|--|----------------|
| <i>Preface</i>                                     | <i>page xi</i> |
| <b>1 Quarks and leptons</b>                        | <b>1</b>       |
| 1.1 Preamble                                       | 1              |
| 1.2 The Standard Model of particle physics         | 7              |
| 1.3 Particle classification: fermions and bosons   | 12             |
| 1.4 Particles and antiparticles                    | 13             |
| 1.5 Free particle wave equations                   | 16             |
| 1.6 Helicity states: helicity conservation         | 19             |
| 1.7 Lepton flavours                                | 20             |
| 1.8 Quark flavours                                 | 22             |
| 1.9 The cosmic connection                          | 26             |
| Problems   | 33             |
| <b>2 Interactions and fields</b>                   | <b>35</b>      |
| 2.1 Classical and quantum pictures of interactions | 35             |
| 2.2 The Yukawa theory of quantum exchange          | 36             |
| 2.3 The boson propagator                           | 37             |
| 2.4 Feynman diagrams                               | 38             |
| 2.5 Electromagnetic interactions                   | 40             |
| 2.6 Renormalisation and gauge invariance           | 42             |
| 2.7 Strong interactions                            | 43             |
| 2.8 Weak and electroweak interactions              | 46             |
| 2.9 Gravitational interactions                     | 51             |
| 2.10 The interaction cross-section                 | 51             |
| 2.11 Decays and resonances                         | 55             |
| Problems   | 61             |

|          |   |            |
|----------|---|------------|
| <b>3</b> | <b>Invariance principles and conservation laws</b>          | <b>63</b>  |
| 3.1      | Translation and rotation operators                          | 63         |
| 3.2      | The parity operation  | 65         |
| 3.3      | Pion spin and parity  | 66         |
| 3.4      | Parity of particles and antiparticles                       | 69         |
| 3.5      | Tests of parity conservation                                | 72         |
| 3.6      | Charge conjugation invariance                               | 73         |
| 3.7      | Charge conservation and gauge invariance                    | 75         |
| 3.8      | Baryon and lepton conservation                              | 79         |
| 3.9      | <i>CPT</i> invariance                                       | 81         |
| 3.10     | <i>CP</i> violation and <i>T</i> violation                  | 81         |
| 3.11     | Neutron electric dipole moment                              | 83         |
| 3.12     | Isospin symmetry  | 87         |
| 3.13     | Isospin in the two-nucleon and pion–nucleon systems         | 88         |
| 3.14     | Isospin, strangeness and hypercharge                        | 91         |
|          | Problems  | 93         |
| <b>4</b> | <b>Quarks in hadrons</b>                                    | <b>95</b>  |
| 4.1      | Charm and beauty; the heavy quarkonium states               | 95         |
| 4.2      | Comparison of quarkonium and positronium levels             | 102        |
| 4.3      | The baryon decuplet   | 109        |
| 4.4      | Quark spin and colour                                       | 114        |
| 4.5      | The baryon octet  | 115        |
| 4.6      | Quark–antiquark combinations: the light pseudoscalar mesons | 118        |
| 4.7      | The light vector mesons                                     | 121        |
| 4.8      | Other tests of the quark model                              | 123        |
| 4.9      | Mass relations and hyperfine interactions                   | 126        |
| 4.10     | Electromagnetic mass differences and isospin symmetry       | 129        |
| 4.11     | Magnetic moments of baryons                                 | 130        |
| 4.12     | Mesons built of light and heavy quarks                      | 132        |
| 4.13     | The top quark   | 134        |
|          | Problems  | 139        |
| <b>5</b> | <b>Lepton and quark scattering</b>                          | <b>140</b> |
| 5.1      | The process $e^+e^- \rightarrow \mu^+\mu^-$                 | 140        |
| 5.2      | $e^+e^-$ annihilation to hadrons                            | 144        |
| 5.3      | Electron–muon scattering, $e^-\mu^+ \rightarrow e^-\mu^+$   | 147        |
| 5.4      | Neutrino–electron scattering, $\nu_e e \rightarrow \nu_e e$ | 150        |
| 5.5      | Elastic lepton–nucleon scattering                           | 154        |
| 5.6      | Deep inelastic scattering and partons                       | 155        |
| 5.7      | Deep inelastic scattering and quarks                        | 159        |

