|----------------------------------------------------------------------------------------------|-----------|
| Preface .....                                                                                | ix        |
| <b>1 INTRODUCTION</b>                                                                        | <b>1</b>  |
| 1.1. Biochemistry: Studies of Life at the Molecular Level .....                              | 1         |
| 1.2. Computer Science and Computational Sciences .....                                       | 5         |
| 1.3. Computational Biochemistry: Application of Computer<br>Technology to Biochemistry ..... | 6         |
| References .....                                                                             | 9         |
| <b>2 BIOCHEMICAL DATA: ANALYSIS AND<br/>MANAGEMENT</b>                                       | <b>11</b> |
| 2.1. Statistical Analysis of Biochemical Data .....                                          | 11        |
| 2.2. Biochemical Data Analysis with Spreadsheet Application .....                            | 20        |
| 2.3. Biochemical Data Management with Database Program .....                                 | 28        |
| 2.4. Workshops .....                                                                         | 31        |
| References .....                                                                             | 40        |
| <b>3 BIOCHEMICAL EXPLORATION: INTERNET RESOURCES</b>                                         | <b>41</b> |
| 3.1. Introduction to Internet .....                                                          | 41        |
| 3.2. Internet Resources of Biochemical Interest .....                                        | 46        |
| 3.3. Database Retrieval .....                                                                | 48        |
| 3.4. Workshops .....                                                                         | 52        |
| References .....                                                                             | 52        |
| <b>4 MOLECULAR GRAPHICS: VISUALIZATION OF<br/>BIOMOLECULES</b>                               | <b>53</b> |
| 4.1. Introduction to Computer Graphics .....                                                 | 53        |
| 4.2. Representation of Molecular Structures .....                                            | 56        |
| 4.3. Drawing and Display of Molecular Structures .....                                       | 60        |
| 4.4. Workshops .....                                                                         | 69        |
| References .....                                                                             | 70        |

|          |                                                                     |            |
|----------|---------------------------------------------------------------------|------------|
| <b>5</b> | <b>BIOCHEMICAL COMPOUNDS: STRUCTURE AND ANALYSIS</b>                | <b>73</b>  |
| 5.1.     | Survey of Biomolecules .....                                        | 73         |
| 5.2.     | Characterization of Biomolecular Structures .....                   | 80         |
| 5.3.     | Fitting and Search of Biomolecular Data and Information ....        | 87         |
| 5.4.     | Workshops .....                                                     | 98         |
|          | References .....                                                    | 103        |
| <br>     |                                                                     |            |
| <b>6</b> | <b>DYNAMIC BIOCHEMISTRY: BIOMOLECULAR INTERACTIONS</b>              | <b>107</b> |
| 6.1.     | Biomacromolecule–Ligand Interactions .....                          | 107        |
| 6.2.     | Receptor Biochemistry and Signal Transduction .....                 | 111        |
| 6.3.     | Fitting of Binding Data and Search for Receptor Databases ...       | 113        |
| 6.4.     | Workshops .....                                                     | 119        |
|          | References .....                                                    | 121        |
| <br>     |                                                                     |            |
| <b>7</b> | <b>DYNAMIC BIOCHEMISTRY: ENZYME KINETICS</b>                        | <b>123</b> |
| 7.1.     | Characterization of Enzymes .....                                   | 123        |
| 7.2.     | Kinetics of Enzymatic Reactions .....                               | 126        |
| 7.3.     | Search and Analysis of Enzyme Data .....                            | 133        |
| 7.4.     | Workshops .....                                                     | 140        |
|          | References .....                                                    | 144        |
| <br>     |                                                                     |            |
| <b>8</b> | <b>DYNAMIC BIOCHEMISTRY: METABOLIC SIMULATION</b>                   | <b>147</b> |
| 8.1.     | Introduction to Metabolism .....                                    | 147        |
| 8.2.     | Metabolic Control Analysis .....                                    | 152        |
| 8.3.     | Metabolic Databases and Simulation .....                            | 153        |
| 8.4.     | Workshops .....                                                     | 160        |
|          | References .....                                                    | 162        |
