CHAPTER 1 INTRODUCTION TO SUBSURFACE MAPPING 1

TEXTBOOK OVERVIEW 1**THE PHILOSOPHICAL DOCTRINE OF ACCURATE SUBSURFACE
INTERPRETATION AND MAPPING 3****TYPES OF SUBSURFACE MAPS AND CROSS SECTIONS 7**

CHAPTER 2 CONTOURING AND CONTOURING TECHNIQUES 8

INTRODUCTION 8**THREE-DIMENSIONAL PERSPECTIVE 9****RULES OF CONTOURING 12****METHODS OF CONTOURING BY HAND 16****COMPUTER-BASED CONTOURING CONCEPTS AND APPLICATIONS 23**

Surface Modeling 23

Steps Involved in Gridding 24

Conformable Geology and Multi-Surface Stacking 28

Contouring Faulted Surfaces on the Computer 34

**CHAPTER 3 DIRECTIONALLY DRILLED WELLS
AND DIRECTIONAL SURVEYS 43**

INTRODUCTION 43**APPLICATION OF DIRECTIONALLY DRILLED WELLS 43**

COMMON TYPES OF DIRECTIONALLY DRILLED WELLS 44

General Terminology 44

Horizontal Wells 44

DIRECTIONAL WELL PLAN 47**DIRECTIONAL TOOLS USED FOR MEASUREMENTS 48**

Magnetic Surveys 50

Nonmagnetic Surveys 50

DIRECTIONAL SURVEY CALCULATIONS 50**DIRECTIONAL SURVEY UNCERTAINTIES 52****DIRECTIONAL WELL PLOTS 54**

CHAPTER 4 LOG CORRELATION TECHNIQUES 60

INTRODUCTION 60

General Log Measurement Terminology 60

ELECTRIC LOG CORRELATION PROCEDURES AND GUIDELINES 61**CORRELATION TYPE LOG 65****ELECTRIC LOG CORRELATION — VERTICAL WELLS 69**

Log Correlation Plan 69

Basic Concepts in Electric Log Correlation 71

Faults Versus Variations in Stratigraphy 73

Pitfalls in Vertical Well Log Correlation 79

ELECTRIC LOG CORRELATION — DIRECTIONALLY DRILLED WELLS 81

- Log Correlation Plan 81
- Correlation of Vertical and Directionally Drilled Wells 84
- Estimating the Missing Section for Normal Faults 86
- MLT, TVDT, TVT, and TST 99

ELECTRIC LOG CORRELATION — HORIZONTAL WELLS 101

- Direct Detection of Bed Boundaries 102
- Modeling Log Response of Bed Boundaries and Fluid Contacts 102
- True Vertical Depth Cross Section 102
- True Stratigraphic Depth Method 105

COMPUTER-BASED LOG CORRELATION 108

- Well Log Correlation: The Transition from Paper-Based to Screen-Based 108
- On-Screen Log Correlation 109
- Example of Unconformity Identification 113
- Example of Fault Identification 114

REPEATED SECTION 117**ESTIMATING RESTORED TOPS 123**

- Vertical Wells 123
- Deviated Wells 125

UNCONFORMITIES 128**ANNOTATION AND DOCUMENTATION 129**

**CHAPTER 5 INTEGRATION OF GEOPHYSICAL DATA
IN SUBSURFACE MAPPING 134**

INTRODUCTION AND PHILOSOPHY 134

- Seismic Data Applied to Subsurface Interpretations 135
- Assumptions and Limitations 135

THE PROCESS 136**DATA VALIDATION AND INTERPRETATION 139**

- Examining the Seismic Sections 139
- Concepts in Tying Seismic Data 143
- Procedures in Tying Seismic Data 149
- Mis-ties 160

