

# 100%

ONE HUNDRED PERCENT  
COMPREHENSIVE  
AUTHORITATIVE  
WHAT YOU NEED  
ONE HUNDRED PERCENT

**Master** new  
techniques for the  
latest server-side  
Java technologies

**Build** efficient,  
high-performance  
Web applications

**Tap** into  
the performance,  
extensibility, and  
security advantages  
of servlets

# Java™ Servlet Programming Bible

**BONUS  
CD-ROM**

- Code examples from the book
- Plus Visual SlickEdit and JRun Server trial versions and more

Suresh Rajagopalan, Ramesh Rajamani,  
Ramesh Krishnaswamy, and Sridhar Vijendran

# Contents

Preface. . . . . ix  
Acknowledgments. . . . . xi

## Part I: Servlet Programming Fundamentals 1

**Chapter 1: Servlets and Web Application Development . . . . . 3**

- Review of Internet Fundamentals . . . . . 3
  - Benefits of Java programming . . . . . 4
  - The client/server paradigm . . . . . 4
  - Data transmission over the Internet . . . . . 6
  - The future of the Web . . . . . 7
- An Introduction to Servlets . . . . . 8
  - What are servlets? . . . . . 8
  - Client-side scripting . . . . . 8
  - Server-side scripting . . . . . 11
  - The limitations of HTML . . . . . 12
  - Choosing a server-side scripting/programming language . . . . . 12
- Web Application Development . . . . . 13
  - Forms . . . . . 14
  - Advantages of Web applications . . . . . 14
  - Issues to consider . . . . . 15
- Scripting Options . . . . . 16
  - Common Gateway Interface (CGI) . . . . . 16
  - Active Server Pages (ASP) . . . . . 17
  - Hypertext Preprocessor (PHP) . . . . . 18
  - ColdFusion (CFML) . . . . . 19
- The Power of Servlets . . . . . 19
  - Platform independence . . . . . 20
  - Scalability . . . . . 20
  - Persistence . . . . . 21
  - Extensibility . . . . . 21
  - Reusability . . . . . 21
  - Performance . . . . . 21
  - Security . . . . . 22
  - Portability . . . . . 22
  - Intuitive design . . . . . 22
  - Industry-wide support . . . . . 22
  - Protocol independence . . . . . 22
  - Cost efficiency . . . . . 23
  - The role of servlets . . . . . 23

**Chapter 2: Setting up a Servlet Development Environment . . . . . 25**

What You Need to Run Servlets . . . . . 25  
Setting up a Web Server with JRun . . . . . 28  
    Installing the JRun Web server . . . . . 28  
    JRun directory structure . . . . . 32  
    Starting the Web server . . . . . 34  
    Web server administration . . . . . 34  
Essential Servlet Documentation for Developers . . . . . 48  
Creating Your First Servlet . . . . . 48  
    Basic servlet template . . . . . 48  
    The "Hello World!" servlet . . . . . 50  
    Other basic servlet examples . . . . . 52

**Chapter 3: The Servlet Life Cycle . . . . . 59**

Basic Servlet Architecture . . . . . 59  
GET and POST Requests in Detail . . . . . 60  
    GET request . . . . . 60  
    POST request . . . . . 61  
    When to GET and when to POST . . . . . 61  
The Servlet Life Cycle . . . . . 62  
Essential Classes in the Servlet Package . . . . . 64  
    GenericServlet . . . . . 64  
    HTTPServlet . . . . . 66  
    Other methods . . . . . 66  
    HttpServletRequest . . . . . 67  
    Content-related methods . . . . . 73  
    Data stream-related methods . . . . . 73  
    Path-related methods . . . . . 74  
    The ServletResponse interface . . . . . 75  
Threading . . . . . 77

**Chapter 4: Handling HTTP . . . . . 79**

An Overview of HTTP and SSL . . . . . 79  
    HTTP transactions . . . . . 80  
    Simple HTTP server . . . . . 81  
HTTP Request Headers . . . . . 87  
    Printing request headers . . . . . 87  
    Printing CGI environment variables . . . . . 91  
HTTP Response Headers . . . . . 95  
    Status codes . . . . . 96

**Part II: Working with Servlets 107**

**Chapter 5: Using Servlets with HTML . . . . . 109**

HTML Forms . . . . . 109  
    Basic form elements . . . . . 110  
    Form input elements . . . . . 111

Processing Form Data . . . . .	116
Reading form input . . . . .	116
Writing form input to a file . . . . .	119
HTML Generation . . . . .	124
Validation with JavaScript . . . . .	130
Uploading Files . . . . .	134
Redirections and Includes Using the Request Dispatcher . . . . .	142
Sending SMTP Mail with JavaMail . . . . .	143
Message . . . . .	144
MimeMessage . . . . .	144
Session . . . . .	144
Transport . . . . .	144
Multipart . . . . .	144
MimeBodyPart . . . . .	144

