

APOPTOSIS

Edited by

Lawrence M. Schwartz

Jonathan D. Ashwell

CONTENTS

Contributors	xi
Preface	xv
1. Isolation and Assay of Caspases	
<i>Srinivasa M. Srinivasula, Ayman Saleh, Manzoor Ahmad, Teresa Fernandes-Alnemri, and Emad S. Alnemri</i>	
I. Introduction	1
II. Materials Required	5
III. Methods	6
References	25
2. Cloning and Analysis of Bcl-2 Family Genes	
<i>Enrique Cepero, Bryan W. Johnson, and Lawrence H. Boise</i>	
I. Introduction	29
II. Cloning of Bcl-2 Family Genes	33
III. Analysis of Bcl-2 Family Protein Function and Regulation	36
References	45
3. Flow Cytometric Analysis of Cell Shrinkage and Monovalent Ions during Apoptosis	
<i>Carl D. Bortner and John A. Cidlowski</i>	
I. Introduction	49
II. Analysis of Cell Size by Flow Cytometry	52
III. Analysis of Monovalent Intracellular Ions by Flow Cytometry	57
IV. Sorting Apoptotic Cells by Flow Cytometry	64
References	67
4. Use of Flow and Laser-Scanning Cytometry in Analysis of Cell Death	
<i>Zbigniew Darzynkiewicz, Xun Li, and Elzbieta Bedner</i>	
I. Introduction	70
II. Principles of Cell Measurement by Laser-Scanning Cytometry (LSC)	72
III. Specifics of Cell Preparation for Analysis by LSC	75
IV. Chromatin Condensation as a Marker of Apoptotic Cells Detected by LSC	77
V. Gross Changes in Cell Structure during Apoptosis Measured by Laser-Light Scattering	79

VI. Dissipation of Mitochondrial Transmembrane Potential ($\Delta\Psi_m$) during Apoptosis	80
VII. Annexin V as a Marker of Apoptotic Cells	84
VIII. DNA Fragmentation Assay: Detection of Cells with Fractional ("Subdiploid") DNA Content	87
IX. DNA Fragmentation: Detection of DNA Strand Breaks ("TUNEL" Assay)	90
X. Analysis of Caspase Activation by the Labeled Inhibitor Method	93
XI. Detection of Apoptotic Cells Based on Cleavage of Poly(ADP-ribose) Polymerase	97
XII. Unique Possibilities Offered by LSC in Studies of Apoptosis	100
XIII. Strategies in Analysis of Apoptosis by Flow Cytometry or LSC	102
References	105

5. Analysis of Protein Transglutamylation in Apoptosis

Zoltán Nemes, András Mádi, Lyuben N. Marekov, Mauro Piacentini, Peter M. Steinert, and László Fésüs

I. Introduction	112
II. Transglutaminase (TGase) Activity Assays	114
III. Determination of ϵ -(γ -Glutamyl)-lysine Cross-Link Density in Apoptotic Tissue	115
IV. Immunoprecipitation of TGase-Interacting Proteins from Apoptotic Cells	119
V. <i>In Situ</i> Identification of TGase Glutamyl Donor Substrate Proteins in Apoptotic Tissue	119
VI. Identification of Labeled Substrate Proteins	124
VII. Identification of TGase Reactive Glutamine Residues by Protein Sequencing	125
VIII. Location of Cross-Links in Protein Complexes	126
IX. Analysis of TGase-Mediated Glutamine Deamidation by Peptide Sequencing	130
X. Reagents	131
References	132

6. Analysis of Sphingomyelin and Ceramide Levels and the Enzymes Regulating their Metabolism in Response to Cell Stress

Rick T. Dobrowsky and Richard N. Kolesnick

I. Introduction	136
II. Metabolic Labeling	136
III. Determination of Sphingomyelin Mass Levels	142
IV. Enzymatic Method for the Quantitation of Ceramide-Diacylglycerol (DAG) Kinase Assay	144
V. Chromatographic Quantitation of Ceramide Using HPLC and Fluorescence Spectroscopy	147
VI. Assays for Enzymes Regulating Cellular Levels of Sphingomyelin and Ceramide	149
References	161

7. Cell-Free Systems to Study Apoptosis

Howard O. Fearnhead

I. Introduction	167
II. Preparation of Extracts	168
III. <i>In Vitro</i> Apoptosis Assays	171
IV. Factors That Affect Caspase Activation in Extracts	181
V. Concluding Remarks	183
References	183

8. Role of c-Jun N-terminal Kinase in Apoptosis

Zheng-gang Liu, Joseph Lewis, Tzu-Hao Wang, and Amy Cook

I. Introduction	187
II. Methods for the Detection of c-Jun N-terminal Kinase (JNK) Activation during Apoptosis	190
III. Evaluation of the Role of JNK Activation in Apoptosis	193
References	193

9. Methods for Studying Pro- and Antiapoptotic Genes in Nonimmortal Cells

Mila E. McCurrach and Scott W. Lowe

I. Introduction	198
II. Mouse Embryo Fibroblasts (MEFs)	199
III. Retroviral-Mediated Gene Transfer	202
IV. Basic Infection Protocol for MEFs (Using the Phoenix System)	205
V. Analysis of Cells	210
VI. Other Systems	222
References	225

10. Calcium Flux Measurements in Apoptosis

David J. McConkey and Leta K. Nutt

I. Background	229
II. Ca^{2+} -Specific Probes	234
III. Calcium Imaging	237
IV. Summary and Conclusions	242
References	243