DATA EXTRACTION 166

- Picking and Posting 166
- Converting Time to Depth 169

SOME FINAL THOUGHTS ON SEISMIC MAPPING 174

CHAPTER 6 CROSS SECTIONS 175

INTRODUCTION 175**PLANNING A CROSS SECTION 176****STRUCTURAL CROSS SECTIONS 176**

- Electric Log Sections 180
- Stick Sections 182

STRATIGRAPHIC CROSS SECTIONS 182**PROBLEM-SOLVING CROSS SECTIONS 183****FINISHED ILLUSTRATION (SHOW) CROSS SECTIONS 185****CORRELATION SECTIONS 193**

| | |
|--|----------------|
| CROSS SECTION DESIGN | 195 |
| Extensional Structures | 197 |
| Diapiric Salt Structures | 197 |
| Compressional Structures | 199 |
| Strike-Slip Faulted Structures | 199 |
| VERTICAL EXAGGERATION | 201 |
| PROJECTION OF WELLS | 204 |
| Plunge Projection | 206 |
| Strike Projection | 209 |
| Other Types of Projections | 213 |
| Projection of Deviated Wells | 213 |
| Projecting a Well into a Seismic Line | 217 |
| CROSS SECTION CONSTRUCTION ACROSS FAULTS | 217 |
| THREE-DIMENSIONAL VIEWS | 223 |
| Log Maps | 223 |
| Fence Diagrams | 223 |
| Isometric Projections | 228 |
| Three-Dimensional Reservoir Analysis Model | 228 |
| CROSS SECTION CONSTRUCTION USING A COMPUTER | 234 |
| Correlation Cross Sections | 235 |
| Stratigraphic Cross Sections | 235 |
| Structural Cross Sections | 237 |
| FAULT SEAL ANALYSIS | 240 |
| Fault Surface Sections Constructed by Hand | 243 |
| Computer-Based Fault Seal Analysis | 247 |
| Conclusions | 250 |

CHAPTER 7 FAULT MAPS 251

INTRODUCTION 251**FAULT TERMINOLOGY 253****DEFINITION OF FAULT DISPLACEMENT 255****MATHEMATICAL RELATIONSHIP OF THROW TO VERTICAL SEPARATION 256****Quantitative Relationship 258****FAULT DATA DETERMINED FROM WELL LOGS 260****FAULT SURFACE MAP CONSTRUCTION 263****Contouring Guidelines 266****Fault Surface Map Construction Techniques 267****TYPES OF FAULT PATTERNS 271****Extensional Faulting 271****Compressional Faulting 289****FAULT DATA DETERMINED FROM SEISMIC INFORMATION 298****Seismic and Well Log Data Integration — Fault Surface Map Construction 305****Seismic Pitfalls 308****GROWTH FAULTS 314****Estimating the Vertical Separation for a Growth Fault 314****Growth-Fault Surface Map Construction 321**

DIRECTIONAL SURVEYS AND FAULT SURFACE MAPS 322

Directional Well Pitfalls 327

Fault Maps, Directional Wells, and Repeated Sections 329

VERTICAL SEPARATION — CORRECTION FACTOR AND DOCUMENTATION 329

CHAPTER 8 STRUCTURE MAPS 332

INTRODUCTION 332**GUIDELINES TO CONTOURING 334****SUMMARY OF THE METHODS OF CONTOURING BY HAND 341****CONTOURING FAULTED SURFACES 342**

Techniques for Contouring Across Normal Faults 345

Technique for Contouring Across Reverse Faults 355

MANUAL INTEGRATION OF FAULT AND STRUCTURE MAPS 357

Normal Faults 357

Reverse Faults 366

FAULT TRACES AND GAPS — SHORTCUTS AND PITFALLS 369

Rule of 45 371

Tangent or Circle Method 372

New Circle Method 378

Equation to Determine Radius of Circle 380

Equation to Determine Heave 382

Fault Gap Versus Fault Heave 383

STRUCTURE MAP — GENERIC CASE STUDY 383**THE ADDITIVE PROPERTY OF FAULTS 387****INTEGRATION OF SEISMIC AND WELL DATA FOR STRUCTURE MAPPING 390**

OTHER MAPPING TECHNIQUES 392

- Mapping Unconformities 392
- Mapping Across Vertical Faults 397
- Top of Structure Versus Top of Porosity 398
- Contour Compatibility — Closely Spaced Horizons 400

