List of Contributors	xiii
Preface	xv
1. Introduction	
<i>Jeffrey W. Savell</i>	
1.1 Meat and Muscle	1
1.2 Meat From Other Animals	2
1.3 Domestication of Livestock	4
1.4 Trends and Developments	7
1.5 Conclusions and Future Trends	15
References	16
2. Factors Influencing the Growth of Meat Animals	
<i>Aidan P. Moloney, Mark McGee</i>	
2.1 Introduction	19
2.2 Measurement of Growth and Body/Carcass Composition	20
2.3 Animal Influences on Growth of Farm Animals	22
2.4 Nonanimal Influences on Growth of Farm Animals	29
2.5 Interactions Between Animal and Nonanimal Influences on Growth of Farm Animals	36
2.6 Future Developments	41
References	42
3. The Structure and Growth of Muscle	
<i>Peter P. Purslow</i>	
3.1 Introduction	49
3.2 Muscle Tissue	50
3.3 Generalized Skeletal Muscle Structure	51
3.4 The General Structure of the Striated (Skeletal) Muscle Cell	52
3.5 Muscle Fiber Types	59
3.6 Structure of the Individual Intramuscular Connective Tissues	61
3.7 Variations in Intramuscular Connective Tissue Content Between Muscles	64
3.8 Composition of Intramuscular Connective Tissues	64

3.9	Collagens in Muscle	64
3.10	Collagen Cross-Linking	67
3.11	Microfilaments and Elastin	68
3.12	Glycoproteins and Proteoglycans	71
3.13	Cell–Matrix Connectors: Laminin and Fibronectin, Dystrophin, and the Integrins	72
3.14	The Structure of Adipose Tissues	76
3.15	Muscle Development and Growth	77
3.16	Muscle Development in Embryogenesis and Prenatal Growth	77
3.17	Adipogenesis and Fibrillogenesis	79
3.18	Fetal Development	81
3.19	Postnatal Muscle Growth	81
3.20	Muscle Cells Grow by Incorporating Satellite Cells	85
3.21	Distribution and Percentage of Fat and Lean Muscle in the Growing Animal	85
3.22	Muscle Cuts	88
3.23	Conclusions and Future Trends	90
	References	91
4.	Chemical and Biochemical Constitution of Muscle	
	<i>Clemente López-Bote</i>	
4.1	General Chemical Aspects	99
4.2	Biochemical Aspects	116
4.3	Factors Affecting Meat Quality	132
4.4	Conclusions and Future Trends	149
	References	150
5.	The Conversion of Muscle to Meat	
	<i>Sulaiman K. Matarneh, Eric M. England, Tracy L. Scheffler, David E. Gerrard</i>	
5.1	Introduction	159
5.2	Postmortem Metabolism	160
5.3	The Factors Controlling the Rate of Postmortem Metabolism	167
5.4	The Factors Controlling the Extent of Postmortem Metabolism	168
5.5	Abnormal Postmortem Metabolism	170
5.6	Preslaughter Stress	173
5.7	Development of Meat Quality Attributes	175
5.8	Postmortem Handling and Meat Quality—Temperature	178
5.9	Aging and Proteolysis	179
5.10	Conclusions	182
	References	182

6. Meat Microbiology and Spoilage*Monique Zagorec, Marie-Christine Champomier-Vergès*

6.1	Introduction	187
6.2	Origin and Dynamics of Meat Microbial Contamination Involved in Spoilage	189
6.3	Mechanisms Involved in Meat Bacterial Spoilage	191
6.4	The Main Microbial Contaminants of Meat Involved in Spoilage	193
6.5	The Main Spoilage Manifestations and Their Microbial Causes	197
6.6	Future Trends	199
	References	200

7. The Storage and Preservation of Meat: I—Thermal Technologies*Youling L. Xiong*

7.1	Introduction	205
7.2	Chilling	206
7.3	Freezing	216
7.4	Heating	220
7.5	Novel Thermal Procedures	224
7.6	Future Trends	226
	References	226