11. Proteinase Families and Their Inhibitors

Donald L. Mykles

I. Introduction	247
II. Enzyme Classification	248
III. Proteinase Inhibitors	249
IV. Considerations for Inhibitor Selection and Application	259
V. General Guidelines for Using Proteinase Inhibitors	265

VI. Concluding Remarks	266
References	267
12. Identification and Analysis of Caspase Substrates: Proteolytic Cleavage of Poly(ADP-ribose)polymerase and DNA Fragmentation Factor 45	
<i>Claudia Boucher, Stéphane Gobeil, Kumiko Samejima, William C. Earnshaw, and Guy G. Poirier</i>	
I. Introduction	290
II. Poly(ADP-ribose)polymerase (PARP-1)	291
III. DNA Fragmentation Factor II (DFF45)	300
References	303
13. Analysis of Reactive Oxygen Species in Cell Death	
<i>Ivan Stamenkovic</i>	
I. Introduction	307
II. Methods	309
References	318
14. Methods for Studying Apoptosis and Phagocytosis of Apoptotic Cells in <i>Drosophila</i> Tissues and Cell Lines	
<i>Kristin White, Simonetta Lisi, Phani Kurada, Nathalie Franc, and Peter Bangs</i>	
I. Introduction	321
II. Detection of Apoptosis in <i>Drosophila</i> Tissues	323
III. Phagocytosis	330
IV. Testing for Apoptotic Activities in <i>Drosophila</i> S2 Cells	332
References	338
15. Phosphatidylserine Exposure and Phagocytosis of Apoptotic Cells	
<i>Patrick Williamson, Stefan van den Eijnde, and Robert A. Schlegel</i>	
I. Introduction	340
II. Annexin V Purification	342
III. Annexin Staining for Flow Cytometric Analysis of Apoptotic Cells	346
IV. <i>In Vivo</i> Detection of Cell Surface-Exposed PS	349
V. MC540 Staining	354
VI. Transbilayer Lipid Movement Assays	355
VII. Phagocytosis of Apoptotic Cells	358
References	362
16. The (Holey) Study of Mitochondria in Apoptosis	
<i>Nigel J. Waterhouse, Joshua C. Goldstein, Ruth M. Kluck, Don D. Newmeyer, and Douglas R. Green</i>	
I. Introduction	366
II. Induction of Cytochrome <i>c</i> Release from Mitochondria in Cultured Cells	368
III. Assessment of Cytochrome <i>c</i> Release in Heterogeneous Populations of Cultured Cells	369

IV. Assessment of Cytochrome <i>c</i> Release in Single Cells	372
V. Assessment of Mitochondrial Cytochrome <i>c</i> Release in Cell-Free Systems	375
VI. Detection of Proteins Released from Mitochondria Concomitant with Cytochrome <i>c</i>	377
VII. Assessment of Mitochondrial Function	379
References	386
Appendix	390
17. <i>In Situ</i> Detection of Dying Cells in Normal and Pathological Tissues	
<i>Christos Valavanis, Stephen Naber, and Lawrence M. Schwartz</i>	
I. Introduction	394
II. Morphological Features of Cell Death: Apoptosis vs Necrosis	395
III. Methods for Apoptotic Cell Identification	397
IV. TUNEL	397
V. ISEL	402
VI. Comments for Both TUNEL and ISEL	405
VII. Other Methods	406
VIII. General Considerations	410
References	412
18. Model Cell Lines for the Study of Apoptosis <i>in Vitro</i>	
<i>Christos Valavanis, Yanhui Hu, Yili Yang, Barbara A. Osborne, Salem Chouaib, Lloyd Greene, Jonathan D. Ashwell, and Lawrence M. Schwartz</i>	
I. Introduction	418
II. Jurkat	424
III. 2B4.11	426
IV. DO11.10	427
V. MCF-7	428
VI. PC12	429
VII. C ₂ C ₁₂	430
References	431
19. Programmed Cell Death Assays for Plants	
<i>Alan M. Jones, Silvia Coimbra, Angelika Fath, Mariana Sottomayor, and Howard Thomas</i>	
I. Introduction	438
II. DNA Fragmentation by Gel Electrophoresis	438
III. TUNEL	443
IV. Nondestructive Measurements of Plant Cell Senescence	447
References	450
20. Studies of Apoptosis Proteins in Yeast	
<i>Hong Zhang and John C. Reed</i>	
I. Introduction	453
II. Methods	456
III. Inhibition of Caspase- and Bax-Induced Cell Death in Yeast	465

IV. Comments and Conclusions	466
References	467
21. Methods to Study Cell Death in <i>Dictyostelium discoideum</i>	
<i>Jean-Pierre Levraud, Myriam Adam, Sophie Cornillon, and Pierre Golstein</i>	
I. Introduction	470
II. Cell Culture and Maintenance of Axenic Strains	473
III. Induction of Developmental Cell Death	476
IV. Analysis of Cell Death Characteristics	480
V. Genetic Manipulation of <i>Dictyostelium</i>	485
VI. Selection and Analysis of Cell Death-Resistant Mutants	491
References	494
22. Methods of Study of Tumor Necrosis Factor-Related Ligands in Apoptosis	
<i>Isabelle A. Rooney, Chris A. Benedict, Paula S. Norris, and Carl F. Ware</i>	
I. Introduction	500
II. Production and Characterization of Reagents	503
III. Receptor Binding Characteristics of TNF Family Ligands	512
IV. Induction of Apoptosis	517
V. Effect of Viral Infection on Cell Susceptibility to TNF Ligand-Mediated Cytotoxicity	520
References	524
Index	527
Volumes in Series	547
