

BAILEY & SCOTT'S

# DIAGNOSTIC MICROBIOLOGY

ELEVENTH EDITION

BETTY A. FORBES  
DANIEL F. SAHM  
ALICE S. WEISSFELD

# CONTENTS

---

## **PART I**

### **GENERAL ISSUES IN CLINICAL MICROBIOLOGY**

- 1 General Issues and Role of Laboratorians, 2**
  - Role of the Microbiologist: Responsibility to the Patient and Clinician, 2
  - General Concepts for Specimen Collection and Handling, 3
  - Specimen Processing, 14
- 2 Laboratory Safety, 19**
  - Sterilization and Disinfection, 19
  - Chemical Safety, 21
  - Fire Safety, 23
  - Electrical Safety, 23
  - Handling of Compressed Gases, 23
  - Biosafety, 23
  - Exposure Control Plan, 23
  - Classification of Biologic Agents Based on Hazard, 31
  - Mailing Biohazardous Material, 32
- 3 Laboratory Physical Design, Management, and Organization, 35**
  - Space Requirements and Organization of Work Flow, 35
  - Laboratory Design with Respect to Safety, 37
  - Design of Air Handling System, 37
  - Design of Mechanical Systems, 37
  - Walls, Floors, Ceilings, and Furniture, 38
  - Instrumentation, 38
  - Regulation of the Microbiology Laboratory, 39
  - Accrediting Agencies, 39
  - CLIA '88, 39
  - Selection of Diagnostic Tests, 42
  - Cost Accounting, 45
  - Budgeting, 46
  - Inventory Control, 48
  - Interviewing and Hiring Employees, 48
  - Employee Job Performance Standards and Appraisals, 48
  - Personnel Records, 49
  - Organization of the Microbiology Laboratory, 49
- 4 Quality in the Clinical Microbiology Laboratory, 58**
  - QC Program, 58
  - QA Program, 63

### **5 Infection Control, 68**

- Incidence of Nosocomial Infections, 68
- Types of Nosocomial Infections, 68
- Emergence of Antibiotic-Resistant Microorganisms, 69
- Hospital Infection Control Programs, 70
- Role of the Microbiology Laboratory, 70
- Characterizing Strains Involved in an Outbreak, 70
- Preventing Nosocomial Infections, 72
- Surveillance Cultures, 72

## **PART II**

### **SCIENTIFIC AND LABORATORY BASIS FOR CLINICAL MICROBIOLOGY**

- 6 Microbial Taxonomy, 77**
    - Classification, 77
    - Nomenclature, 77
    - Identification, 78
  - 7 Bacterial Genetics, Metabolism, and Structure, 80**
    - Bacterial Genetics, 80
    - Bacterial Metabolism, 93
    - Structure and Function of the Bacterial Cell, 96
  - 8 Host-Microorganism Interactions, 101**
    - The Encounter Between Host and Microorganism, 101
    - Microorganism Colonization of Host Surfaces, 103
    - Microorganism Entry, Invasion, and Dissemination, 108
    - Outcome and Prevention of Infectious Diseases, 115
  - 9 Role of Microscopy in the Diagnosis of Infectious Diseases, 119**
    - Bright-Field (Light) Microscopy, 119
    - Phase Contrast Microscopy, 126
    - Fluorescent Microscopy, 127
    - Dark-Field Microscopy, 130
    - Electron Microscopy, 130
  - 10 Laboratory Cultivation and Isolation of Bacteria, 133**
    - Principles of Bacterial Cultivation, 133
    - Bacterial Cultivation, 143
-