APPLICATION OF CONTOUR COMPATIBILITY ACROSS FAULTS 403

- Exceptions to Contour Compatibility Across Faults 404

MAPPING TECHNIQUES FOR VARIOUS TECTONIC HABITATS 407

- Extensional Tectonics 408
- Diapiric Salt Tectonics 431
- Strike-Slip Fault Tectonics 441
- Compressional Tectonics 445

**REQUIREMENTS FOR A REASONABLE STRUCTURAL
INTERPRETATION AND COMPLETED MAPS 453**

- Multiple Horizon Mapping 453

**CHAPTER 9 INTERPRETATION OF THREE-DIMENSIONAL
SEISMIC DATA 456**

INTRODUCTION AND PHILOSOPHY 456

- The Philosophical Doctrine Relative to the Workstation 456
- Optimizing the Data 457
- Project Setup 458
- Optimizing Displays for Better Results 458
- Framework Interpretation and Mapping 462

PLANNING, ORGANIZING AND DOCUMENTING A PROJECT 463

- Teamwork 463
- Developing a Project Plan 463
- Developing an Interpretation Workflow 464
- Organizing a Workstation Project 465
- Documenting Work 465

FAULT INTERPRETATION 465

- Introduction 465
- Reconnaissance 469
- Integrating Well Control 469
- Fault Interpretation Strategies 472
- Quality-Checking Fault Surfaces in Map and Seismic Views 479

HORIZON INTERPRETATION 480

- Selecting the Framework Horizons 480
- Tying Well Data 487
- Interpretation Strategy 488
- Infill Strategies 492

PRELIMINARY STRUCTURE MAPPING 495

- Drawing Accurate Fault Gaps and Overlaps 497
- Gridding and Contouring 499

HORIZON AND FAULT INTEGRATION ON A WORKSTATION 501**CONCLUSION 505**

| | | |
|-------------------|---|------------|
| CHAPTER 10 | COMPRESSIONAL STRUCTURES: BALANCING AND INTERPRETATION | 506 |
|-------------------|---|------------|

INTRODUCTION 506**STRUCTURAL GEOLOGY AND BALANCING 506****MECHANICAL STRATIGRAPHY 508****CLASSICAL BALANCING TECHNIQUES 510**

- Volume Accountability Rule 510
- Area Accountability 511
- Bed Length Consistency 511

| | |
|--|-----|
| Pin Lines | 513 |
| Line Length Exercise | 513 |
| Computer-Aided Structural Modeling and Balancing | 515 |
| Retrodeformation | 520 |
| Picking Thrust Faults | 523 |

CROSS SECTION CONSISTENCY 527

CROSS SECTION CONSTRUCTION 529

| | |
|---------------------------|-----|
| Busk Method Approximation | 533 |
| Kink Method Approximation | 534 |
| Kink Method Applications | 539 |

DEPTH TO DETACHMENT CALCULATIONS 545

NONCLASSICAL METHODS 548

| | |
|---|-----|
| Introduction | 548 |
| Suppe's Assumptions and Dahlstrom's Rules | 549 |
| Fault Bend Folds | 549 |
| Fault Propagation Folds | 558 |
| Imbricate Structures | 564 |
| Box and Lift-Off Structures | 574 |
| Triangle Zones and Wedge Structures | 577 |
| Interference Structures | 578 |

| | | |
|-------------------|---|------------|
| CHAPTER 11 | EXTENSIONAL STRUCTURES: BALANCING AND INTERPRETATION | 584 |
|-------------------|---|------------|

INTRODUCTION 584

ORIGIN OF HANGING WALL (ROLLOVER) ANTICLINES 584

| | |
|-------------------------|-----|
| Coulomb Collapse Theory | 585 |
| Growth Sedimentation | 589 |

A GRAPHICAL DIP DOMAIN TECHNIQUE FOR PROJECTING LARGE GROWTH FAULTS TO DEPTH 595

- Rollover Geometry Features 596
- Projecting Large Normal Faults to Depth 597
- Procedures for Projecting Large Normal Faults to Depth 597
- Determining the Coulomb Collapse Angles from Rollover Structures 601

