>Important Review Questions</i>	572
• <i>Multiple Choice Questions</i>	572
CHAPTER 19 Controlling the Microbiological Quality of Foods	575–623
• Introduction	575
• Quality and Criteria	575
• Microbiological Sampling Plans	577
• Traditional Microbiological Quality Control	586
• Food Safety	591
• Culinary (Food) Hygiene	597
• Sewage, Waste Treatment and Disposal	597
• Microbiology of the Food Product	599
• Cleaning and Sanitising Food-Contact Surfaces	603
• Microbiological Risk Assessment of Food	613
• Hazard Analysis: Critical Control Points (HACCP)-System	617
• <i>Summary</i>	620
• <i>Important Review Questions</i>	621
• <i>Multiple Choice Questions</i>	622
• Glossary	624–632
• Bibliography	633–634
• Index	635–648