- 11 **Overview of Conventional Methods for Bacterial Identification, 148**  
Principles of Identification, 148  
Principles of Phenotype-Based Identification Schemes, 156  
Commercial Identification Systems, 162
- 12 **Molecular Methods for Microbial Identification and Characterization, 169**  
Nucleic Acid-Based Methods, 169  
Nonnucleic Acid-Based Analytic Methods, 186
- 13 **Immunochemical Methods Used for Organism Detection, 189**  
Production of Antibodies for Use in Laboratory Testing, 189  
Principles of Immunochemical Methods Used for Organism Detection, 191
- 14 **Serologic Diagnosis of Infectious Diseases, 202**  
Features of the Immune Response, 202  
Serodiagnosis of Infectious Diseases, 204  
Principles of Serologic Test Methods, 205
- 15 **Principles of Antimicrobial Action and Resistance, 214**  
Antimicrobial Action, 214  
Mechanisms of Antibiotic Resistance, 220
- 16 **Laboratory Methods for Detection of Antibacterial Resistance, 229**  
Goal and Limitations, 229  
Testing Methods, 230
- 17 **Laboratory Strategies for Antimicrobial Susceptibility Testing, 251**  
Relevance, 251  
Accuracy, 255  
Communication, 258

### PART III BACTERIOLOGY

- 18 **Overview of Bacterial Identification Methods and Strategies, 260**  
Rationale for Approaching Organism Identification, 260  
Approach to Using Part III, 260

#### Section 1 Catalase-Positive, Gram-Positive Cocci

- 19 ***Staphylococcus*, *Micrococcus*, and Similar Organisms, 285**  
General Characteristics, 285  
Epidemiology, 285  
Pathogenesis and Spectrum of Disease, 285  
Laboratory Diagnosis, 287  
Antimicrobial Susceptibility Testing and Therapy, 292  
Prevention, 292

#### Section 2 Catalase-Negative, Gram-Positive Cocci

- 20 ***Streptococcus*, *Enterococcus*, and Similar Organisms, 298**  
General Characteristics, 298  
Epidemiology, 298  
Pathogenesis and Spectrum of Disease, 300  
Laboratory Diagnosis, 302  
Antimicrobial Susceptibility Testing and Therapy, 312  
Prevention, 314

#### Section 3 Non-Branching, Catalase-Positive, Gram-Positive Bacilli

- 21 ***Bacillus* and Similar Organisms, 317**  
General Characteristics, 317  
Epidemiology, 317  
Pathogenesis and Spectrum of Diseases, 317  
Laboratory Diagnosis, 317  
Antimicrobial Susceptibility Testing and Therapy, 324  
Prevention, 324
- 22 ***Listeria*, *Corynebacterium*, and Similar Organisms, 325**  
General Characteristics, 325  
Epidemiology, 325  
Pathogenesis and Spectrum of Diseases, 325  
Laboratory Diagnosis, 325  
Antimicrobial Susceptibility Testing and Therapy, 339  
Prevention, 339

#### Section 4 Non-Branching, Catalase-Negative, Gram-Positive Bacilli

- 23 ***Erysipelothrix*, *Lactobacillus*, and Similar Organisms, 342**  
General Characteristics, 342  
Epidemiology, Pathogenesis, and Spectrum of Diseases, 342  
Laboratory Diagnosis, 342  
Antimicrobial Susceptibility Testing and Therapy, 345  
Prevention, 348

#### Section 5 Branching or Partially Acid-Fast, Gram-Positive Bacilli

- 24 ***Nocardia*, *Streptomyces*, *Rhodococcus*, *Oerskovia*, and Similar Organisms, 351**  
General Characteristics, 351  
Epidemiology and Pathogenesis, 354  
Spectrum of Disease, 355  
Laboratory Diagnosis, 356  
Antimicrobial Susceptibility Testing and Therapy, 361  
Prevention, 362

