
Contents

1	Introduction	1
1.1	Basic Definitions	2
1.2	Elements of the Vibration Models	4
1.3	Particle Dynamics	10
1.4	Systems of Particles	15
1.5	Dynamics of Rigid Bodies	19
1.6	Linearization of the Differential Equations	26
1.7	Idealization and Scope of the Vibration Theory	29
	Problems	34
2	Solution of the Vibration Equations	37
2.1	Homogeneous Differential Equations	38
2.2	Initial Conditions	51
2.3	Nonhomogeneous Equations	55
2.4	Stability of Motion	61
2.5	Harmonic Oscillations	65
	Problems	67
3	Free Vibration	69
3.1	Free Undamped Vibration	69
3.2	Equivalent Systems	79
3.3	Free Damped Vibration	90
3.4	Experimental Measurement	99
3.5	Structural Damping	103
3.6	Coulomb Damping	106
3.7	Motion Stability	110
3.8	Impact Dynamics	115
	Problems	120
4	Forced Vibration	129
4.1	Differential Equation of Motion	129
4.2	Forced Undamped Vibration	130
4.3	Resonance and Beating	136
4.4	Forced Vibration of Damped Systems	141

4.5	Rotating Unbalance	149
4.6	Base Motion	156
4.7	Measuring Instruments	162
4.8	Experimental Methods for Damping Evaluation	165
	Problems	171
5	Response to Nonharmonic Forces	177
5.1	Periodic Forcing Functions	177
5.2	Determination of the Fourier Coefficients	179
5.3	Special Cases	183
5.4	Vibration Under Periodic Forcing Functions	186
5.5	Numerical Evaluation of Fourier Coefficients	193
5.6	Impulsive Motion	199
5.7	Response to an Arbitrary Forcing Function	203
5.8	Numerical Evaluation of the Duhamel Integral	207
5.9	Frequency Contents in Arbitrary Forcing Functions	212
5.10	Computer Methods in Nonlinear Vibration	214
	Problems	225
6	Systems with More Than One Degree of Freedom	233
6.1	Free Undamped Vibration	234
6.2	Matrix Equations	240
6.3	Damped Free Vibration	255
6.4	Undamped Forced Vibration	267
6.5	Vibration Absorber of the Undamped System	274
6.6	Forced Vibration of Damped Systems	277
6.7	The Untuned Viscous Vibration Absorber	281
6.8	Multi-degree of Freedom Systems	286
6.9	Continuous Systems	293
	Problems	295
7	Continuous Systems	305
7.1	Free Longitudinal Vibrations	306
7.2	Free Torsional Vibrations	318
7.3	Free Transverse Vibrations	323
7.4	Orthogonality of the Eigenfunctions	331
7.5	Forced Longitudinal and Torsional Vibrations	338
7.6	Forced Transverse Vibrations	343
	Problems	345
8	Special Topics	349
8.1	Motion Control	349
8.2	Nonlinear Dynamics	353
8.3	Limit Cycle and Bifurcation	357
8.4	Linearization and Perturbation	358