## **Chapter 6: Data Access with Servlets . . . . . 153**

Evolution of Database Systems . . . . .	153
Client/server architecture . . . . .	154
ODBC architecture . . . . .	157
JDBC Concepts . . . . .	159
JDBC models . . . . .	159
JDBC drivers . . . . .	160
Standard interfaces in JDBC . . . . .	161
Connecting to a Database . . . . .	162
Connecting to Microsoft Access . . . . .	163
Connecting to Oracle . . . . .	167
Retrieving Data . . . . .	167
Executing SQL statements . . . . .	168
Prepared statements . . . . .	169
The ResultSet interface . . . . .	170
Servlets and databases . . . . .	171
Connection Pooling . . . . .	184
Personal Address Book . . . . .	187

## **Chapter 7: Exception Handling . . . . . 213**

Understanding Exceptions . . . . .	213
Java Exception Handling in Brief . . . . .	213
Built-in Exceptions Relevant to Servlets . . . . .	214
IOException . . . . .	214
ServletException . . . . .	215
UnavailableException . . . . .	215
Exception Handling in Servlets . . . . .	216
Leaving the ServletException unhandled . . . . .	216
Handling the ServletException . . . . .	218
Creating Your Own Exceptions . . . . .	225
A Few General Guidelines . . . . .	227
Let the exceptions trickle to the top . . . . .	227
Rethrow the exceptions . . . . .	228

Handle all exceptions at one place, but one by one . . . . .	228
Handle user interruption of servlet execution . . . . .	228
Performance Implications of Exceptions . . . . .	229

## **Chapter 8: Working with RMI . . . . . 231**

Sockets . . . . .	232
Remote Procedure Calls . . . . .	232
Remote Method Invocation . . . . .	232
RMI Architecture . . . . .	233
RMI and interfaces . . . . .	233
RMI architecture layers . . . . .	235
Stubs and skeletons . . . . .	236
Remote reference layer . . . . .	241
Transport layer . . . . .	241
<i>Locating Remote Objects</i> . . . . .	241
RMI registry . . . . .	242
Accessing the registry . . . . .	243
Binding objects to the registry . . . . .	244
Looking up objects from the registry . . . . .	245
Up and running with RMI . . . . .	247
Define the Remote interface . . . . .	248
Implement the Remote interface . . . . .	249
Compile the server source . . . . .	251
Generate stubs and skeletons . . . . .	251
RMI compiler . . . . .	252
Start the RMI registry and register the server . . . . .	254
Develop the client application . . . . .	258
Compile the client source and run the client . . . . .	261
Security Issues When Dealing with RMI . . . . .	262
Example RMI Stock Quote Server . . . . .	263
Example Servlet Accessing the Stock Quote Server . . . . .	276

## **Chapter 9: Servlet Communications . . . . . 285**

Applet-Servlet Communication . . . . .	285
Applet-servlet communication with HTTP tunneling . . . . .	286
Interservlet Communication . . . . .	310
Servlet chaining . . . . .	310
Servlet nesting . . . . .	321
The include method . . . . .	322
The forward method . . . . .	323
Servlet filters . . . . .	324

## **Chapter 10: Building Server-Side Includes . . . . . 327**

SSI Syntax . . . . .	328
SSIs with JRUN . . . . .	332

More SSI Examples . . . . .	332
Page headers and footers . . . . .	333
Date . . . . .	338
Random image rotator . . . . .	339
Initialization . . . . .	341
SSI Navigation Bar . . . . .	341

**Chapter 11: Cookies and Session Management . . . . . 347**

Stateless Protocol . . . . .	347
Understanding Sessions . . . . .	348
Session-Management Methods . . . . .	349
Storing session information in the URL (rewritten URLs) . . . . .	349
Session Management Using Hidden Fields . . . . .	350
Session Management with Cookies . . . . .	351
Cookie Support in the Servlet API . . . . .	352
Session Management with SSL Sessions . . . . .	355
Session Management with the Servlet API . . . . .	355
URL rewriting . . . . .	364
A Shopping Cart Example . . . . .	369

**Chapter 12: Security and Servlets . . . . . 393**

Authentication . . . . .	393
Basic authentication . . . . .	394
Digest authentication . . . . .	395
Form-based authentication . . . . .	395
Authorization . . . . .	396
Code authorization . . . . .	396
Caller authorization . . . . .	396
Java security . . . . .	397
LDAP Security . . . . .	397
SASL authentication . . . . .	402

**Part III: Beyond Servlets: JavaServer Pages 403**

**Chapter 13: Introducing JSP . . . . . 405**

Using JavaBeans in JSP . . . . .	405
Introducing JavaServer Pages . . . . .	405
Behind the scenes . . . . .	406
JSP Syntax and Semantics . . . . .	411
Directives . . . . .	412
Script elements . . . . .	420
JavaBean Characteristics . . . . .	430