## **Section 6 Gram-Negative Bacilli and Coccobacilli (MacConkey-Positive, Oxidase-Negative)**

- 25 Enterobacteriaceae, 365**  
 Genera and Species to Be Considered, 365  
 General Characteristics, 365  
 Epidemiology, 365  
 Pathogenesis and Spectrum of Diseases, 365  
 Laboratory Diagnosis, 370  
 Antimicrobial Susceptibility Testing and Therapy, 375  
 Prevention, 375
- 26 Acinetobacter, Chryseomonas, Flavimonas, and Stenotrophomonas, 378**  
 General Characteristics, 378  
 Epidemiology, 378  
 Pathogenesis and Spectrum of Disease, 378  
 Laboratory Diagnosis, 379  
 Antimicrobial Susceptibility Testing and Therapy, 380  
 Prevention, 382
- ## **Section 7 Gram-Negative Bacilli and Coccobacilli (MacConkey-Positive, Oxidase-Positive)**
- 27 Pseudomonas, Burkholderia, and Similar Organisms, 385**  
 General Characteristics, 385  
 Epidemiology, 385  
 Pathogenesis and Spectrum of Disease, 387  
 Laboratory Diagnosis, 389  
 Antimicrobial Susceptibility Testing and Therapy, 394  
 Prevention, 397
- 28 Achromobacter, Rhizobium, Ochrobactrum, and Similar Organisms, 399**  
 General Characteristics, 399  
 Epidemiology, 399  
 Pathogenesis and Spectrum of Disease, 399  
 Laboratory Diagnosis, 401  
 Antimicrobial Susceptibility Testing and Therapy, 402  
 Prevention, 405
- 29 Chryseobacterium, Sphingobacterium, and Similar Organisms, 406**  
 General Characteristics, 406  
 Epidemiology, 406  
 Pathogenesis and Spectrum of Disease, 406  
 Laboratory Diagnosis, 407  
 Antimicrobial Susceptibility Testing and Therapy, 408  
 Prevention, 410
- 30 Alcaligenes, Bordetella (Nonpertussis), Comamonas, and Similar Organisms, 411**  
 General Characteristics, 411  
 Epidemiology, 411  
 Pathogenesis and Spectrum of Disease, 411  
 Laboratory Diagnosis, 414  
 Antimicrobial Susceptibility Testing and Therapy, 416  
 Prevention, 416

- 31 Vibrio, Aeromonas, Plesiomonas shigelloides, and Chromobacterium violaceum, 423**  
 General Characteristics, 423  
 Epidemiology, 423  
 Pathogenesis and Spectrum of Disease, 424  
 Laboratory Diagnosis, 426  
 Antimicrobial Susceptibility Testing and Therapy, 431  
 Prevention, 433

## **Section 8 Gram-Negative Bacilli and Coccobacilli (MacConkey-Negative, Oxidase-Positive)**

- 32 Sphingomonas paucimobilis and Similar Organisms, 435**  
 General Considerations, 435  
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 435  
 Laboratory Diagnosis, 435  
 Prevention, 437
- 33 Moraxella and Elongated Neisseria, 438**  
 General Characteristics, 438  
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 438  
 Laboratory Diagnosis, 438  
 Prevention, 442
- 34 Eikenella corrodens and Similar Organisms, 443**  
 General Characteristics, 443  
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 443  
 Laboratory Diagnosis, 443  
 Prevention, 446
- 35 Pasteurella and Similar Organisms, 447**  
 General Characteristics, 447  
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 447  
 Laboratory Diagnosis, 447  
 Prevention, 452
- 36 Actinobacillus, Kingella, Cardiobacterium, Capnocytophaga, and Similar Organisms, 453**  
 General Characteristics, 453  
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 453  
 Laboratory Diagnosis, 454  
 Prevention, 460
- ## **Section 9 Gram-Negative Bacilli and Coccobacilli (MacConkey-Negative, Oxidase-Variable)**
- 37 Haemophilus, 462**  
 General Characteristics, 462  
 Epidemiology, 462  
 Pathogenesis and Spectrum of Diseases, 462  
 Laboratory Diagnosis, 462  
 Antimicrobial Susceptibility Testing and Therapy, 466  
 Prevention, 468

