

TUNCER CEBECI

Convective Heat Transfer

Second Revised Edition

**Solutions Manual
and Computer Programs**

HORIZONS
PUBLISHING

Springer

Contents

1. Introduction	1
2. Conservation Equations for Mass, Momentum, and Energy	3
3. Boundary-Layer Equations	11
4. Laminar Boundary Layers	21
5. Laminar Duct Flows	53
6. Turbulent Boundary Layers	71
7. Turbulent Duct Flows	87
8. Buoyant Flows	101
9. Finite-Difference Solution of Boundary-Layer Equations: Internal Flows	109
11. Computer Programs and Their Applications to Momentum and Heat Transfer Problems	115
Appendix	125
A. Conversion Factors	125
B. Physical Properties of Gases, Liquids, Liquid Metals, and Metals	128
C. Gamma, Beta and Incomplete Beta Functions	141
