

Pollution Prevention: Fundamentals and Practice

Paul L. Bishop

McGRAW-HILL INTERNATIONAL EDITIONS
Civil Engineering Series

CONTENTS

1 Introduction to Pollution Prevention	1	<i>Transport Processes / 2.3.3</i>	
1.1 The 3M Experience	1	<i>Partitioning Processes / 2.3.4</i>	
1.2 Pollution Prevention	3	<i>Transformation Processes</i>	
1.3 The Historical Perspective	6	References	72
<i>1.3.1 The Industrial Revolution /</i>		Problems	73
<i>1.3.2 Impacts of Industrialization</i>			
1.4 What Is Pollution Prevention?	9	3 Industrial Activity and the Environment	78
<i>1.4.1 Waste Definition / 1.4.2</i>		3.1 Introduction	78
<i>Pollution Prevention Definition /</i>		3.2 Air Pollution	79
<i>1.4.3 Other Terms / 1.4.4</i>		<i>3.2.1 The Atmosphere / 3.2.2</i>	
<i>Sustainability</i>		<i>Smog Formation / 3.2.3 Acid</i>	
1.5 The Pollution Prevention Hierarchy	13	<i>Rain / 3.2.4 Global Warming /</i>	
1.6 Recycling vs. Pollution Prevention	14	<i>3.2.5 Ozone Depletion</i>	
1.7 Environmental Ethics	15	3.3 Solid Wastes	102
References	19	<i>3.3.1 Sources and Composition /</i>	
Problems	20	<i>3.3.2 Solid Waste Management /</i>	
		<i>3.3.3 Conservation</i>	
2 Properties and Fates of Environmental Contaminants	22	3.4 Hazardous Wastes	114
2.1 Organic Chemicals	23	<i>3.4.1 Superfund Sites / 3.4.2</i>	
<i>2.1.1 Nomenclature of Organic</i>		<i>Resource Conservation and</i>	
<i>Chemicals</i>		<i>Recovery Act</i>	
2.2 Metals and Inorganic Nonmetals	39	3.5 Water Pollution	118
<i>2.2.1 Arsenic / 2.2.2 Cadmium /</i>		<i>3.5.1 Minamata Disease / 3.5.2</i>	
<i>2.2.3 Chromium / 2.2.4 Lead /</i>		<i>The Kepone Incident / 3.5.3</i>	
<i>2.2.5 Mercury / 2.2.6 Cyanides</i>		<i>Industrial Wastewater Treatment</i>	
2.3 Contaminant Transport and Transformation in the Environment	44	3.6 Energy Usage	121
<i>2.3.1 Contaminant Concentrations / 2.3.2</i>		<i>3.6.1 Historical Perspective /</i>	
		<i>3.6.2 Energy Consumption /</i>	
		<i>3.6.3 Energy Reserves / 3.6.4</i>	
		<i>Fossil Fuels / 3.6.5 Nuclear</i>	
		<i>Energy / 3.6.6 Renewable</i>	
		<i>Energy Sources / 3.6.7</i>	
		<i>Electricity / 3.6.8 Energy</i>	
		<i>Conservation</i>	
		3.7 Resource Depletion	138
		<i>3.7.1 Earth's Structure / 3.7.2</i>	
		<i>Recoverable Resources / 3.7.3</i>	
		<i>Mineral Resources</i>	

References	142	References	247
Problems	144	Problems	248
4 Environmental Regulations	147	6 Life-Cycle Assessment	251
4.1 Introduction	147	6.1 Overview of Life-Cycle Assessment	251
4.2 The Regulatory Process	149	6.2 History of Life-Cycle Assessment Development	253
4.3 Environmental Regulations	150	6.3 Life-Cycle Assessment and the Regulatory Process	254
4.3.1 <i>Laws Pertaining to Clean Air</i> / 4.3.2 <i>Laws Pertaining to Clean Water</i> / 4.3.3 <i>Laws Pertaining to Hazardous Materials and Wastes</i> / 4.3.4 <i>Laws Pertaining to Products</i> / 4.3.5 <i>Laws Pertaining to Pollution Prevention</i>		6.4 Life-Cycle Assessment Methodology	255
References	178	6.4.1 <i>Goal Definition and Scoping Stage</i> / 6.4.2 <i>Inventory Analysis</i> / 6.4.3 <i>Impact Analysis</i> / 6.4.4 <i>Improvement Analysis</i>	
Problems	178	6.5 Streamlining Life-Cycle Assessments	269
5 Improved Manufacturing Operations	180	6.6 Pollution Prevention Factors	271
5.1 Introduction	180	6.7 Application of Life-Cycle Assessment	277
5.2 The Manufacturing Process	183	6.7.1 <i>Corporate Strategic Planning</i> / 6.7.2 <i>Product Development</i> / 6.7.3 <i>Process Selection and Modification</i> / 6.7.4 <i>Marketing Claims and Advertising</i> / 6.7.5 <i>Ecolabeling</i>	
5.2.1 <i>Sequential Engineering</i> / 5.2.2 <i>Concurrent Engineering</i> / 5.2.3 <i>Manufacturing Processes</i>		6.8 Use of Computer Models in Life-Cycle Assessment	287
5.3 Process Development and Design	215	6.9 Life-Cycle Assessment in Waste Management Operations	288
5.3.1 <i>Computer Tools</i>		References	292
5.4 Process Changes	220	Problems	294
5.4.1 <i>Advanced Process Technologies</i> / 5.4.2 <i>Product Changes</i> / 5.4.3 <i>Storage</i> / 5.4.4 <i>Management</i>		7 Pollution Prevention Economics	296
5.5 Pollution Prevention Examples	239	7.1 Overview of Economics	296
5.5.1 <i>Acrylonitrile Manufacturing</i> / 5.5.2 <i>Maleic Anhydride Production</i>