**Section 10 Gram-Negative Bacilli That Are Optimally Recovered on Special Media**

- 38 *Bartonella* and *Afipia*, 470  
*Bartonella*, 470  
*Afipia felis*, 473
- 39 *Campylobacter*, *Arcobacter*, and *Helicobacter*, 474  
*Campylobacter* and *Arcobacter*, 474  
*Helicobacter*, 479
- 40 *Legionella*, 482  
General Characteristics, 482  
Epidemiology and Pathogenesis, 482  
Spectrum of Disease, 483  
Laboratory Diagnosis, 483  
Antimicrobial Susceptibility Testing and Therapy, 485  
Prevention, 486
- 41 *Brucella*, 487  
General Characteristics, 487  
Epidemiology and Pathogenesis, 487  
Spectrum of Disease, 488  
Laboratory Diagnosis, 488  
Antimicrobial Susceptibility Testing and Therapy, 489  
Prevention, 489
- 42 *Bordetella pertussis* and *Bordetella paraptussis*, 491  
General Characteristics, 491  
Epidemiology and Pathogenesis, 491  
Spectrum of Disease, 491  
Laboratory Diagnosis, 492  
Antimicrobial Susceptibility Testing and Therapy, 493  
Prevention, 494
- 43 *Francisella*, 495  
General Characteristics, 495  
Epidemiology and Pathogenesis, 495  
Spectrum of Disease, 495  
Laboratory Diagnosis, 496  
Antimicrobial Susceptibility Testing and Therapy, 497  
Prevention, 497
- 44 *Streptobacillus moniliformis* and *Spirillum minus*, 498  
*Streptobacillus moniliformis*, 498  
*Spirillum minus*, 499

**Section 11 Gram-Negative Cocci**

- 45 *Neisseria* and *Moraxella catarrhalis*, 502  
General Characteristics, 502  
Epidemiology, 502  
Pathogenesis and Spectrum of Disease, 502  
Laboratory Diagnosis, 502  
Antimicrobial Susceptibility Testing and Therapy, 508  
Prevention, 509

**Section 12 Anaerobic Bacteriology**

- 46 Overview and General Considerations, 511  
General Characteristics, 511  
Epidemiology, 511  
Pathogenesis and Spectrum of Disease, 511  
Specimen Collection and Transport, 511  
Anaerobic Media, 517  
Prevention, 518
- 47 Laboratory Considerations, 520  
Macroscopic Examination of Specimens, 520  
Direct Detection Methods, 520  
Cultivation, 520  
Approach to Identification, 528  
Antimicrobial Susceptibility Testing and Therapy, 534

**Section 13 Mycobacteria and Other Bacteria with Unusual Growth Requirements**

- 48 Mycobacteria, 538  
*Mycobacterium tuberculosis* Complex, 538  
Nontuberculous Mycobacteria, 541  
Laboratory Diagnosis of Mycobacterial Infections, 546  
Antimicrobial Susceptibility Testing and Therapy, 562  
Prevention, 564
- 49 Obligate Intracellular and Nonculturable Bacterial Agents, 572  
*Chlamydia*, 572  
*Rickettsia*, *Orientia*, and *Ehrlichia*, 580  
*Coxiella*, 583  
*Tropheryma whippelii*, 583  
*Calymmatobacterium granulomatis*, 584
- 50 Cell Wall-Deficient Bacteria: *Mycoplasma* and *Ureaplasma*, 587  
General Characteristics, 587  
Epidemiology and Pathogenesis, 587  
Spectrum of Disease, 589  
Laboratory Diagnosis, 589  
Susceptibility Testing and Therapy, 592  
Prevention, 592
- 51 The Spirochetes, 595  
*Treponema*, 595  
*Borrelia*, 598  
*Leptospira*, 601

**PART IV  
PARASITOLOGY**

- 52 Laboratory Methods for Diagnosis of Parasitic Infections, 604  
General Characteristics, 606  
Epidemiology, 615  
Pathogenesis and Spectrum of Disease, 620  
Laboratory Diagnosis, 620  
Approach to Identification, 632  
Organism Identification, 650  
Antimicrobial Susceptibility Testing and Therapy, 698  
Prevention, 698

