|   |           |
|---|-----------|
| <b>Introduction</b>                     | <b>xv</b> |
| <b>Chapter 1 Electronics and Wiring</b> | <b>1</b>  |
| Schematics                              | 2         |
| Wire Size                               | 5         |
| Connectors                              | 6         |
| Things to Remember                      | 7         |
| Shutting Down                           | 8         |
| Emergency Cutoff Loop                   | 9         |
| Shutdown Procedure                      | 9         |
| Main Power Switch                       | 10        |
| Remote Cutoff Contactor                 | 10        |
| Simple Electronics Examples             | 11        |
| Motor Spin Direction                    | 12        |
| Switches                                | 13        |
| Relay Control                           | 13        |
| Doing It Remotely                       | 14        |
| Taking Care of Spikes                   | 14        |
| Going Further                           | 15        |
| Summary                                 | 15        |
| <b>Chapter 2 Remote Controllers</b>     | <b>17</b> |
| PPM and PCM Radios                      | 17        |
| IPD Radio Controller                    | 18        |
| Channels and Control Frequencies        | 19        |
| Tank Steering                           | 20        |
| RC Problems                             | 21        |
| Battery Power                           | 21        |
| Antenna Stuff                           | 22        |
| Motor Noise                             | 26        |
| FCC Regulations                         | 28        |
| Summary                                 | 28        |
| <b>Chapter 3 Reach For the Floor</b>    | <b>29</b> |
| Pneumatic Wheels                        | 29        |
| Solid Wheels                            | 30        |
| Number of Wheels                        | 31        |

|   |           |
|---|-----------|
| Walking Bots                            | 32        |
| Two-Legged Bots                         | 32        |
| Walking Gait                            | 32        |
| ShuffleBots                             | 33        |
| Summary                                 | 33        |
| <br>                                    |           |
| <b>Chapter 4 Speed Controllers</b>      | <b>35</b> |
| Bang Bang and PWM                       | 35        |
| Real Speed Control                      | 36        |
| 4QD Controllers                         | 36        |
| Vantec                                  | 37        |
| Innovation First                        | 37        |
| OSMC                                    | 37        |
| RC Cars                                 | 38        |
| Care and Feeding of a Speed Controller  | 38        |
| Summary                                 | 39        |
| <br>                                    |           |
| <b>Chapter 5 Batteries</b>              | <b>41</b> |
| Sealed Lead Acid (SLA)                  | 41        |
| Multiple Batteries                      | 43        |
| Charging SLAs                           | 46        |
| NiCd and NiMH                           | 47        |
| Building NiCd Packs                     | 48        |
| Memory Effect                           | 49        |
| Charging NiCds                          | 50        |
| Flying Batteries                        | 50        |
| Summary                                 | 51        |
| <br>                                    |           |
| <b>Chapter 6 Electric Motors</b>        | <b>53</b> |
| Choosing Motors                         | 53        |
| Gear Motors                             | 54        |
| Finding Torque                          | 55        |
| Motor Current Draw                      | 56        |
| Using Motor Resistance                  | 56        |
| Wire Size Again                         | 57        |
| Spinning Wheels Equals Low Current Draw | 58        |
| Motor rpm with a Tachometer             | 59        |
| Motor rpm with a String                 | 60        |
| Will This Motor Work?                   | 61        |
| Larger Wheels                           | 62        |
| Overvolting a Motor                     | 63        |
| Motors in Parallel and Series           | 63        |
| Nongearred Motors                       | 64        |
| Gear Reduction                          | 65        |
| Summary                                 | 72        |

|  |            |
|--|------------|
| <b>Chapter 7 Gears, Sprockets, and Pulleys</b> | <b>75</b>  |
| Terminology                                    | 75         |
| Bore   | 76         |
| Pitch  | 77         |
| Number of Teeth                                | 77         |
| Other Designations                             | 78         |
| Chain Positioning and Lubrication              | 81         |
| Summary  | 82         |
| <br>   |            |
| <b>Chapter 8 Axles, Bearings, and Bushings</b> | <b>83</b>  |
| Axles or Shafts                                | 83         |
| Shaft Collars                                  | 86         |
| Ball and Roller Bearings                       | 87         |
| Oil-Lite Style Bearings                        | 89         |
| Loading and RPM                                | 90         |
| Forces   | 90         |
| Manufacturing Style                            | 91         |
| Summary  | 91         |
| <br>   |            |
| <b>Chapter 9 Pneumatics</b>                    | <b>93</b>  |
| CO <sub>2</sub> Tanks                          | 93         |
| Regulators                                     | 94         |
| Buffer Tank                                    | 95         |
| Solenoid Valves                                | 96         |
| Cylinders                                      | 96         |
| Calculations                                   | 97         |
| Force  | 97         |
| Number of Shots                                | 98         |
| Complete System                                | 99         |
| Increasing the Force                           | 100        |
| Safety Precautions                             | 101        |
| Summary  | 101        |
| <br>   |            |
| <b>Chapter 10 Gas Engines</b>                  | <b>103</b> |
| Complexity and Reliability                     | 103        |
| Fuel Consumption                               | 104        |
| Summary  | 105        |
| <br>   |            |
| <b>Chapter 11 Frame/Armor Material</b>         | <b>107</b> |
| Material Comparison                            | 108        |
| Sandwiches                                     | 110        |
| Shock Mounting                                 | 111        |