ORIGIN OF SYNTHETIC AND ANTITHETIC FAULTS, KEYSTONE STRUCTURES, AND DOWNWARD DYING GROWTH FAULTS 602

- Backsliding Process 604

THREE-DIMENSIONAL EFFECTS AND CROSS STRUCTURES 612

STRIKE-RAMP PITFALL 614

COMPACTION EFFECTS ALONG GROWTH NORMAL FAULTS 620

- Prospect Example 623
- Inverting Fault Dips to Determine Sand/Shale Ratios or Percent Sand 627

CHAPTER 12 STRIKE-SLIP FAULTS AND ASSOCIATED STRUCTURES 635

INTRODUCTION 635

MAPPING STRIKE-SLIP FAULTS 636

- The Problem of Strike-Slip Fault Interpretation 637
- Strain Ellipse Model 638
- Problems Interpreting Stress 640
- Stress Measurements Across Strike-Slip Faults 642

CRITERIA FOR STRIKE-SLIP FAULTING 643

ANALYSIS OF LATERAL DISPLACEMENTS 645

- Surface Features 645
- Piercing Point or Piercing Line Evidence 645

SCALING FACTORS FOR STRIKE-SLIP DISPLACEMENTS 656**BALANCING STRIKE-SLIP FAULTS 658**

Compressional Folding Along Strike-Slip Faults 658

Extensional Folding Along Strike-Slip Faults 668

SUMMARY 679**CONCLUSIONS 680**

CHAPTER 13 GROWTH STRUCTURES 682

INTRODUCTION 682

Expansion Index for Growth Faults 683

MULTIPLE BISCHKE PLOT ANALYSIS AND $\Delta d/d$ METHODS 687

Common Extensional Growth Patterns 690

Unconformity Patterns 692

ACCURACY OF METHOD 694**EXAMPLES OF THE $\Delta d/d$ METHOD 694**

Generic Example of a Delta 694

Applying the $\Delta d/d$ Method to Seismic Data 696

Resolving a Log Correlation Problem 698

An Example of Stratigraphic Interpretation 700

Locating Sequence Boundaries in a Compressional Growth Structure 701

Analysis of the Timing of a Strike-Slip Growth Structure 703

THE MULTIPLE BISCHKE PLOT ANALYSIS 704

MBPA to Recognize Correlation Problems 705

The Use of a Stacked Multiple Bischke Plot 709

VERTICAL SEPARATION VERSUS DEPTH METHOD 711

Method 712

Generic and Real Examples of Analysis of VS/d Plots 713

CONCLUSIONS 721

CHAPTER 14 ISOCHORE AND ISOPACH MAPS 723

INTRODUCTION 723**SAND—SHALE DISTRIBUTION 728****BASIC CONSTRUCTION OF ISOCHORE MAPS 728**

Bottom Water Reservoir 729

Edge Water Reservoir 730

METHODS OF CONTOURING THE HYDROCARBON WEDGE 742

Limited Well Control and Evenly Distributed Impermeable Rock 742

Walking Wells—Unevenly Distributed Impermeable Rock 744

VERTICAL THICKNESS DETERMINATIONS 752

The Impact of Correction Factors 757

VERTICAL THICKNESS AND FLUID CONTACTS IN DEVIATED WELLS 759**MAPPING THE TOP OF STRUCTURE VERSUS THE TOP OF POROSITY 763****FAULT WEDGES 766**

Conventional Method for Mapping a Fault Wedge 766

Mid Trace Method 767

NONSEALING FAULTS 769

VOLUMETRIC CONFIGURATION OF A RESERVOIR 774

RESERVOIR VOLUME DETERMINATIONS FROM ISOCHORE MAPS 775

Horizontal Slice Method 776

Vertical Slice Method 777

Choice of Method 779

INTRODUCTORY RESERVOIR ENGINEERING 779

Reservoir Characterization 779

Estimation of Reserves 779

Field Production History 781

INTERVAL ISOPACH MAPS 782

True Stratigraphic Thickness from Well Logs 783

Interval Isopach Construction Using Seismic Data 786

APPENDIX 788
