International Handbook of
**EARTHQUAKE
& ENGINEERING
SEISMOLOGY**

EDITED BY

William HK Lee
Hiroo Kanamori
Paul C Jennings
Carl Kisslinger

Part A

Contributors	xi
Foreword	xvii
Preface	xix

I. History and Prefatory Essays

1. History of Seismology (D.C. Agnew)	3
2. Historical View of Earthquake Engineering (G.W. Housner)	13
3. The Jesuit Contribution to Seismology (A. Udías and W. Stauder)	19
4. International Seismology (R.D. Adams)	29
5. Synthesis of Earthquake Science Information and Its Public Transfer: A History of the Southern California Earthquake Center (K. Aki)	39
6. Continental Drift, Sea-Floor Spreading, and Plate/Plume Tectonics (S. Uyeda)	51
7. Earthquake Mechanisms and Plate Tectonics (S. Stein and E. Klosko)	69

II. Theoretical Seismology

8. Theoretical Seismology: An Introduction (A. Udías)	81
9. Seismic Ray Theory and Finite Frequency Extensions (C.H. Chapman)	103
10. Normal Modes of the Earth and Planets (P. Lognonné and E. Clévéde)	125
11. Inversion of Surface Waves: A Review (B. Romanowicz)	149
12. Earthquake Dynamics (R. Madariaga and K.B. Olsen)	175
13. Scattering and Attenuation of Seismic Waves in the Lithosphere (H. Sato, M. Fehler, and R.-S. Wu)	195
14. Earthquakes as a Complex System (D.L. Turcotte and B.D. Malamud)	209
15. Physics of Earthquakes (R. Teisseyre and E. Majewski)	229
16. Probabilistic Approach to Inverse Problems (K. Mosegaard and A. Tarantola)	237

III. Observational Seismology

17. Challenges in Observational Seismology (W.H.K. Lee)	269
18. Seismometry (E. Wielandt)	283
19. Seismic Noise on Land and on the Seafloor (S.C. Webb)	305
20. US Contribution to Digital Global Seismograph Networks (C.R. Hutt, H.F. Bolton, and L.G. Holcomb)	319
21. The Structure and Interpretation of Seismograms (O. Kulhánek)	333
22. Analysis of Digital Earthquake Signals (F. Scherbaum).	349
23. Seismometer Arrays – Their Use in Earthquake and Test Ban Seismology (A. Douglas)	357
24. Seismological Methods of Monitoring Compliance with the Comprehensive Nuclear Test-Ban Treaty (P.G. Richards)	369
25. Volcano Seismology and Monitoring for Eruptions (S.R. McNutt)	383
26. Three-Dimensional Crustal <i>P</i> -Wave Imaging of Mauna Loa and Kilauea Volcanoes, Hawaii (H.M. Benz, P. Okubo, and A. Villaseñor).	407
27. Marine Seismology (K. Suyehiro and K. Mochizuki)	421
28. Tsunamis (K. Satake)	437

IV. Earthquake Geology and Mechanics

29. Geology of the Crustal Earthquake Source (R.H. Sibson)	455
30. Paleoseismology (L.B. Grant)	475
31. Using Earthquakes for Continental Tectonic Geology (J.A. Jackson)	491
32. Rock Failure and Earthquakes (D.A. Lockner and N.M. Beeler)	505
33. State of Stress Within the Earth (L.J. Ruff)	539
34. State of Stress in the Earth's Lithosphere (M.D. Zoback and M.L. Zoback)	559
35. Strength and Energetics of Active Fault Zones (J.N. Brune and W. Thatcher)	569
36. Implications of Crustal Strain during Conventional, Slow, and Silent Earthquakes (M.J.S. Johnston and A.T. Linde)	589
37. Estimating Earthquake Source Parameters from Geodetic Measurements (K.L. Feigl).	607
38. Electromagnetic Fields Generated by Earthquakes (M.J.S. Johnston)	621

39.	Earthquake-Related Hydrological and Geochemical Changes (C.-Y. King and G. Igarashi)	637
40.	Case Histories of Induced and Triggered Seismicity (A. McGarr, D. Simpson, and L. Seeber).	647

V. Seismicity of the Earth

41.	Global Seismicity: 1900–1999 (E.R. Engdahl and A. Villaseñor)	665
42.	A List of Deadly Earthquakes in the World: 1500–2000 (T. Utsu)	691
43.	Statistical Features of Seismicity (T. Utsu)	719
44.	Relationships between Magnitude Scales (T. Utsu)	733
45.	Historical Seismicity and Tectonics: The Case of the Eastern Mediterranean and the Middle East (N.N. Ambraseys, J.A. Jackson, and C.P. Melville).	747
46.	Earthquakes and Archaeology (A. Nur)	765
47.	Historical Seismology: The Long Memory of the Inhabited World (E. Guidoboni)	775
48.	Earthquake History: Some Examples	791
48.1	Introduction (W.H.K. Lee)	791
48.2	California Earthquakes of $M \geq 5.5$: Their History and the Areas Damaged (T. Topozada and D. Branum)	793
48.3	The Historical Earthquakes of India (S.P. Satyabala)	797
48.4	Historical Earthquakes in Japan (T. Usami)	799
48.5	Historical Earthquakes of the British Isles (R.M.W. Musson)	803
49.	Macroseismology (R.M.W. Musson and I. Cčić)	807
50.	USGS Earthquake Moment Tensor Catalog (S.A. Sipkin)	823

VI. Earth's Structure

51.	The Earth's Interior (T. Lay)	829
52.	Probing the Earth's Interior with Seismic Tomography (A. Curtis and R. Snieder)	861
53.	Seismic Anisotropy (M. Cara)	875
54.	Seismic Velocity Structure of the Continental Lithosphere from Controlled Source Data (W.D. Mooney, C. Prodehl, and N.I. Pavlenkova)	887
55.	Seismic Structure of the Oceanic Crust and Passive Continental Margins (T.A. Minshull)	911
56.	The Earth's Core (X. Song)	925
	Index	Xi