JSP Standard Action Tags . . . . .	434
<jsp:useBean> . . . . .	434
<jsp:getProperty> . . . . .	436
<jsp:setProperty> . . . . .	436
<jsp:param> . . . . .	443
<jsp:include> . . . . .	443
<jsp:forward> . . . . .	444
<jsp:plugin> . . . . .	449
Objects accessible within a JSP page . . . . .	450

## **Chapter 14: The Model View Controller (MVC) Architecture . . . . . 453**

Introduction to MVC Architecture Design Pattern . . . . .	454
Model . . . . .	454
View . . . . .	454
Controller . . . . .	455
MVC in Java . . . . .	456
An example using Observer and Observable . . . . .	460
Advantages of Using MVC Architecture . . . . .	465
Servlets, JSP, JavaBeans, and MVC . . . . .	466
Case Study: A Simple Shopping Cart Example Using MVC Architecture . . . . .	467
The models . . . . .	473
The views and controllers . . . . .	490

## **Chapter 15: Servlets and JSP Tips and Tricks . . . . . 519**

Troubleshooting Servlets . . . . .	519
Troubleshooting JSP . . . . .	520
Log Writer . . . . .	521
Property Files . . . . .	530
Synchronization . . . . .	536
Scheduling Tasks . . . . .	537
Flushing the Output Stream . . . . .	538
Documenting with Javadoc . . . . .	541

## **Appendix A: What's on the CD-ROM . . . . . 547**

System Requirements . . . . .	547
Using the CD-ROM with Windows . . . . .	548
Using the CD-ROM with Linux . . . . .	548
What's on the CD-ROM . . . . .	549
Author-created material . . . . .	549
Applications . . . . .	549
Troubleshooting . . . . .	552

## **Appendix B: The Servlet API . . . . . 553**

javax.servlet . . . . .	554
Interfaces of the javax.servlet package . . . . .	554
Classes of the javax.servlet package . . . . .	562
Exceptions of the javax.servlet package . . . . .	565

javax.servlet.http . . . . .	567
Interfaces of the javax.servlet.http package . . . . .	567
Classes of the javax.servlet.http package . . . . .	575
<b>Appendix C: Servlet Engines . . . . .</b>	<b>583</b>
Servlet Engines . . . . .	583
Tomcat . . . . .	583
NetForge . . . . .	583
JRun . . . . .	584
The Orlon Application Server . . . . .	584
iPlanet . . . . .	584
WebLogic . . . . .	584
WebSphere . . . . .	584
jo! Web server . . . . .	585
Enhydra . . . . .	585
eWave and ServletExec . . . . .	585
Resin . . . . .	585
LiteWebServer . . . . .	586
<b>Appendix D: JSP Syntax Sheet . . . . .</b>	<b>587</b>
Comments in JSP . . . . .	587
Directives . . . . .	588
Script Elements . . . . .	589
Standard Action Tags . . . . .	590
JSP Accessible Objects . . . . .	593
request object . . . . .	593
response object . . . . .	593
session object . . . . .	593
application object . . . . .	593
pageContext object . . . . .	593
config object . . . . .	593
page object . . . . .	594
out object . . . . .	594
exception object . . . . .	594
<b>Appendix E: Elements of the Hypertext Transfer Protocol . . . . .</b>	<b>595</b>
HTTP Exchange . . . . .	595
CGI Environment Variables . . . . .	596
HTTP Headers . . . . .	598
Request headers . . . . .	599
Response Headers . . . . .	600
General Headers . . . . .	601
HTTP Status Codes . . . . .	601
Informational status codes 1XX . . . . .	602
Successful status codes 2XX . . . . .	602
Redirection status codes 3XX . . . . .	603
Client error-status codes 4XX . . . . .	604
Server error-status codes 5XX . . . . .	605

<b>Appendix F: Apache and Tomcat Configuration</b> . . . . .	<b>607</b>
Apache Installation . . . . .	608
Compiling Apache for Microsoft Windows . . . . .	608
Compiling Apache for Linux . . . . .	611
Starting and Stopping Apache . . . . .	613
On Windows . . . . .	613
On Linux . . . . .	614
Configuring Apache . . . . .	615
Configuration directive . . . . .	615
Configuration context . . . . .	616
Common configuration directives . . . . .	616
Logging in Apache . . . . .	622
Tomcat Installation . . . . .	624
Installing and configuring Tomcat . . . . .	624
On Windows . . . . .	624
On Linux . . . . .	625
Starting and stopping Tomcat . . . . .	625
Tomcat directory structure . . . . .	626
Configuring Tomcat . . . . .	627
Web applications . . . . .	629
Deploying Web applications in Tomcat . . . . .	631
The Glue! . . . . .	635
 Index . . . . .	 639
End-User License Agreement . . . . .	688