|  |            |
|--|------------|
| Summary  | 112        |
| <b>Chapter 12 Weapon Systems</b>                   | <b>115</b> |
| Wedges/Rammers                                     | 116        |
| Spinners   | 117        |
| Hammers, Spikes, and Clampers                      | 118        |
| Flippers and Lifters                               | 119        |
| Miscellaneous Weapon Types                         | 120        |
| Summary  | 120        |
| <b>Chapter 13 Design Time</b>                      | <b>121</b> |
| Seven Important Questions                          | 121        |
| What Are the Rules?                                | 122        |
| What Materials Can I Use?                          | 122        |
| What Strategy Will I Use?                          | 123        |
| What Weapons Will It Have?                         | 123        |
| How Will I Control It?                             | 124        |
| Can I Pay For It?                                  | 124        |
| Do I Have Time?                                    | 125        |
| Overall Design                                     | 125        |
| Most Common Failures                               | 125        |
| Summary  | 126        |
| <b>Chapter 14 Modeling</b>                         | <b>127</b> |
| Low Tech Models                                    | 127        |
| High Tech Models                                   | 129        |
| Summary  | 131        |
| <b>Chapter 15 Tools</b>                            | <b>133</b> |
| Work Bench   | 133        |
| Bench Vise   | 134        |
| Hand Drill, Drill Bits, Taps and Dies, and Reamers | 134        |
| Pilot Holes  | 136        |
| Drill Sizes and Threads                            | 136        |
| Thread Cutting                                     | 136        |
| Reamers  | 138        |
| Small Saws   | 139        |
| Bench Grinder                                      | 141        |
| Wire Cutters, Strippers, and Crimpers              | 141        |
| Soldering Iron                                     | 142        |
| Wrenches and Socket Sets                           | 143        |
| Micrometer   | 143        |
| Drill Press  | 145        |

|   |            |
|---|------------|
| Broach Set  | 145        |
| Band Saw  | 146        |
| Angle Grinder   | 147        |
| Welder  | 148        |
| Punches and Hole Transfers                              | 149        |
| Mill, Lathe, or Three-Way Machine                       | 150        |
| Summary   | 151        |
| <b>Chapter 16 Fasteners</b>                             | <b>153</b> |
| Bolts and Nuts  | 153        |
| Bolt Markings   | 154        |
| Ordering Bolts  | 155        |
| Proper Bolt Usage                                       | 155        |
| Smaller Bolts   | 157        |
| Rivets  | 158        |
| Weld Nuts   | 159        |
| Summary   | 160        |
| <b>Chapter 17 Getting Parts and Sponsors</b>            | <b>161</b> |
| The Internet  | 161        |
| Surplus   | 162        |
| Sponsorships  | 162        |
| Summary   | 163        |
| <b>Chapter 18 Competing</b>                             | <b>165</b> |
| Budget Requirements                                     | 165        |
| Tools in the Pit Area                                   | 166        |
| Life in the Pits  | 166        |
| Summary   | 167        |
| <b>Chapter 19 Project One: RAID (\$100)</b>             | <b>169</b> |
| Modifying Servos  | 169        |
| Putting Parts Together                                  | 173        |
| Cost Rundown  | 178        |
| Summary   | 178        |
| <b>Chapter 20 Project Two: Six Million Dollar Mouse</b> | <b>179</b> |
| HandsOFF!   | 179        |
| Bot Conversion Time                                     | 186        |
| Competition Time  | 186        |
| Cost RunDown  | 188        |

|  |            |
|--|------------|
| Summary  | 189        |
| <b>Chapter 21 Project Three: Dagoth</b>              | <b>191</b> |
| The Plan   | 191        |
| Which Competition Will I Enter?                      | 192        |
| Which Weight Class?                                  | 192        |
| How Will the Bot Move?                               | 192        |
| What Kind of Frame, Armor, and Weapons Will It Have? | 194        |
| Mechanical Design                                    | 196        |
| Where the Parts Go                                   | 198        |
| Motors   | 199        |
| Mounting the Wheels, Bearings, Axles, and Motors     | 204        |
| Electrical Layout                                    | 212        |
| Motors   | 212        |
| Batteries  | 214        |
