

# MARINE MICROBIOLOGY

Edited by  
John H. Paul

METHODS IN MICROBIOLOGY

ACADEMIC  
PRESS

# Contents

Contributors .....	ix
Preface .....	xiii

1. Introduction, History, and Overview: The 'Methods' to our Madness ..... 1  
*F Azam*
2. Microbial Ecology at Sea: Sampling, Subsampling and Incubation Considerations ..... 13  
*DM Karl and JE Dore*

## Viruses

3. Enumeration of Viruses ..... 43  
*RT Noble*
4. Quantification of Algal Viruses in Marine Samples ..... 53  
*SW Wilhelm and L Poorvin*
5. Estimating Viral Proliferation in Aquatic Samples ..... 67  
*RT Noble and GF Steward*
6. Fingerprinting Viral Assemblages by Pulsed Field Gel Electrophoresis (PFGE) ..... 85  
*GF Steward*
7. Lysogeny and Transduction ..... 105  
*JH Paul and SC Jiang*

## Bacteria

8. Enumeration of Total and Highly Active Bacteria ..... 129  
*B Sherr, E Sherr and P del Giorgio*
9. Isolation of Oligobacteria ..... 161  
*DK Button, BR Robertson and P Quang*
10. Determining the Physiological Status of Individual Bacterial Cells ..... 175  
*MH Howard-Jones, ME Frischer and PG Verity*
11. Fluorescence *in situ* Hybridization with rRNA-targeted Oligonucleotide Probes ..... 207  
*J Pernthaler, F-O Glöckner, W Schönhuber and R Amann*
12. Measuring Bacterial Biomass Production and Growth Rates from Leucine Incorporation in Natural Aquatic Environments ..... 227  
*D Kirchman*
13. Phosphorus Cycle in Seawater: Dissolved and Particulate Pool Inventories and Selected Phosphorus Fluxes ..... 239  
*DM Karl and KM Björkman*

14.	Nitrogen Fixation: Nitrogenase Genes and Gene Expression . . . . .	271
	<i>JP Zehr and PJ Turner</i>	
<b>3</b>	<b>Autotrophic Picoplankton and Protists</b>	
15.	Protistan Herbivory and Bacterivory . . . . .	289
	<i>DA Caron</i>	
16.	Flow Cytometric Analysis of Autotrophic Picoplankton . . . . .	317
	<i>L Campbell</i>	
<b>4</b>	<b>Marine Fungi</b>	
17.	Collection and Identification of Marine Yeasts . . . . .	347
	<i>JW Fell</i>	
18.	Fungal Biomass and Productivity . . . . .	357
	<i>SY Newell</i>	
<b>5</b>	<b>Molecular Techniques</b>	
19.	Molecular Phylogeny: Applications and Implications for Marine Microbiology . . . . .	375
	<i>CL Moyer</i>	
20.	Gene Expression by mRNA Analysis . . . . .	395
	<i>JH Paul</i>	
21.	<i>In situ</i> PCR/RT-PCR Coupled with <i>in situ</i> Hybridization for Detection of Functional Gene and Gene Expression in Prokaryotic Cells . . . . .	409
	<i>F Chen and RE Hodson</i>	
22.	Denaturing Gradient Gel Electrophoresis in Marine Microbial Ecology . .	425
	<i>H Schäfer and G Muyzer</i>	
23.	Measurement of UVB-induced DNA Damage in Marine Planktonic Communities . . . . .	465
	<i>WH Jeffrey and DL Mitchell</i>	
<b>6</b>	<b>Sediment Techniques</b>	
24.	Radiotracer Assays ( <sup>35</sup> S) of Sulfate Reduction Rates in Marine and Freshwater Sediments . . . . .	481
	<i>G King</i>	
25.	Nitrogen Fixation and Denitrification . . . . .	501
	<i>DG Capone and JP Montoya</i>	
<b>7</b>	<b>Remote Sensing</b>	
26.	Optical Remote Sensing Techniques in Biological Oceanography . . . . .	511
	<i>WP Bissett, O Schofield, CD Mobley, MF Crowley and MA Moline</i>	

## 8 Public Health Microbiology

27. Microbial Public Health Indicators in the Marine Environment ..... 541  
*DW Griffin*
28. Human Enteric Viruses and Parasites in the Marine Environment ..... 559  
*EK Lipp, J Lukasik and JB Rose*

## 9 Extreme Environments

29. Methods for Psychrophilic Bacteria ..... 591  
*JP Bowman*
30. Deep-sea Piezophilic Bacteria ..... 615  
*AA Yayanos*
31. Methods for the Study of Hydrothermal Vent Microbes ..... 639  
*A-L Reysenbach and D Götz*

Index ..... 657

Colour plate section between pages 210 and 211.
