

Methods in Molecular Biology™

VOLUME 194

Posttranslational Modifications of Proteins

Tools for Functional Proteomics

Edited by
Christoph Kannicht

HUMANA PRESS

Contents

Preface	v
Contributors	ix
1 Assignment of Disulfide Bonds in Proteins by Chemical Cleavage and Peptide Mapping by Mass Spectrometry Jiang Wu and J. Throck Watson	1
2 Carbohydrate Composition Analysis of Glycoproteins Using Highly Sensitive Fluorescence Detection Methods George N. Soddic, Mary Beth Ebert, Shirish T. Dhume, and Kalyan R. Anumula	23
3 Enzymatical Hydrolysis of N-Glycans from Glycoproteins and Fluorescent Labeling by 2-Aminobenzamide (2-AB) Rolf Nuck	37
4 Separation of N-Glycans by HPLC Martin Gohlke	45
5 Enzymatic Sequence Analysis of N-Glycans Christoph Kannicht and Anke Flechner	63
6 Immunological Detection of O-GlcNAc Monika Rex-Mathes, Jürgen Koch, Sabine Werner, Lee S. Griffith, and Brigitte Schmitz	73
7 Analysis of O-Glycosylation Juan J. Calvete and Libia Sanz	89
8 Characterization of Site-Specific Glycosylation Katalin F. Medzihradsky	101
9 Monitoring Glycosylation of Therapeutic Glycoproteins for Consistency Using Highly Fluorescent Anthranilic Acid Shirish T. Dhume, Mary Beth Ebert, George N. Soddic, and Kalyan R. Anumula	127
10 Metabolic Labeling and Structural Analysis of Glycosylphosphatidylinositols from Parasitic Protozoa Peter Gerold and Ralph T. Schwarz	143
11 Analysis of S-Acylation of Proteins Michael Velt, Evgeni Ponlmaskin, and Michael F. G. Schmidt	159

12	Immunoblotting Methods for the Study of Protein Ubiquitination Edward G. Mimnaugh and Leonard M. Neckers	179
13	Analysis of Methylation and Acetylation in <i>E. coli</i> Ribosomal Proteins Randy J. Arnold and James P. Reilly	205
14	Identification of In Vivo Protein Phosphorylation Sites with Mass Spectrometry Jun Qin and Xiaolong Zhang	211
15	Analysis of Tyrosine-O-Sulfation Jens R. Bundgaard, Anders H. Johnsen, and Jens F. Rehfeld	223
16	α -Amidated Peptides: <i>Approaches for Analysis</i> Gregory P. Mueller and William J. Driscoll	241
17	γ -Glutamate and β -Hydroxyaspartate in Proteins Francis J. Castellino, Victoria A. Ploplis, and Li Zhang	259
18	Detection of isoAspartate Residues as a Posttranslational Modification of Proteins and Peptides Verne Schirch, Sonia Delle Fratte, and Martino di Salvo	269
19	Lysine Hydroxylation and Crosslinking of Collagen Mitsuo Yamauchi and Masashi Shilba	277
20	Heterologous Expression in Endocrine Cells for Analysis of Posttranslational Modifications Jens R. Bundgaard	291
21	2D-Electrophoresis: <i>Detection of Glycosylation and Influence on Spot Pattern</i> Klemens Löster and Christoph Kannicht	301
	Index	317