8 Pollution Prevention

Planning	329
8.1	Introduction
	329
8.2	Structure of the Pollution
	Prevention Process
	330
8.2.1	Organizing the Program /
8.2.2	Preliminary Assessment /
8.2.3	Pollution Prevention
	Program Plan Development /
8.2.4	Developing and
	Implementing Pollution
	Prevention Projects / 8.2.5
	Implementing the Pollution
	Prevention Plan / 8.2.6
	Measuring Pollution Prevention
	Progress
8.3	Environmental
	Management Systems
	340
8.4	Environmental Audits
	343
8.4.1	Emissions Inventory

8.5	Toxic Release Inventory	346
8.5.1	Toxic Release Inventory	
	Reporting Requirements /	
8.5.2	Toxic Release Inventory	
	Chemicals / 8.5.3 Problems	
	with Toxic Release Inventory	
	Data	
	References	350
	Problems	351

9 Design for the Environment

9.1	Introduction	353
9.1.1	Design for X / 9.1.2	
	Chapter Focus	
9.2	Green Chemistry	357
9.2.1	Sources of Wastes / 9.2.2	
	Alternative Synthetic Pathways /	
9.2.3	Alternative Reaction	
	Conditions / 9.2.4 Design of	
	Safer Chemicals / 9.2.5 Green	
	Chemistry Research Needs	
9.3	Design for Disassembly/	
	Demanufacturing	386
9.3.1	Recycle versus Reuse /	
9.3.2	Recycle/Reuse Hierarchy /	
9.3.3	Recycle Legislation / 9.3.4	
	Requirements for Effective	
	Reuse/Recycling / 9.3.5	
	Disassembly Strategy / 9.3.6	
	Computer-Aided Design / 9.3.7	
	Waste Exchanges / 9.3.8	
	Recovery through Composting or	
	Energy Reuse / 9.3.9 Barriers	
	to Reuse	
9.4	Packaging	410
9.4.1	Minimizing Packaging /	
9.4.2	Degradable Packaging	
	References	417
	Problems	419

10 Water, Energy, and Reagent Conservation	421	<i>Unit-Specific Correlation Approach</i>	
10.1 Introduction	421	12.4 Controlling Fugitive Emissions	519
10.2 Reduction in Water Use for Cleaning	422	12.4.1 Equipment Modification /	
10.2.1 Case Study		12.4.2 Leak Detection and Repair Programs	
10.3 Pinch Analysis	430	12.5 Fugitive Emissions from Storage Tanks	524
10.3.1 Thermal Pinch Analysis /		12.5.1 Emissions Estimation /	
10.3.2 Pinch Analysis for Water Use / 10.3.3 Pinch Analysis for Process Emissions /		12.5.2 Emissions Control	
10.3.4 Summary		12.6 Fugitive Emissions from Waste Treatment and Disposal	530
References	450	References	531
Problems	450	Problems	532
11 Residuals Management	454	13 Municipal Pollution Prevention Programs	533
11.1 Introduction	454	13.1 Introduction	533
11.2 Wastewater Treatment	455	13.2 Regulatory Basis for Pollution Prevention Programs	534
11.2.1 Treatment Options /		13.2.1 Resource Conservation and Recovery Act and Hazardous and Solid Waste Amendments / 13.2.2 Emergency Planning and Community Right-to-Know Act /	
11.2.2 Physicochemical Processes / 11.2.3 Biological Waste Treatment / 11.2.4 Sludge Management		13.2.3 Clean Water Act / 13.2.4 Pollution Prevention Act /	
11.3 Air Pollution Control	499	13.2.5 Regional Pollution Prevention Initiatives: Great Lakes Water Quality Initiative	
11.3.1 Particulate Control /		13.3 Source Control and Pretreatment Permit Programs	539
11.3.2 Gas Removal		13.3.1 Mandatory Programs /	
11.4 Solid Waste Disposal	504	13.3.2 Local Discharge Standards, Limits, and Authority	
References	504		
Problems	505		
12 Fugitive Emissions	509		
12.1 Introduction	509		
12.2 Sources and Amounts	511		
12.3 Measuring Fugitive Emissions	512		
12.3.1 Average Emission Factor Approach / 12.3.2 Screening Ranges Approach / 12.3.3 EPA Correlation Approach / 12.3.4			

13.4	Types of POTW-Administered Pollution Prevention Programs	542			<i>United Nations Conference on Environment and Development</i>
	<i>13.4.1 Voluntary Programs /</i>				
	<i>13.4.2 Regulatory and Enforcement Programs /</i>				
	<i>13.4.3 Market-Based Programs and Pollution Prevention Incentives /</i>				
	<i>13.4.4 Measuring Pollution Prevention Progress</i>				
13.5	Desirable Qualities of a Municipal P2 Program	558			
	<i>13.5.1 Industry Requests /</i>				
	<i>13.5.2 Publicly Owned Treatment Works Requests</i>				
13.6	Development of Publicly Administered Pollution Prevention Programs	561			
	<i>13.6.1 Program Recommendation /</i>				
	<i>13.6.2 Program Implementation</i>