|          |  |            |
|----------|--|------------|
| 5.8      | Experimental results on quark distributions in the nucleon       | 162        |
| 5.9      | Sum rules  | 166        |
| 5.10     | Summary  | 168        |
|          | Problems   | 168        |
| <b>6</b> | <b>Quark interactions and QCD</b>                                | <b>171</b> |
| 6.1      | The colour quantum number  | 171        |
| 6.2      | The QCD potential at short distances                             | 172        |
| 6.3      | The QCD potential at large distances: the string model           | 178        |
| 6.4      | Gluon jets in $e^+e^-$ annihilation                              | 180        |
| 6.5      | Running couplings in QED and QCD                                 | 181        |
| 6.6      | Evolution of structure functions in deep inelastic scattering    | 186        |
| 6.7      | Gluonium and the quark–gluon plasma                              | 190        |
|          | Problems   | 192        |
| <b>7</b> | <b>Weak interactions</b>   | <b>194</b> |
| 7.1      | Classification   | 194        |
| 7.2      | Lepton universality  | 195        |
| 7.3      | Nuclear $\beta$ -decay: Fermi theory                             | 197        |
| 7.4      | Inverse $\beta$ -decay: neutrino interactions                    | 201        |
| 7.5      | Parity nonconservation in $\beta$ -decay                         | 202        |
| 7.6      | Helicity of the neutrino   | 205        |
| 7.7      | The $V - A$ interaction  | 206        |
| 7.8      | Conservation of weak currents                                    | 209        |
| 7.9      | The weak boson and Fermi couplings                               | 210        |
| 7.10     | Pion and muon decay  | 210        |
| 7.11     | Neutral weak currents  | 213        |
| 7.12     | Observation of $W^\pm$ and $Z^0$ bosons in $p\bar{p}$ collisions | 215        |
| 7.13     | $Z^0$ production at $e^+e^-$ colliders                           | 220        |
| 7.14     | Weak decays of quarks. The GIM model and the CKM matrix          | 221        |
| 7.15     | Neutral $K$ mesons   | 226        |
| 7.16     | $CP$ violation in the neutral kaon system                        | 232        |
| 7.17     | Cosmological $CP$ violation                                      | 237        |
| 7.18     | $D^0-\bar{D}^0$ and $B^0-\bar{B}^0$ mixing                       | 238        |
|          | Problems   | 239        |
| <b>8</b> | <b>Electroweak interactions and the Standard Model</b>           | <b>242</b> |
| 8.1      | Introduction   | 242        |
| 8.2      | Divergences in the weak interactions                             | 243        |
| 8.3      | Introduction of neutral currents                                 | 245        |
| 8.4      | The Weinberg–Salam model   | 246        |

|           |   |            |
|-----------|---|------------|
| 8.5       | Intermediate boson masses   | 248        |
| 8.6       | Electroweak couplings of leptons and quarks                       | 249        |
| 8.7       | Neutrino scattering via $Z$ exchange                              | 250        |
| 8.8       | Asymmetries in the scattering of polarised electrons by deuterons | 253        |
| 8.9       | Observations on the $Z$ resonance                                 | 255        |
| 8.10      | Fits to the Standard Model and radiative corrections              | 260        |
| 8.11      | $W$ pair production   | 262        |
| 8.12      | Spontaneous symmetry breaking and the Higgs mechanism             | 263        |
| 8.13      | Higgs production and detection                                    | 271        |
|           | Problems  | 274        |
| <b>9</b>  | <b>Physics beyond the Standard Model</b>                          | <b>276</b> |
| 9.1       | Supersymmetry   | 277        |
| 9.2       | Grand unified theories: the $SU(5)$ GUT                           | 278        |
| 9.3       | Unification energy and weak mixing angle                          | 280        |
| 9.4       | Supersymmetric $SU(5)$  | 282        |
| 9.5       | Proton decay  | 282        |
| 9.6       | Neutrino mass: Dirac and Majorana neutrinos                       | 284        |
| 9.7       | Neutrino oscillations   | 287        |
| 9.8       | Magnetic monopoles  | 299        |
| 9.9       | Superstrings  | 300        |
|           | Problems  | 301        |
| <b>10</b> | <b>Particle physics and cosmology</b>                             | <b>303</b> |
| 10.1      | Hubble's law and the expanding universe                           | 303        |
| 10.2      | Friedmann equation  | 304        |
| 10.3      | Cosmic microwave radiation: the hot Big Bang                      | 307        |
| 10.4      | Radiation and matter eras   | 311        |
| 10.5      | Nucleosynthesis in the Big Bang                                   | 313        |
| 10.6      | Baryon–antibaryon asymmetry                                       | 317        |
| 10.7      | Dark matter   | 319        |
| 10.8      | Inflation   | 326        |
| 10.9      | Neutrino astronomy: SN 1987A                                      | 330        |
|           | Problems  | 336        |
| <b>11</b> | <b>Experimental methods</b>                                       | <b>338</b> |
| 11.1      | Accelerators  | 338        |
| 11.2      | Colliding-beam accelerators                                       | 343        |
| 11.3      | Accelerator complexes   | 346        |
| 11.4      | Secondary particle separators                                     | 346        |
| 11.5      | Interaction of charged particles and radiation with matter        | 349        |