## PART V MYCOLOGY

- 53 Laboratory Methods in Basic Mycology, 711**  
 Overview of Clinical Mycology, 711  
 General Features of the Fungi, 711  
 Taxonomy of the Fungi, 714  
 Practical Classification of the Fungi, 715  
 Virulence Factors of the Medically Important Fungi, 717  
 General Considerations for the Laboratory Diagnosis of Fungal Infections, 725  
 Extent of Identification of Fungi Recovered from Clinical Specimens, 736  
 General Considerations for the Identification of Molds, 736  
 General Morphologic Features of the Molds, 742  
 Hyaline, Aseptate or Sparsely Septate Molds: The Zygomycetes, 745  
 Hyaline, Septate, Monomorphic Molds: The Dermatophytes, 747  
 Hyaline, Septate, Monomorphic Molds: The Opportunistic Mycoses, 754  
 Hyaline, Septate, Dimorphic Molds: Systemic Mycoses, 759  
 Septate, Dematiaceous Molds, 770  
*Pneumocystis carinii* (an Atypical Fungus), 778  
 The Yeasts, 779  
 Commercially Available Yeast Identification Systems, 784  
 Conventional Yeast Identification Methods, 786  
 Antimicrobial Susceptibility Testing and Therapy, 787  
 Antifungal Susceptibility Testing, 788

## PART VI VIROLOGY

- 54 Laboratory Methods in Basic Virology, 799**  
 General Characteristics, 799  
 Viruses That Cause Human Diseases, 802  
 Laboratory Diagnosis of Viral Infection, 819  
 Antiviral Therapy, 854  
 Prevention of Viral Infection, 854

## PART VII DIAGNOSIS BY ORGAN SYSTEM

- 55 Bloodstream Infections, 865**  
 General Considerations, 865  
 Detection of Bacteremia, 871  
 Special Considerations for Other Relevant Organisms Isolated from Blood, 880
- 56 Infections of the Lower Respiratory Tract, 884**  
 General Considerations, 884  
 Diseases of the Lower Respiratory Tract, 887  
 Laboratory Diagnosis of Lower Respiratory Tract Infections, 892

- 57 Upper Respiratory Tract Infections and Other Infections of the Oral Cavity and Neck, 899**  
 General Considerations, 899  
 Diseases of the Upper Respiratory Tract, Oral Cavity, and Neck, 899  
 Diagnosis of the Upper Respiratory Tract Infections, 903  
 Diagnosis of Infections in the Oral Cavity and Neck, 905
- 58 Meningitis and Other Infections of the Central Nervous System, 907**  
 General Considerations, 907  
 Laboratory Diagnosis of Central Nervous System Infections, 912
- 59 Infections of the Eyes, Ears, and Sinuses, 917**  
 Eyes, 917  
 Ears, 923  
 Sinuses, 925
- 60 Infections of the Urinary Tract, 927**  
 General Considerations, 927  
 Infections of the Urinary Tract, 927  
 Laboratory Diagnosis of Urinary Tract Infections, 930
- 61 Genital Tract Infections, 939**  
 General Considerations, 939  
 Genital Tract Infections, 939  
 Laboratory Diagnosis of Genital Tract Infections, 946
- 62 Gastrointestinal Tract Infections, 954**  
 General Considerations, 954  
 Gastroenteritis, 954  
 Other Infections of the GI Tract, 964  
 Laboratory Diagnosis of Gastrointestinal Tract Infections, 967
- 63 Skin, Soft Tissue, and Wound Infections, 972**  
 General Considerations, 972  
 Skin and Soft Tissue Infections, 972  
 Laboratory Diagnostic Procedures, 982
- 64 Normally Sterile Body Fluids, Bone and Bone Marrow, and Solid Tissues, 985**  
 Specimens from Sterile Body Sites, 985  
 Laboratory Diagnostic Procedures, 990

Appendix: Case Studies, 995

Glossary, 1012