8. The Storage and Preservation of Meat: II—Nonthermal Technologies*Dong U. Ahn, Aubrey F. Mendonça, Xi Feng*

8.1	Introduction	231
8.2	Ionizing Radiation	232
8.3	High Pressure	247
8.4	Freeze Dehydration	255
	References	259

9. The Storage and Preservation of Meat: III—Meat Processing*Fidel Toldrá*

9.1	Introduction	265
9.2	Curing	266
9.3	Fermentation	273
9.4	Dehydration	277
9.5	Smoking	280

9.6	Processing Technologies for Cured Meat Products	281
9.7	Conclusions and Future Trends	292
	References	292
10.	Storage and Preservation of Raw Meat and Muscle-Based Food Products: IV Storage and Packaging	
	<i>Joe P. Kerry, Andrey A. Tyufin</i>	
10.1	Introduction	297
10.2	Impact of Microbiology on Fresh Meat Quality Attributes	298
10.3	Common Technologies Used to Preserve Fresh Meat Products and Assist in a Combined Manner to Extend Product Shelf Life	299
10.4	Packaging Materials Used for Fresh Meat and Muscle-Based Products	309
10.5	Conclusions	320
	References	324
	Relevant Websites	327
11.	The Eating Quality of Meat: I—Color	
	<i>Cameron Faustman, Surendranath P. Suman</i>	
11.1	Introduction	329
11.2	Myoglobin Concentration	329
11.3	Myoglobin Structure	332
11.4	Color Phenomena in Fresh Meat	336
11.5	Color in Cooked Nitrite-Cured and Salted Uncooked Meats	343
11.6	Cooked Meat Color	345
11.7	Anomalies in Meat Color	347
11.8	Measuring Meat Color	350
11.9	Summary Statement	351
	References	351
12.	The Eating Quality of Meat: II—Tenderness	
	<i>David L. Hopkins</i>	
12.1	Introduction	357
12.2	Measuring Tenderness	374
12.3	Conclusions and Future Trends	375
	References	376

13. The Eating Quality of Meat: III—Flavor

Mónica Flores

13.1	Aroma and Taste Compounds	383
13.2	Volatile Compounds Generation Reactions	384
13.3	Methodology for Meat Aroma Volatile Identification	392
13.4	Pre- and Postslaughter Factors Affecting Aroma	398
13.5	Off-Flavors	403
13.6	Meat Product Flavor	407
13.7	Conclusions and Future Trends	412
	References	412

14. The Eating Quality of Meat—IV Water-Holding Capacity and Juiciness

Robyn D. Warner

14.1	Introduction	419
14.2	Definition of Water-Holding Capacity and Juiciness	419
14.3	Structural Influences on the Water-Holding Capacity of Uncooked (Raw) Meat	422
14.4	Factors Influencing Water-Holding Capacity in Raw Muscle	424
14.5	Changes in Water-Holding Capacity During Cooking of Raw Meat	430
14.6	Juiciness—Influencing Factors and Interactions With Water-Holding Capacity	437
14.7	Factors Influencing Water-Holding Capacity of Meat Products	438
14.8	Methods to Measure Water-Holding Capacity and Juiciness	446
14.9	Conclusions and Future Trends	452
	References	453

15. The Eating Quality of Meat: V—Sensory Evaluation of Meat

Rhonda K. Miller

15.1	Introduction	461
15.2	Why Sensory Evaluation of Meat Is Unique	462
15.3	Overview of How Sensory Is Perceived and Defining Sensory Attributes	463
15.4	Sensory Controls for Meat	472
15.5	Sensory Techniques	478
15.6	Emerging or Underutilized Sensory Techniques	496
15.7	Conclusions	498
	References	498

16. Phenotyping of Animals and Their Meat: Applications of Low-Power Ultrasounds, Near-Infrared Spectroscopy, Raman Spectroscopy, and Hyperspectral Imaging

*Donato Andueza, Benoît-Pierre Mourot,
Jean-François Hocquette, Jacques Mourot*

16.1	Introduction	501
16.2	Principles of the Main Methods	502
16.3	Applications in Meat Quality Assessment	506
16.4	Conclusions	513
	Acknowledgment	514
	References	514

17. Meat Safety—I Foodborne Pathogens and Other Biological Issues

Alexandra Lianou, Efstathios Z. Panagou, George-John E. Nychas

17.1	Introduction	521
17.2	Foodborne Illnesses Associated With the Consumption of Meat and Meat Products	522
17.3	Bacteria and Bacterial Toxins	523
17.4	Viruses	538
17.5	Parasites	541
17.6	Prions	543
17.7	Current and Emerging Challenges to Meat Safety Management	544
17.8	Concluding Remarks and Future Trends	546
	References	546

18. Meat Safety: II Residues and Contaminants

Marilena E. Dasenaki, Nikolaos S. Thomaidis

18.1	Introduction	553
18.2	Chemical Contaminants and Residues	554
18.3	Risk Assessment	567
18.4	Analytical Methods	568
18.5	Future Trends and Perspectives	577
	References	578

19. Meat Authenticity and Traceability

Luca Fontanesi

19.1	General Overview	585
19.2	Intrinsic Characteristics of the Meat	587
19.3	Extrinsic Characteristics of the Meat	618
19.4	Conclusions and Future Trends	622
	References	623

20. Meat Composition and Nutritional Value*Jeffrey D. Wood*

20.1	Introduction	635
20.2	Meat Consumption Patterns	635
20.3	Composition of Meat	636
20.4	Effects of Cooking on Nutrients in Meat	653
20.5	Conclusions and Future Possibilities	654
	References	655

21. Meat and Health*Kerri B. Gehring*

21.1	Introduction: Nutrients Supplied From Meat	661
21.2	Meat in Healthy Nutrition and Diet	663
21.3	Recommended Meat Intakes	668
21.4	Functional Muscle Foods	670
21.5	Problematics With Toxins and Residues	671
21.6	Conclusions	674
	References	674

22. Edible By-products*Herbert W. Ockerman, Lopa Basu, Fidel Toldrá*

22.1	Introduction	679
22.2	Main Edible By-products	680
22.3	Nutritional Value of Edible By-products	684
22.4	Products Resulting From Edible By-products	691
22.5	Added Value Products Obtained From Edible By-products	693
22.6	Conclusions and Future Trends	694
	References	694

Index	697
